Long Twentieth Century:

The Long Twentieth Century, 1999 *The Long Twentieth Century* Giovanni Arrighi, 2002 Long Twentieth Century Giovanni Arrighi, 1994 **The Long Twentieth Century** Giovanni Arrighi, Fernand Braudel Center for the Study of Economies, Historical Systems, and Civilizations, 1991 *Insurgent Aesthetics* Ronak K. Kapadia, 2019-10-25 In *Insurgent Aesthetics* Ronak K. Kapadia theorizes the world making power of contemporary art responses to US militarism in the Greater Middle East. He traces how new forms of remote killing, torture, confinement, and surveillance have created a distinctive post 9/11 infrastructure of racialized state violence. Linking these new forms of violence to the history of American imperialism and conquest, Kapadia shows how Arab Muslim and South Asian diasporic multimedia artists force a reckoning with the US war on terror's violent destruction and its impacts on immigrant and refugee communities. Drawing on an eclectic range of visual installation and performance works, Kapadia reveals queer feminist decolonial critiques of the US security state that visualize subjugated histories of US militarism and make palpable what he terms the sensorial life of empire. In this way, these artists forge new aesthetic and social alliances that sustain critical opposition to the global war machine and create alternative ways of knowing and feeling beyond the forever war.

Sport and the Transformation of Modern Europe Alan Tomlinson, Christopher Young, Richard Holt, 2013-06-17 This book focuses on the emergence and expansion of media markets, high performance sport's transformation by and effects upon Cold War dynamics and interrelations, and the implications of the Treaty of Rome for an emerging European identity in sport, as in other areas. It traces the connections between the forces of ideological division, economic growth, leisure consumption, European integration, and the development of European sport, and examines the role of sport in the changing relationship between Europe and the US. Illuminating a key moment in global cultural history, this book is important reading for any student or scholar working in international studies, modern history, or sport.

Museums and Wealth Nizan Shaked, 2022-01-13 Choice Outstanding Academic Title 2023 A critical analysis of contemporary art collections and the value form, this book shows why the nonprofit system is unfit to administer our common collections and offers solutions for diversity reform and redistributive restructuring. In the United States, institutions administered by the nonprofit system have an ambiguous status as they are neither entirely private nor fully public. Among nonprofits, the museum is unique as it is the only institution where trustees tend to collect the same objects they hold in public trust on behalf of the nation, if not humanity. The public serves as alibi for establishing the symbolic value of art, which sustains its monetary value and its markets. This structure allows for wealthy individuals at the helm to gain financial benefits from and ideological control over what is at its core, purpose: a public system. The dramatic growth of the art market and the development of financial tools based on art collateral loans exacerbate the contradiction between the needs of museum leadership versus that of the public. Indeed, a history of private support in the US is a history of racist discrimination, and the common collections reflect this fact. A history of how private collections were turned public gives context. Since the late

Renaissance private collections legitimized the prince's right to rule and later with the great revolutions display consolidated national identity But the rise of the American museum reversed this and re privatized the public collection A materialist description of the museum as a model institution of the liberal nation state reveals constellations of imperialist social relations

Superpower Britain Ashley Jackson, Andrew Stewart, 2025-01-13 History tells us that the Second World War broke Britain as a great power diminishing its military strength ruining its economy and precipitating a striking wave of decolonization Nationalists and new superpowers dominated the post war landscape and the country was on the slide But no one knew this in 1945 the leading politicians the top civil servants and the most knowledgeable experts all expected the British Empire to remain intact long into the future There was no hint of imminent collapse and the governing elite and key opinion shapers weren't considering decline and decolonization evincing instead a new zeal for imperial renovation and a belief that an empire which had just survived another global conflict was vital for the peace and security of all humankind They were even looking to expansion securing the spoils of victory as they had done at the end of the First World War Fully expecting to continue leading a great empire as well as a bloc of European nations recovering from war the British had their own vision of the new world order Furthermore and astonishingly given what actually happened British leaders were convinced that parity could be gained with the Americans and the Soviets Britain was to remain a superpower in its own right What actually happened differed radically from these expectations The question is how do we account for the difference between what it was thought would happen and the actual course of events Superpower Britain is the first book to focus in depth on this fascinating counterpoint and to fully integrate the history of Britain and the effects of the Second World War with the history of the British Empire It explains what the British planned to do in the post war world why they thought their plans for regeneration and the future world order were viable and what the war had actually done to British world power and its imperial foundations

Musicophilia in Mumbai Tejaswini Niranjana, 2020-02-28 In Musicophilia in Mumbai Tejaswini Niranjana traces the place of Hindustani classical music in Mumbai throughout the long twentieth century as the city moved from being a seat of British colonial power to a vibrant postcolonial metropolis Drawing on historical archives newspapers oral histories and interviews with musicians critics students and instrument makers as well as her own personal experiences as a student of Hindustani classical music Niranjana shows how the widespread love of music throughout the city created a culture of collective listening that brought together people of diverse social and linguistic backgrounds This culture produced modern subjects Niranjana calls musicophiliacs whose subjectivity was grounded in a social rather than an individualistic context By attending concerts learning instruments and performing at home and in various urban environments musicophiliacs embodied forms of modernity that were distinct from those found in the West In tracing the relationship between musical practices and the formation of the social subject Niranjana opens up new ways to think about urbanity subjectivity culture and multiple modernities

considers engage in more ambivalent ways with the problem of human agency and the limits of individual perception and they are attuned to the melancholic and damaging aspects of environmental existence in a time of generalized crisis Her method which emphasizes the material histories and uneven effects of capitalist development models a unique critical approach to understanding the causes and conditions of ongoing biospheric catastrophe Long-term Ecological Change in the Northern Gulf of Alaska R.B. transforming the world at an accelerated pace Integration of the world continues widening and intensifying international linkages in economic political and social relations Liberalization of trade and finance lubricated by revolutionary changes in information technology has resulted in significant economic growth at the global level On the other hand the process of globalization is changing the nature of production relations threatening the traditional roles of the nation state and carrying with it far reaching implications for sustainable growth development and the environment Although both developed and developing countries are actively participating in this saga of globalization nearly ninety countries as the United Nations Human Development Report 1996 indicates are worse off economically than they were ten years ago leading to global polarization between haves and have nots The report further indicates that the gap between the per capita incomes of the industrialized world and the developing countries far from narrowing has more than tripled during the last thirty years Further a majority of the countries benefitting from this globalization drive have seen a rise in inequality and poverty This failure of market driven globalization to reward the benefits equitably led the United Nations to proclaim 1996 as the International Year for the Eradication of Poverty IYEP and the decade of 1997 2006 as the international decade for the eradication of poverty and to promote people centered sustainable development
