Search of the Polish Tradition Jaakko Hintikka,Tadeusz Czarnecki,K. Kijania-Placek,Tomasz Placek,Artur Rojczak,2013-06-29 On the occasion of his sixtieth birthday we dedicate this volume to Jan Wołeriski's our teacher our colleague our friend Both of us are particularly indebted to Jan not only with regards to professional matters but some private ones as well Hence we hope that he forgives us an occasional lapse into fondness and affection That said may the list of his personal merits remain shrouded in mystery rather than unveil them we open here by appraising Jan's presence from a broader perspective To note that Jan was not always a part of our lives would not evoke surprise However to imagine the

Institute of Philosophy on Grodzka Street or Krakow philosophy without him in it would be a harder task at least for us. Nonetheless we do remember the days when he was commuting to Krakow as a guest lecturer. Is there anything about those days which particularly comes to mind? To shed light on the story which follows one must begin by stating that the early 1980s when we were studying philosophy was not a bright period. The great masters of Krakow philosophy Ingarden, Mehlberg, Zawirski or Damska were either dead or for political reasons kept silent. The years following Martial Law 1981-1983 were intellectually very blighted and barren. In the midst of all this we were attending Jan's course on general methodology.

Urban Inequality Alice O'Connor, Chris Tilly, Lawrence Bobo, 2001-03-08. Despite today's booming economy, secure work and upward mobility remain out of reach for many central city residents. *Urban Inequality* presents an authoritative new look at the racial and economic divisions that continue to beset our nation's cities. Drawing upon a landmark survey of employers and households in four U.S. metropolises—Atlanta, Boston, Detroit, and Los Angeles—the study links both sides of the labor market, inquiring into the job requirements and hiring procedures of employers as well as the skills, housing situation, and job search strategies of workers. Using this wealth of evidence, the authors discuss the merits of rival explanations of urban inequality: Do racial minorities lack the skills and education demanded by employers in today's global economy? Have the jobs best matched to the skills of inner-city workers moved to outlying suburbs? Or is inequality the result of racial discrimination in hiring, pay, and housing? Each of these explanations may provide part of the story, and the authors shed new light on the links between labor market disadvantage, residential segregation, and exclusionary racial attitudes. In each of the four cities, old industries have declined and new commercial centers have sprung up outside the traditional city limits, while new immigrant groups have entered all levels of the labor market. Despite these transformations, longstanding hostilities and lines of segregation between racial and ethnic communities are still apparent in each city. This book reveals how the disadvantaged position of many minority workers is compounded by racial antipathies and stereotypes that count against them in their search for housing and jobs. Until now there has been little agreement on the sources of urban disadvantage and no convincing way of adjudicating between rival theories. *Urban Inequality* aims to advance our understanding of the causes of urban inequality as a first step toward ensuring that the nation's cities can prosper in the future without leaving their minority residents further behind. A Volume in the Multi-City Study of Urban Inequality.
