Readers' Guide to Periodical Literature ,1916 The First Miracle Drugs John E. Lesch,2007 In the decade from 1935 1945 while the Second World War raged in Europe a new class of medicines capable of controlling bacterial infections launched a therapeutic revolution that continues today The new medicines were not penicillin and antibiotics but sulfonamides or sulfa drugs The sulfa drugs preceded penicillin by almost a decade and during World War II they carried the main therapeutic burden in both military and civilian medicine Their success stimulated a rapid expansion of research and production in the international pharmaceutical industry raised expectations of medicine and accelerated the appearance of new and powerful medicines based on research The latter development created new regulatory dilemmas and unanticipated therapeutic problems The sulfa drugs also proved extraordinarily fruitful as starting points for new drugs or classes of drugs both for bacterial infections and for a number of important non infectious diseases This book examines this breakthrough in medicine pharmacy and science in three parts Part I shows that an industrial research setting was crucial to the success of the revolution in therapeutics that emerged from medicinal chemistry Part II shows how national differences shaped the reception of the sulfa drugs in Germany France Britain and the United States The author uses press coverage of the day to explore popular perceptions of the dramatic changes taking place in medicine Part III documents the impact of the sulfa drugs on the American effort in World War II It also shows how researchers came to an understanding of how the sulfa drugs worked adding a new theoretical dimension to the science of pharmacology and at the same time providing a basis for the discovery of new medicinal drugs in the 1940s 1950s and 1960s A concluding chapter summarizes the transforming impact of the sulfa drugs on twentieth century medicine tracing the therapeutic revolution from the initial breakthrough in the 1930s to the current search for effective treatments for AIDS and the new horizons opened up by the human genome project and stem cell research **The Chemical Warfare Service** Leo P. Brophy,Wyndham D. Miles,Rexmond Canning Cochrane,2010 This volume the second in a series of three devoted to the Chemical Warfare Service CWS in World War II now the Chemical Corps covers research development procurement and distribution of chemical warfare materiel It traces the history of these activities from the World War I period when the CWS was activated to supervise the offensive and defensive aspects of gas warfare throughout the Army until the end of World War II The first volume in the series Organizing for War discusses the development of the CWS organization and mission as well as personnel management and military training The third volume entitled Chemicals in Combat will deal with the chemical warfare activities in the theaters of operations In treating research and development the present volume concentrates on CWS projects that proved of greatest significance to the armed forces during World War II It attempts to point up the problems that arose in course of research and development and to indicate

the solutions which the scientists hit upon Since research and development in the zone of the interior was closely related to research and development in the theaters of operations the volume covers activities in both areas In contrast to research and development procurement and distribution differed considerably as between the zone of the interior and the theaters of operations in the theaters these activities were closely associated with the commanders combat responsibilities The volume therefore confines itself to a review of procurement and distribution in the zone of the interior leaving narration of theater activities to the volume Chemicals in combat
