Italian Medieval Sculpture in the Metropolitan Museum of Art and the Cloisters Metropolitan Museum of Art (New York, N.Y.), Lisbeth Castelnuovo-Tedesco, Jack Souldanian, 2010 The collection of Italian medieval sculpture in The Metropolitan Museum of Art and The Cloisters began with the acquisition in 1908 of a Romanesque column statue today the Museum's holdings comprise more than seventy works dating from the ninth to the late fifteenth century The birthplaces of these works range from Sicily to Venice some typify local styles others illustrate the intense artistic exchanges taking place within Italy and between Italy and the wider world Technological advances of the last decades have made it possible to determine more precisely the materials and techniques from which works of art are made the history of their alteration and the mechanisms of their deterioration Using such techniques scholars have been able to ascertain for example that sculptures previously thought to be modern works carved in the medieval manner were in fact completely authentic This innovative volume represents a watershed in the study of sculpture a collaborative dialogue between an art historian and a conservator between art history and art science that deepens our understanding of the object we see while illuminating its elusive enigmatic history From publisher's description *Polykleitos, the Doryphoros, and Tradition* Warren G. Memory and Commemoration in Medieval Culture Elma Brenner,Meredith Cohen,Mary Franklin-Brown,2016-04-22 In medieval society and culture memory occupied a unique position It was central to intellectual life and the medieval understanding of the human mind Commemoration of the dead was also a fundamental Christian activity Above all the past and the memory of it occupied a central position in medieval thinking from ideas concerning the family unit to those shaping political institutions Focusing on France but incorporating studies from further afield this collection of essays marks an important new contribution to the study of medieval memory and commemoration Arranged thematically each part highlights how memory

The Connoisseur, 1978-05 **The Archaistic Style in Roman Statuary** M.D. Fullerton, 2018-07-17 This book deals with the use of archaistic stylistic elements i.e. those which revive or imitate features of Greek Archaic art in free standing statuary dating from the second century B.C. to the third century A.C. The main objective of the study is to determine how the archaistic style was used what prototypes were imitated what subjects were represented how the replicas of statue types were distributed how these statues were displayed and what prompted such stylistic anachronism The introductory chapter deals with general problems of archaism in ancient art and the specific questions pertaining to statuary in the round The body of material nearly three hundred pieces in all is organized by type on the basis of pose and garment arrangement In a concluding chapter evidence from the body of the study is collected and possible answers are suggested for the questions outlined above This study contributes to the currently widespread scholarly interest in stylistic revivals especially classicism and archaism which occurred not only in Roman times but in earlier and later periods as well Stone Sculptures Harvard University.
