Sea Eagles:

The Great Eagles Michael O'Neal Campbell, 2022-05-18 This book examines the current literature and knowledge on the evolution and ecology of all the birds named as eagles with particular emphasis on the larger species It also examines the past and current relations between eagles and people including habitat change and conservation issues Eagle ecologies and conservation are currently seriously impacted by human activities such as industrialization urbanization pollution deforestation and hunting Some eagle species have consequently experienced extreme population changes There are however some positive developments Eagles have a strong historic bond with human civilization due to their status as the world's most charismatic birds Conservation policies have also been successful in repopulating some ecosystems with breeding eagles Therefore despite the complexity of this relationship there may yet be hope for this unique species group frequently rated as the kings of birds and symbolic of human power ambition royalty nationality and even concepts of God It is hoped that this book will contribute to the further understanding of these unique and fantastic birds **Australasian**

Yan Du,2019-02-28 China s role in the history of world animation has been trivialized or largely forgotten In **Animated Encounters** Daisy Yan Du addresses this omission in her study of Chinese animation and its engagement with international forces during its formative period the 1940s 1970s She introduces readers to transnational movements in early Chinese animation tracing the involvement of Japanese Soviet American Taiwanese and China s ethnic minorities at socio historical or representational levels in animated filmmaking in China Du argues that Chinese animation was international almost from its inception and that such border crossing exchanges helped make it Chinese and subsequently transform the history of world animation She highlights animated encounters and entanglements to provide an alternative to current studies of the subject characterized by a preoccupation with essentialist ideas of Chineseness and further questions the long held belief that the forty year period in question was a time of cultural isolationism for China due to constant wars and revolutions China s socialist era known for the pervasiveness of its political propaganda and suppression of the arts unexpectedly witnessed a golden age of animation Socialist collectivism reinforced by totalitarian politics and centralized state control allowed Chinese animation to prosper and flourish artistically In addition the double marginality of animation a minor art form for children coupled with its disarming qualities and intrinsic malleability and mobility granted animators and producers the double power to play with politics and transgress ideological and geographical borders while surviving censorship both at home and abroad A captivating and enlightening history **Animated Encounters** will attract scholars and students of world film and animation studies children s culture and modern Chinese history **The Bald Eagle** Jon M. E. Gunilla Almered Olsson,Pernille Gooch,2019-04-12 Providing both a theoretical background and practical examples of natural resource conflict this volume explores the pressures on natural resources leading to scarcity and conflict It is shown that the causes and driving forces behind natural resource conflicts are diverse complex and often interlinked including global economic growth exploding consumption poor governance poverty unequal access to resources and power The

different interpretations of nature culture and the role of humans in the ecosystem are often at the centre of the conflict. Natural resource conflicts range from armed conflicts to conflicts of interest between stakeholders in the North as well as in the South. The varying driving forces behind such disputes at different levels and scales are critically analysed and approaches to facilitate and enforce mediation, transformation and collaboration at these levels and scales are presented and discussed. In order to transform existing resource conflicts as well as to decrease the risk of future conflicts, approaches that enhance and enforce collaboration for sustainable development at global, regional, national and local levels are reviewed and sustainable pathways suggested. A range of global examples is presented including water resources, fisheries, forests, human wildlife conflicts, urban environments and the consequences of climate change. It will be a valuable text for advanced students of natural resource management, environment and development studies and peace and conflict management. The book will also be of interest to practitioners in the field of natural resource management.
