animals and produce spectacular experiences for their human visitors Zoos name register track and allocate their animals in global databases Zoos both abide by and create laws and industry standards that govern their captive animals Finally zoos intensely govern the reproduction of captive animals carefully calculating the life and death of these animals deciding which of them will be sustained and which will expire Zooland takes readers behind the exhibits into the world of zoo animals and their caretakers And in so doing it turns its gaze back on us to make surprising interconnections between our understandings of the human and the nonhuman

Coe, 2018-10-30 The issue of zoos is not about treatment but use not about reform but abolition Zoos often pay lip service to education enrichment and conservation but the cruelty is systemic and follows from the idea of animals as commodities As long as they are property animals will continue to be treated as things with no rights who can be caged bred abused or killed for a zoo's profit and the public's entertainment In *Zooicide* Sue Coe applies her bold and breathtaking artistic style to confront the institution of zoos exposing them as a form of capitalist cruelty that is enmeshed with the violence of war colonialism and ecological destruction Zoo Talk Patricia G. Patrick, Sue Dale Tunnicliffe, 2012-09-28 Founded on the

premise that zoos are bilingual that the zoo in the shape of its staff and exhibits and its visitors speak distinct languages this enlightening analysis of the informal learning that occurs in zoos examines the speech of exhibits and staff as well as the discourse of visitors beginning in the earliest years Using real life conversations among visitors as a basis for discussion the authors interrogate children's responses to the exhibits and by doing so develop an informal learning model and a zoo knowledge model that prompts suggestions for activities that classroom educators can use before during and after a zoo visit Their analysis of the visitor voice informs creative suggestions for how to enhance the educational experiences of young patrons By assessing visitors' entry knowledge and their interpretations of the exhibits the authors establish a baseline for zoos that helps them to refine their communication with visitors for example in expanding knowledge of issues concerning biodiversity and biological conservation The book includes practical advice for zoo and classroom educators about positive ways to prepare for zoo visits engaging activities during visits and follow up work that maximizes the pedagogical benefits It also reflects on the interplay between the developing role of zoos as facilitators of learning and the ways in which zoos help visitors assimilate the knowledge on offer In addition to being essential reading for educators in zoos and in the classroom this volume is full of insights with much broader contextual relevance for getting the most out of museum visits and field trips in general **Zoo Studies** Tracy McDonald, Daniel Vandermommers, 2019-06-19 Do both the zoo and the mental

hospital induce psychosis as humans are treated as animals and animals are treated as humans How have we looked at animals in the past and how do we look at them today How have zoos presented themselves and their purpose over time In response to the emergence of environmental and animal studies anthropologists sociologists philosophers theorists literature scholars and historians around the world have begun to explore the significance of zoological parks past and present Zoo

Studies considers the modern zoo from a range of approaches and disciplines united in a desire to blur the boundaries between human and nonhuman animals The volume begins with an account of the first modern mental hospital La Salpêtrière established in 1656 and the first panoptical zoo the menagerie at Versailles created in 1662 by the same royal architect the final chapter presents a choreographic performance that imagines the Toronto Zoo as a place where the human body can be inspired by animal bodies From beginning to end through interdisciplinary collaboration this volume decentres the human subject and offers alternative ways of thinking about zoos and their inhabitants This collection immerses readers in the lives of animals and their experiences of captivity and asks us to reflect on our own assumptions about both humans and animals An original and groundbreaking work Zoo Studies will change the way readers see nonhuman animals and themselves
