Seals Fur Seals Sea Lions And Walrus Status Survey And Conservation Action Plan:

Marine Mammals Nick Gales, Mark Hindell, Roger Kirkwood, 2003 Brings together contributions from 68 leading scientists from 12 countries to provide an up to date review on the way we manage our interactions with whales dolphins seals and dugongs Seals, Fur Seals, Sea Lions, and Walrus IUCN/SSC Seal Specialist Group, 1993 African Rhino Richard Emslie, 1999 The black and the white rhinoceros have become flagship species for international conservation They are significant not only for the continuation of a major evolutionary heritage but also as symbols for the protection of African savannahs The battle for the survival of these species has been marked by some notable successes and sadly many failures and the situation is still critical The international horn trade ban and the domestic bans imposed in most traditional user states have driven the trade further underground in some cases inflating prices and making illegal dealing even more lucrative This Plan is aimed at donors government and non government organizations and all those involved in rhino conservation It outlines the actions and strategies needed to catalyse support for these majestic animals and help secure their future in sub Saharan Africa The overall conclusion is that given the political will stability and adequate field expenditure rhinos can be conserved in the wild **Priorities for the Conservation of Mammalian Diversity** Abigail Entwistle, Nigel Dunstone, 2000-07-20 Scientific yet accessible review of mammalian conservation as a model demonstrating wider issues in conservation **Microchiropteran Bats** Anthony Michael Hutson, Anthony M. Hutson, Simon P. Mickleburgh, P. A. Racey, 2001 **Walker's Marine Mammals of the World** Ronald M. Nowak, 2003-05-28 Marine mammals are among the most fascinating and most watched of Earth s many animal species particularly for their many adaptations for life in and around the water and their unique methods of communication This comprehensive guide to the order is for experts and enthusiasts alike **Equids--zebras, Asses, and Horses** Patricia Des Roses Moehlman, IUCN/SSC Equid Specialist Group, 2002 The new Equid Action Plan provides current knowledge on the biology ecology and conservation status of wild zebras asses and horses It specifies what information is lacking and prioritizes needed conservation actions The Action Plan also provides chapters on equid taxonomy genetics reproductive biology and population dynamics These chapters highlight unsolved issues of taxonomy and genetics They also provide information and insight into the special demographic and genetic challenges of managing small populations The chapter on disease provides a review of documented equine disease and epidemiology and focuses on priorities for equid conservation health The final chapter deals with the importance of developing an assessment methodology that explicitly considers the role of equids in ecosystems and the ecological processes that are necessary for ecosystem viability The approach of combining ecological field studies and ecosystem modeling should prove useful for the scientific management and conservation of wild equids worldwide These chapters provide research and conservation practitioners with new information and paradigms Oceanography of the East Sea (Japan Sea) Kyung-Il Chang, Chang-Ik Zhang, Chul Park, Dong-Jin Kang, Se-Jong Ju, Sang-Hoon Lee, Mark

Wimbush,2015-09-15 This book reviews the research in various fields of oceanography on the responses of the East Japan Sea to climate change The uniqueness of the East Japan Sea comes from the rapid and amplified response to climate change which includes long terms trends of physical and chemical parameters at a rate that almost doubles or even higher the global rate This book aims to provide in an organized way the results from the previously published knowledge but also to introduce an updated view of the research recently carried out The book is divided into several parts that comprise the physical chemical biological and geological aspects of the region and fisheries This book is made for researchers and students working on climate variability as well as for the oceanography community working on world s marginal seas The research presented in this work will also benefit to researchers from other fields such as social scientists and environmentalists and also policy makers

Marine Mammals ,1995 **Annual Report of the Marine Mammal Commission** United States. Marine Mammal Commission,1984

North American Rodents David J. Hafner,1998 The first comprehensive treatment of North American rodents of conservation concern This action plan summarizes the rodent fauna of North America and provides available information on every rodent taxon that has been considered to be of conservation concern by state provincial and private conservation agencies and regional experts It is hoped that the survey provided in this action plan will serve as a common ground for all these parties in drawing up conservation strategies for rodents

