## **Sd 14 The Full Story:**

**SD14** John Lingwood, 2004-01-01      **The Evolution and Significance of the Powered Bulk Carrier** Roy Fenton, 2023-04-03 The book is the first to detail the 170 year evolution of the powered bulk carriers which continue to have a major role in the world's trades and economies. Their design and technological development is traced from the screw colliers of the 1850s which revolutionised the British coastal coal trade. The same engineering principles were applied to produce ocean going steam and later motor tramps. By the end of the 19th century the capabilities and economies of these black freighters had captured from the sailing ship much of the world's trade in bulk commodities. In the second half of the 20th century the tramps in turn evolved into multi purpose dry bulk carriers. These workhorses of the sea transport commodities including metallic ores, grain, coal, timber and other minerals. Quantities of up to 400 000 tons are carried in the largest specialised ore carriers. In a parallel development applying the same technical principles produced smaller yet efficient steam and later motor coasters which came to dominate short sea shipping. The book concludes with a discussion of how the economies of transportation provided by bulk carriers have had profound effects on industrialisation, globalisation and the world's economy and discusses the environmental impact of these ships. [Ships Monthly](#), 2005      *Tramp Ships*

Roy Fenton, 2013-11-13 With 300 stunning photographs this pictorial history of tramp trade ships illustrates the evolution of these charming itinerant merchant vessels. The tramp ship was the taxi of the seas. With no regular schedules it voyaged anywhere and everywhere picking up and dropping off cargoes, mainly bulk cargoes such as coal, grain, timber, china, clay and oil. Older and slower vessels tended to find their way into this trade hence the tag tramp but new tramps were also built for the purpose. In this beautiful volume featuring 300 photographs Roy Fenton illustrates the Tramp Ship's evolution over the course of more than 100 years from the 1860s when the steam tramp developed from the screw collier until it was largely replaced by the specialist bulk carrier in the 1980s. Fenton offers fascinating background information on the design and building of tramps. He describes the machinery from simple triple expansion turbines to diesel engines. Their operation and management and the life of the officers and crews are also covered. This illustrated history journeys through the last years of the 19th century, the two world wars and the postwar years. Photo captions provide each ship's dimensions, owners and builder. Each ship's career is outlined with notes on trades and how they changed over a ship's lifetime.      **Online News and the Public**

Michael B. Salwen, Bruce Garrison, Paul D. Driscoll, 2004-12-13 This volume offers unique and timely insights on the state of online news, exploring the issues surrounding this convergence of print and electronic platforms and the public's response to it. It provides an overview of online newspapers including current trends and legal issues and covering issues of credibility and perceptions by online news users. The heart of the book is formed by empirical studies, mostly social surveys coming out of the media effects and uses traditions. The chapters are grounded in theoretical frameworks and bring much needed theory to the study of online news. The frameworks guiding these studies include media credibility, the third

person effect media displacement and uses and gratifications The book ends with a section devoted to research on online news postings This book is appropriate for scholars researchers and students in journalism mass communication new media and related areas and will be of interest to anyone examining how people use the web as a source for news **The Register Office.
