of healthy adulthood between the ages of fifty and twenty five that has never existed before created by our nation's advancing longevity *The Longevity Factor* Richard A. Passwater,1993 **Longevity Factor** Lydia Bronte,1994-06 A fascinating thought provoking look at a striking new development in America the emergence of a second middle age due to this century's great increase in longevity and its effects on our lives and our careers Contradicts what most people believe is inevitable about aging **Anti-Aging Medicine** Hidekazu Yamada,Yuji Naito,2025-02-05 This textbook considers aging a disease and summarizes the leading edge research and fact on anti aging medicine and the aging mechanism It provides the basics and biology of aging science followed by presenting clinical studies such as exercise nutrition mental health brain sleep and treatment interventions The book also discusses aging control and considers behavioral environmental and societal implications for healthy aging The field of aging science is interdisciplinary and there are much more uncertainties thus it is crucial to summarize what is currently known to set a foundation for future research The International Classification of Diseases by the World Health Organization WHO has given the aging related disease a subcode of XT9T This trend advanced research of aging related sicknesses and the concept that infirmities associated with old age can be controlled such as cancer dementia and cardiovascular diseases Basic research has progressed and clinical applications have become available resulting in significant social changes As increased life expectancy is happening over the globe we are facing unprecedented challenges and anti aging medicine is a key to treating population growth environmental problems etc as problems for the entire planet Anti Aging Medicine Basics and Clinical Practice is an English translation of the publication by the Japanese Society of Anti Aging Medicine It is an insightful source for healthcare professionals and scholars in anti aging and geriatrics It will attract pharmaceutical Information Technology and Artificial Intelligence industries associated with aging responsive markets The English translation of this book originally in Japanese was facilitated by artificial intelligence A subsequent human revision of the content was done by the editors and authors **The Frailty Model** Luc Duchateau,Paul Janssen,2007-10-23 Clustered survival data are encountered in many scientific disciplines including human and veterinary medicine biology epidemiology public health and demography Frailty models provide a powerful tool to analyse clustered survival data In contrast to the large number of research publications on frailty models relatively few statistical software packages contain frailty models It is demanding for statistical practitioners and graduate students to grasp a good knowledge on frailty models from the existing literature This book provides an in depth discussion and explanation of the basics of frailty model methodology for such readers The discussion includes parametric and semiparametric frailty models and accelerated failure time models Common techniques to fit frailty models include the EM algorithm penalised likelihood techniques Laplacian integration and Bayesian techniques More advanced frailty models for hierarchical data are also included Real life examples are used to demonstrate how particular frailty models can be fitted and how the results should be interpreted The programs to fit all the worked out examples in the book are available from the Springer website with most of the

programs developed in the freeware packages R and Winbugs The book starts with a brief overview of some basic concepts in classical survival analysis collecting what is needed for the reading on the more complex frailty models *Nutrition, Food and Diet in Ageing and Longevity* Suresh I. S. Rattan, Gurcharan Kaur, 2021-10-03 This edited volume is a compilation of 30 articles discussing what constitutes food for health and longevity The aim is to provide up to date information insights and future tendencies in the ongoing scientific research about nutritional components food habits and dietary patterns in different cultures The health sustaining and health promoting effects of food are certainly founded in its overall composition of macronutrients and micronutrients However the consumption of these nutrients is normally in the form of raw or prepared food from the animal and plant sources The book is divided into four parts and a conclusion and successfully convenes the well established information and knowledge along with the personal views of a diversified group of researchers and academicians on the multifaceted aspects of nutrition food and diet The first part reviews the scientific information about proteins carbohydrates fats and oils micronutrients pro and pre biotics and hormetins along with a discussion of the evolutionary principles and constraints about what is optimal food if any The second part discusses various kinds of foods and food supplements with respect to their claimed benefits for general health and prevention of some diseases The third part brings in the cultural aspects such as what are the principles of healthy eating according to the traditional Chinese and Indian systems what is the importance of mealing times and daily rhythms and how different cultures have developed different folk wisdoms for eating for health longevity and immortality In the part four various approaches which are either already in practice or are still in the testing and research phases are discussed and evaluated critically for example intermittent fasting and calorie restriction food based short peptides senolytics Ayurvedic compounds optimal food for old people and food for the prevention of obesity and other metabolic disorders The overreaching aim of this book is to inform inspire and encourage students researchers educators and medical health professionals thinking about food and food habits in a holistic context of our habits cultures and patterns Food cannot be reduced to a pill of nutritional components Eating food is a complex human behavior culturally evolved over thousands of years Perhaps the old adage we are what we eat needs to be modified to we eat what we are **The Genetics of Aging** Edward Schneider, 2013-11-11 The Genetics of Aging is divided into several sections in an attempt to provide a logical progression from the level of the genome to the realm of human genetics The relationship between the genetic material and aging will be thoroughly explored in the initial chapters These chapters discuss in depth the various theories that have been proposed for the mechanisms of aging at the molecular level and present data which either support or contradict these hypotheses Subsequent chapters will deal with the genetics of aging in organisms ranging from paramecium to mammals The largest section of this volume will be devoted to several important areas in human genetics human genetic disorders which feature premature aging the effect of human parental aging on the production of genetically abnormal offspring the genetics of human longevity and a review of studies on aging

human twins Over the last few decades genetic technology has provided enormous insight into a number of disciplines Therefore in the last few chapters several genetic approaches to the study of aging are discussed somatic cell genetics immunogenetics and behavioral genetics As the goal of this volume is to present a comprehensive examination of the genetics of aging most chapters are oriented toward general review of their respective areas It is my hope that this volume will encourage clinical biological and behavioral investigators to turn their attention to the genetic aspects of aging as well as to employ genetic technology to obtain further insight into aging processes *Diet and Cognitive Decline* Francesco

Panza,Vincent Solfrizzi,Antonio Capurso,2004 The progressive ageing of the general population and the consequent increase of the number of old people has made the typical medical problems of aged people more frequently observed and particularly the problems related to the ageing brain This new book is an updated overview of relevant aspects of cognitive decline associated with ageing Within the wide landscape of brain ageing the authors reconsider the role of the main predisposing factors and risk factors on the development of various form of mental decline from mild cognitive impairment to dementia The strength of this book is the large updated overview of the most recent data of scientific literature regarding the role of genetic metabolic and environmental factors on the predisposition and onset of cognitive decline Particular attention is paid to the dietary micro and macronutrients and to their possible role in the pathogenesis of the various form of dementigen disorders **Cytokines** Victor R.
