The Mapmaker's Wife Robert Whitaker, 2008-11-05 In the early years of the 18th century a band of French scientists set off on a daring decade long expedition to South America in a race to measure the precise shape of the earth Like Lewis and Clark's exploration of the American West their incredible mission revealed the mysteries of a little known continent to a world hungry for discovery Scaling 16 000foot mountains in the Peruvian Andes and braving jaguars pumas insects and vampire bats in the jungle the scientists barely completed their mission One was murdered another perished from fever and a third Jean Godin nearly died of heartbreak At the expedition's end Jean and his Peruvian wife Isabel Gramesen became stranded at opposite ends of the Amazon victims of a tangled web of international politics Isabel's solo journey to reunite with Jean after their calamitous twenty year separation was so dramatic that it left all of 18th century Europe spellbound Her survival unprecedented in the annals of Amazon exploration was a testament to human endurance female resourcefulness and the power of devotion Drawing on the original writings of the French mapmakers as well as his own experience retracing Isabel's journey acclaimed writer Robert Whitaker weaves a riveting tale rich in adventure intrigue and scientific achievement Never before told The Mapmaker's Wife is an epic love story that unfolds against the backdrop of the greatest expedition the world has ever known

Measuring the New World Neil Safier, 2024-05-31 Prior to 1735 South America was terra incognita to many Europeans But that year the Paris Academy of Sciences sent a mission to the Spanish American province of Quito in present day Ecuador to study the curvature of the earth at the Equator Equipped with quadrants and telescopes the mission's participants referred to the transfer of scientific knowledge from Europe to the Andes as a sacred fire passing mysteriously through European astronomical instruments to observers in South America By taking an innovative interdisciplinary look at the traces of this expedition Measuring the New World examines the transatlantic flow of knowledge from West to East Through ephemeral monuments and geographical maps this book explores how the social and cultural worlds of South America contributed to the production of European scientific knowledge during the Enlightenment Neil Safier uses the notebooks of traveling philosophers as well as specimens from the expedition to place this particular scientific endeavor in the larger context of early modern print culture and the emerging intellectual category of scientist as author
