Bailey, 2013-05-15 Alaska pollock is everywhere If you're eating fish but you don't know what kind it is it's almost certainly pollock Prized for its generic fish taste pollock masquerades as crab meat in California rolls and seafood salads and it feeds millions as fish sticks in school cafeterias and Filet O Fish sandwiches at McDonald's That ubiquity has made pollock the most lucrative fish harvest in America the fishery in the United States alone has an annual value of over one billion dollars But even as the money rolls in pollock is in trouble in the last few years the pollock population has declined by more than half and some scientists are predicting the fishery's eventual collapse In *Billion Dollar Fish* Kevin M Bailey combines his years of firsthand pollock research with a remarkable talent for storytelling

to offer the first natural history of Alaska pollock Crucial to understanding the pollock fishery he shows is recognizing what aspects of its natural history make pollock so very desirable to fish while at the same time making it resilient yet highly vulnerable to overfishing Bailey delves into the science politics and economics surrounding Alaska pollock in the Bering Sea detailing the development of the fishery the various political machinations that have led to its current management and perhaps most important its impending demise He approaches his subject from multiple angles bringing in the perspectives of fishermen politicians environmentalists and biologists and drawing on revealing interviews with players who range from Greenpeace activists to fishing industry lawyers Seamlessly weaving the biology and ecology of pollock with the history and politics of the fishery as well as Bailey s own often raucous tales about life at sea Billion Dollar Fish is a book for every person interested in the troubled relationship between fish and humans from the depths of the sea to the dinner plate

The Juvenile Instructor ,1899 *Atlantis* David Gibbins,2006-09-26 BONUS This edition contains an excerpt from David Gibbins s The Mask of Troy From an extraordinary discovery in a remote desert oasis to a desperate race against time in the ocean depths a team of adventurers is about to find the truth behind the most baffling legend in history The hunt is on for Marine archaeologist Jack Howard has stumbled upon the keys to an ancient puzzle With a crack team of scientific experts and ex Special Forces commandos he is heading for what he believes could be the greatest archaeological find of all time the site of fabled Atlantis while a ruthless adversary watches his every move and prepares to strike But neither of them could have imagined what awaits them in the murky depths Not only a shocking truth about a lost world but an explosive secret that could have devastating consequences today Jack is determined to stop the legacy of Atlantis from falling into the wrong hands whatever the cost But first he must do battle to prevent a global catastrophe Seasteading Joe Quirk,2017-03-21 In these thought provoking visions of the future The Wall Street Journal Joe Quirk and Patri Friedman of the Seasteading Institute explain how ocean cities can solve many of our environmental technological and civic problems and introduce the visionaries and pioneers who are now making seasteading a reality Our planet has been suffering from serious environmental problems and their social and political consequences But imagine a vast new source of sustainable and renewable energy that would also bring more equitable economies A previously untapped source of farming that could produce significant new sources of nutrition Future societies where people could choose the communities they want to live in free from the restrictions of conventional citizenship This extraordinary vision of our near future as imagined in Seasteading attracted the powerful support of Silicon Valley s Peter Thiel and it may be drawing close to reality Facing growing

environmental threats French Polynesia has already signed on to build some of the world's first seasteading Joe Quirk and Patri Friedman show us how cities built on floating platforms in the ocean will work and they profile some of the visionaries who are implementing basic concepts of seasteading today An entrepreneur's dream these floating cities will become laboratories for innovation and creativity Seasteading offers hope for a future when life on land has grown grim Kirkus Reviews proving the adage that yesterday's science fiction is tomorrow's science fact **Revisiting National Security** Prabhakaran

Paleri,2022-05-10 This book examines the evolving concept of national security and how human systems could be governed in an ever turbulent and dynamic world It takes a revised look at the concept of national security previously researched and identified by the author based on the present context but with a futuristic appreciation of governance primarily national but extended to global perspectives in the modern and dynamically shifting world The book emphasises the need for governments to maximise national security for the well being of their people The concept of national security is taken as the key subject of national governance which is extendable to global governance wherein national security is not only the physical or military security alone but also the overall well being of the people of a nation This book explores how national security can be achieved by balancing its various elements in different terrains where the game of governance is played in national as well as global perspective It also presents additional findings and observations to show that the approach is transformative redefining the key knowledge paradigms This book is relevant for policy makers students researchers and academics who wish to explore and rethink their approach towards governing the human systems whose well being is the responsibility of governments Mythic Discourses Frog,Anna-Leena Siikala,Eila Stepanova,2012-12-31 Mythic discourses

in the present day show how vernacular heritage continues to function and be valuable through emergent interpretations and revaluations At the same time continuities in mythic images motifs myths and genres reveal the longue dur e of mythologies and their transformations The eighteen articles of Mythic Discourses address the many facets of myth in Uralic cultures from the Finnish and Karelian world creation to Nenets shamans offering multidisciplinary perspectives from twenty eastern and western scholars The mythologies of Uralic peoples differ so considerably that mythology is approached here in a broad sense including myths proper religious beliefs and associated rituals Traditions are addressed individually typologically and in historical perspective The range and breadth of the articles presenting diverse living mythologies their histories and relationships to traditions of other cultures such as Germanic and Slavic all come together to offer a far richer and more developed perspective on Uralic traditions than any one article could do alone The Philippine Craftsman ,1914

Climate Change and Agricultural Development Udaya Sekhar Nagothu,2016-07-15 Two of the greatest current challenges are climate change and variability and food security Feeding nine billion people by 2050 will require major efforts aimed at

climate change adaptation and mitigation One approach to agriculture has recently been captured by the widely adopted term of Climate Smart Agriculture CSA This book not only explains what this entails but also presents practical on the ground studies of practices and innovations in agriculture across a broader spectrum including agroecology and conservation agriculture in less developed countries It is shown that CSA is not a completely new science and a number of its recommended technologies have been used for some time by local farmers all over the world What is relevant and new is the approach to exploit their adaptation and mitigation potential However a major limitation is the lack of evidence based knowledge that is necessary for policy makers to prepare strategies for adaptation and mitigation This book assembles knowledge of CSA agroecology and conservation agriculture and perspectives from different regions of the world to build resilient food systems The first part analyzes the concept opportunities and challenges and provides a global perspective drawing particularly on studies from Africa and Asia The second part of the book showcases results from various studies linked to soil water and crop management measures from an ongoing program in India as well as experiences from other regions The third section assesses the needs for an enabling policy environment mainstreaming gender and some final recommendations for up scaling and or out scaling innovations
