Sea Of Light:

Sea of Light Miguel Balle, 2002-05-20 A father talks for the first time to his dying son unraveling extraordinary tales of sea adventures and spiritual encounters Is this one way conversation a mere conduit to these extraordinary tales or is it the key for entering into the mundane drama of living loving parenting and making lasting commitments as against the manly heroics of taking risks seducing the passing mermaid dancing and boozing the night away and above all being counted among the winners Whichever way you decide to read this book you will be taken to task by the author suffering wondering enjoying cursing and occasionally snickering In the end you will have to follow Jason to the end of his journey and there be given the ultimate choice of accepting what is or cursing it

A Ray of Light in a Sea of Dark Matter Charles Keeton, 2014-04-30 What s in the dark Countless generations have gazed up at the night sky and asked this question the same question that cosmologists ask themselves as they study the universe The answer turns out to be surprising and rich The space between stars is filled with an exotic substance called dark matter that exerts gravity but does not emit absorb or reflect light The space between galaxies is rife with dark energy that creates a sort of cosmic antigravity causing the expansion of the universe to accelerate Together dark matter and dark energy account for 95 percent of the content of the universe News reporters and science journalists routinely talk about these findings using terms that they assume we have a working knowledge of but do you really understand how astronomers arrive at their findings or what it all means Cosmologists face a conundrum how can we study substances we cannot see let alone manipulate A powerful approach is to observe objects whose motion is influenced by gravity Einstein predicted that gravity can act like a lens to bend light Today we see hundreds of cases of this instances where the gravity of a distant galaxy distorts our view of a more distant object creating multiple images or spectacular arcs on the sky Gravitational lensing is now a key part of the international quest to understand the invisible substance that surrounds us penetrates us and binds the universe together A Ray of Light in a Sea of Dark Matter offers readers a concise accessible explanation of how astronomers probe dark matter Readers quickly gain an understanding of what might be out there how scientists arrive at their findings and why this research is important to us Engaging and insightful Charles Keeton gives everyone an opportunity to be an active learner and listener in our ever expanding universe Watch a video with Charles Keeton Watch video now <http://www.youtube.com/watch?v=Uc3byXNS1G0>