Marine Policy and Economics ,2010-10-25 Elements of Physical Oceanography is a derivative of the Encyclopedia of Ocean Sciences Second Edition and serves as an important reference on current physical oceanography knowledge and expertise in one convenient and accessible source Its selection of articles all written by experts in their field focuses on ocean physics air sea transfers waves mixing ice and the processes of transfer of properties such as heat salinity momentum and dissolved gases within and into the ocean Elements of Physical Oceanography serves as an ideal reference for topical research References related articles in physical oceanography to facilitate further research Richly illustrated with figures and tables that aid in understanding key concepts Includes an introductory overview and then explores each topic in detail making it useful to experts and graduate level researchers Topical arrangement makes it the perfect desk reference

Orchids IUCN/SSC Orchid Specialist Group,1996 This action plan chronicles the threats faced by wild orchids but more importantly to critical habitats that host extraordinarily high orchid diversity and endemism It explores and recommends specific ways that national and local government legislators scientists and orchid conservationists as well as growers can all help to reverse present trends The facts and viewpoints presented in this comprehensive document update and supplement the information available to conservation organizations and agencies through the world so that they can lobby their appropriate government offices more effectively

Tropical Pinnipeds Juan J. Alava,2017-07-12 Pinnipeds are a fascinating group of marine mammals that play a crucial role as apex predators and sentinels of the functioning and health of marine ecosystems They are found in the most extreme environments from the Polar regions to the tropics Pinnipeds are comprised of about 34

species and of those at least 25% live permanently in tropical zones This book reviews and updates current research on the biology marine ecology bio monitoring and conservation of tropical pinniped populations including their behavior anthropogenic stressors and health It also looks at challenges to be faced for the conservation of tropical pinnipeds many of which are threatened species Curassows, Guans and Chachalacas Cracid Specialist Group,2000 Curassows Guans and Chachalacas Status Survey and Conservation Action Plan for Cracids 2000 200 *Lead, Mercury and Cadmium in the Aquatic Environment* Rachel Ann Hauser-Davis,Natalia Soares Quinete,Leila Soledade Lemos,2023-04-13 This book presents an integrated and holistic discussion on cadmium lead and mercury toxicity in aquatic environments expanding general concepts on chemical speciation effects and exploring specific environmental toxicological issues exposure routes and bioanalytical approaches for their determination and assessments on their intracellular deleterious effects It contains worldwide and regional aspects on cadmium lead and mercury occurrence fate and toxicity addressing key environmental exposure and health risk concerns to both humans and aquatic organisms Our book is of interest to anyone conducting research in the broad fields of oceanography geochemistry ecotoxicology and environmental and public health **Antelopes** David P. Mallon,Steven Charles Kingswood,2001 Antelope herds numbering in the tens of thousands formerly occurred across the steppes and semideserts of Eurasia and India but these have nearly all been reduced to fractions of their earlier size antelope populations are now fragmented across the region and during recent decades several species have disappeared altogether Threats include hunting loss of habitat population fragmentation inadequate protected area coverage poorly developed administrative structures under resourcing of conservation programmes and lack of enforcement of existing legislation Rising human population growth and economic development constantly increases pressure on land and natural resources There is a consequent need for integrated rural development and community based conservation projects which have the full participation of local people at the planning and execution stages This publication Part 4 of the Global Antelope Survey covers 37 countries in the region and actions to conserve antelope populations are listed in each country report

Annual Report to Congress United States. Marine Mammal Commission,1994 Tapirs Daniel M. Brooks,Richard E. Bodmer,Sharon Matola,1997 Descended from a long and ancient lineage tapirs are important tropical forest seed dispersers However today all species of tapirs are threatened to various degrees by habitat destruction and hunting This action plan was written with wildlife biologists ecologists administrators educators and local conservation officials in mind and is aimed at those countries with tapir populations It provides a brief natural history of each species and its objective is to aid in their conservation by catalyzing conservation action In addition it is hoped that the contents of the plan will stimulate further research into this fascinating group of animals Megapodes René W.
