Search For Concreteness:

The Search for Concreteness Darrel E. Christensen, 1986-09 Presents a methodological basis for a philosophy of concrete actuality Also breaks new ground in its mediation between two varied traditions of speculative philosophy

Symphonic Stalinism Jiří Smrž, 2011 The Soviet system of rule that developed under Stalin featured management of the arts by political authorities and the main doctrine inspiring and justifying this activity was socialist realism The definition of socialist realism emerged through a fluid process marked by twists and turns and at times even contestation in which critics scholars and creators alike gave the doctrine practical meaning Symphonic Stalinism tells this story for music and author Jiri Smrz examines it in much greater detail than any other scholar before him In the process Smrz emphasizes the crucial role played by musicologists which was probably unique in the history of that discipline internationally Series Osteuropa Vol 4

Redescriptions Kari Palonen, 2005 With nine articles neatly combining contemporary theorizing and historical approaches to political thought and concepts this volume of Redescriptions draws attention to two topics several of the contributions share In these articles rhetoric serves both as a style of political theorizing and as a medium of conceptual change In addition the relationship of political thought and practice to religion is discussed as a subject matter as well as in the sense of a cultural heritage that is used by the political agents for contemporary purposes

Concreteness and Specificity in Clinical Psychology Luciano L'Abate, 2015-04-10 This provocative volume updates L'Abate's signature ideas focusing in particular on the concepts of concreteness and specificity as basic tenets of evaluation and therapy Noting society's growing familiarity with technology current concerns about treatment accessibility and widespread interest in wellness promotion he argues for remote writing exercises targeted to specific client issues and monitored by the clinician instead of relying on traditional talk based therapy This attention to concreteness and specificity in baseline evaluation post treatment evaluation and follow up the author asserts is central to making treatment replicable less subject to impasses or missteps and more professional with the potential of changing how therapy is conducted as well as how clinicians are trained and practice The book's framework includes rationales models empirical data and examples of prescriptive remote writing exercises Featured in the coverage Online interventions here to stay and to grow Verifiability in clinical psychology practices Present status and future perspectives for personality and family assessment Practice without theory combining theory with practice Toward a unifying framework of human relationships PIPES Programmed Interactive Practice Exercise and Prescriptions Concreteness and Specificity in Clinical Psychology will bring a new level of discussion and debate among clinical psychology practitioners and practicing psychotherapists in private practice and the public sector

Hampe,2018-02-01 What is the state of philosophy today and what might it be tomorrow With *What Philosophy Is For* Michael Hampe answers these questions by exploring the relationships among philosophy education science and narrative developing a Socratic critique of philosophical doctrines Philosophers generally develop systematic theories that lay out the basic structures of human experience in order to teach the rest of humanity how to rightly understand our place in the world This scientific approach to philosophy Hampe argues is too one sided In this magnum opus of an essay Hampe aims to rescue philosophy from its current narrow claims of doctrine and to remind us what it is really for to productively disillusion us into clearer thinking Hampe takes us through twenty five hundred years of intellectual history starting with Socrates That archetype of the philosophical teacher did not develop strict doctrines and rules but rather criticized and refuted doctrines With the Socratic method we see the power of narration at work Narrative and analytical disillusionment Hampe argues are the most helpful long term enterprises of thought the ones most worth preserving and developing again *What Philosophy Is For* is simultaneously an introduction a critique and a call to action Hampe shows how and why philosophy became what it is today and crucially shows what it could be once more if it would only turn its back on its pretensions to dogma a privileged space for reflecting on the human condition **Information Design** Alison Black,Paul Luna,Ole Lund,Sue

