Looking for the Aliens Peter A. Hough, Jenny Randles, 1997 **The Alien Abduction Phenomenon** Paul Meehan, 2025-06-13 News reports books articles and films about alien abductions have long captured the public imagination This book traces the evolution of the phenomenon from the late 1940s flying saucer era and the contactee and occupant sightings of the 1950s to the widespread abduction stories of the 1960s and beyond It examines how broader social cultural and scientific contexts have shaped these accounts and offers a critical analysis of their interpretations over time Also discussed are the key researchers who have sought to understand the nature and intentions of alleged extraterrestrial beings or ufonauts while addressing the skepticism about the subject The efforts of the scientific community to investigate unidentified aerial phenomenon UAP and abductions are assessed acknowledging both the challenges and limitations of such inquiries Firsthand encounters with non human entities are examined attempting to uncover the forces behind these sightings and arguing that there could be unforeseen consequences of ignoring the phenomena *They Would Be Gods* Anthony K. Forwood, 2011 *Centering the Margins of Anthropology's History* Regna Darnell, Frederic W. Gleach, 2021-05 The series *Histories of Anthropology Annual* presents diverse perspectives on the discipline's history within a global context with a goal of increasing the awareness and use of historical approaches in teaching learning and conducting anthropology The series includes critical comparative analytical and narrative studies involving all aspects and subfields of anthropology Volume 14 *Centering the Margins of Anthropology's History* focuses on the conscious recognition of margins and suggests it is time to bring the margins to the center both in terms of a changing theoretical openness and a supporting body of scholarship if not to problematize the very dichotomy of center and margins itself The essays explore two major themes of anthropology's margins First anthropologists and historians have long sought out marginalized and forgotten ancestors arguing for their present day relevance and offering explanations for the lack of attention to their contributions to theory analysis methods and findings Second anthropologists and their historians have explored a range of genres to present their results in provocative and open ended formats This volume closes with an experimental essay that offers a dynamic multifaceted perspective that captures one of the dominant if sometimes marginalized voices in history of anthropology Steven O Murray's career developed at the institutional margins of several academic disciplines and activist discourses but his distinctive voice has been and will remain at the center of our history After Contact Albert A. Harrison, 1997-08-21 Examines in detail the psychological sociological political and cultural dimensions of the search for extraterrestrial intelligence **UFOs** Robert C. Trundle, 2000 **The Encyclopedia of Alien Encounters** Alan Baker, 1999 Containing over 500 entries this historical reference work provides an A Z of alien and non human encounters It details the events encounters personalities and theories that have created this field of human experience and inquiry *The Scientific Imagination* Arnon Levy, Peter Godfrey-Smith, 2020 This book looks at the role of the imagination in science from both

Science, Culture and the Search for Life on Other Worlds John W. Traphagan,2016-08-26 This book explores humanity s thoughts and ideas about extraterrestrial life paying close attention to the ways science and culture interact with one another to create a context of imagination and discovery related to life on other worlds Despite the recent explosion in our knowledge of other planets and the seeming era of discovery in which we live to date we have found no concrete evidence that we are not alone Our thinking about life on other worlds has been and remains the product of a combination of scientific investigation and human imagination shaped by cultural values particularly values of exploration and discovery connected to American society The rapid growth in our awareness of other worlds makes this a crucial moment to think about and assess the influence of cultural values on the scientific search for extraterrestrial life Here the author considers the junction of science and culture with a focus on two main themes 1 the underlying assumptions many of which are tacitly based upon cultural values common in American society

that have shaped the ways researchers in astrobiology and SETI have conceptualized the nature of their endeavor and represented ideas about the potential influence contact might have on human civilization and 2 the empirical evidence we can access as a way of thinking about the social impact that contact with alien intelligence might have for humanity
