Ravalli,2018-12-01 2019 Choice Outstanding Academic Title More than any other nonhuman species it was the sea otter that defined the world's largest oceanscape prior to the California gold rush. In addition to the more conventional aspects of the sea otter trade including Russian expansion in Alaska, British and American trading in the Pacific Northwest and Spanish colonial ventures along the California coast, the global importance of the species can be seen in its impact on the East Asian maritime fur trade. This trade linked Imperial China, Japan, and indigenous Ainu peoples of the Kurile Islands as early as the fifteenth century. In *Sea Otters: A History*, Richard Ravalli synthesizes anew the sea otter's complex history of interaction with humans by drawing on new histories of the species that consider international and global factors beyond the fur trade, including sea mammal conservation, Cold War nuclear testing, and environmental tourism. Examining sea otters in a Pacific World context, Ravalli weaves together the story of imperial ambition, greed, and an iconic sea mammal that left a determinative imprint on the modern world.      **Southern Sea Otters** Jeanette Leardi,2007-08-01 Was it too late to save the

southern sea otter? Thousands of these furry sea creatures once lived off the coast of California. Yet by the 1970s, years of hunting, water pollution, and boating accidents had pushed the sea otter to the brink of extinction. Would people find a way to help this endangered animal survive? In *Southern Sea Otters: Fur, Tragedy, Avoided Children*, relive the inspiring and heroic efforts of people who stepped in to save this remarkable creature when all seemed lost. Through this true tale of wildlife survival, children discover the bold and creative ideas that Americans and their government have used to protect and care for the country's endangered wildlife. Full-color photographs and a habitat map enrich this heartfelt story of conservationism and courage.      **Time Budgets and Activity Patterns of Sea Otters Along the Central California Mainland at San**