Smith,Terry Connolly,Young-Jun Son,2008-07-20 On February 27 and 28 of 2006 the University of Arizona held a workshop entitled *Decision Modeling and Behavior in Uncertain and Complex Environments* sponsored by the Air Force Office of Scientific Research under a Multidisciplinary University Research Initiative MURI grant The purpose of the workshop was to assemble

preeminent researchers studying problems at the interface of behavioral and cognitive science decision analysis and operations research This book is a compilation of 14 chapters based on the presentations given during the workshop These contributions are grouped into four general areas which describe in some detail the challenges in conducting novel research in this eld Part One is concerned with the need for integrating decision analysis and behavioral models Robert T Clemen discusses how the elds of behavioral search and decision analysis have diverged over time and makes a compelling case to establish new links between the disciplines He recommends leveraging lessons learned from behavioral studies within prescriptive decision analysis studies and evaluating the practical impact of those prescriptive techniques in helping decision makers achieve their objectives Jenna L Marquard and Stephen M Robinson address eleven common traps that face decision model analysts and users An understanding of these traps leads to an understanding of modeling features that either help or hurt the decision making process The authors link theory and practice by examining a set of case studies across a diverse array of model scenarios and provide a checklist of recommendations for analysts confronted by these eleven traps

Inventive Minds Robert John Weber, David N. Perkins, 1992 Is invention really 99 percent perspiration and one percent inspiration as Thomas Edison assured us *Inventive Minds* assembles a group of authors well equipped to address this question contemporary inventors of important new technologies historians of science and industry and cognitive psychologists interested in the process of creativity In telling their stories the inventors describe the origins of such remarkable devices as ultrasound the electron microscope and artificial diamonds The historians help us look into the minds of innovators like Thomas Edison Alexander Graham Bell Michael Faraday and the Wright brothers drawing on original notebooks and other sources to show how they made their key discoveries Finally cognitive psychologists explore the mental processes that figure in creative thinking Contributing to the authors insight is their special focus on the front end of invention where ideas come from and how they are transformed into physical prototypes They answer three questions How does invention happen How does invention contrast with other commonly creative pursuits such as scientific inquiry musical composition or painting And how might invention best happen that is what kinds of settings conditions and strategies appear to foster inventive activity The book yields a wealth of information that will make absorbing reading for cognitive and social psychologists social historians and many working scientists and general readers who are interested in the psychology of personality and the roots of ingenuity

WEBKDD 2001 - Mining Web Log Data Across All Customers Touch Points

Ron Kohavi, Brij M. Masand, Myra Spiliopoulou, Jaideep Srivastava, 2003-08-02 Workshop Theme The ease and speed with which business transactions can be carried out over the Web has been a key driving force in the rapid growth of electronic commerce In addition customer interactions including personalized content e mail c paigns and online feedback provide new channels of communication that were not previously available or were very ine cient The Web presents a key driving force in the rapid growth of electronic c merce and a new channel for content providers Knowledge about the customer is fundamental for

the establishment of viable e commerce solutions Rich web logs provide companies with data about their customers and prospective customers allowing micro segmentation and personalized interactions Customer acquisition costs in the hundreds of dollars per customer are common justifying heavy emphasis on correct targeting Once customers are acquired customer retention becomes the target Retention through customer satisfaction and loyalty can be greatly improved by acquiring and exploiting knowledge about these customers and their needs Although weblogs are the source for valuable knowledge patterns one should keep in mind that the Web is only one of the interaction channels between a company and its customers Data obtained from conventional channels provide invaluable knowledge on existing market segments while mobile communication adds further customer groups In response companies are beginning to integrate multiple sources of data including web wireless call centers and brick a mortar store data into a single data warehouse that provides a multifaceted view of their customers their preferences interests and expectations

Metaphors in Psychotherapy Kevin William Grant, 2020-01-28 Kevin William Grant examines the cognitive processes that produce metaphors in psychotherapy The I Ching Task is the measure of metaphor production applied in this research inquiry Two cognitive processes are hypothesized to be necessary for the production of a metaphor The first hypothesized cognitive process is sensory imaginal processing where attention is concentrated into one's internal experiencing and sensory awareness to form sensory impressions or sensory images The second type of processing is called integration synthesis processing and this is hypothesized to work in parallel with sensory imaginal processing Integration synthesis processing functions to combine conflicting or contradictory elements into an integrated whole Metaphor is the meeting point of these processes and all of them are important in the production of metaphor in psychotherapy Revised and updated from the first edition published in 1991 Could there have been Nothing? Geraldine Coggins, 2010-11-24 The first book length study of metaphysical nihilism an analytical treatment of one of the most intriguing and fundamental questions in contemporary analytic metaphysics Could there have been nothing at all No physical universe no people no living beings no planets no atoms no matter no energy nothing
