The Rich Get Richer and the Poor Get Prison Jeffrey Reiman, Paul Leighton, 2016-11-10 For nearly 40 years this classic text has taken the issue of economic inequality seriously and asked Why are our prisons filled with the poor Why aren't the tools of the criminal justice system being used to protect Americans from predatory business practices and to punish well off people who cause widespread harm The Rich Get Richer shows readers that much that goes on in the criminal justice system violates citizens sense of basic fairness It presents extensive evidence from mainstream data that the criminal justice system does not function in the way it says it does nor in the way that readers believe it should The authors develop a theoretical perspective from which readers might understand these failures and evaluate them morally and they do it in a short and relatively inexpensive text written in plain language New to this edition Presents recent data comparing the harms due to criminal activity with the harms of dangerous but not criminal corporate actions Presents new data on recent crime rate declines which are paired with data on how public safety is not prioritized by the U S government Updates statistics on crime victimization wealth and discrimination plus coverage of the increasing role of criminal justice fines and fees in generating revenue for government Updates on the costs to society of white collar crime Updates and deepened analysis of why fundamental reforms are not undertaken Streamlined and condensed prose for greater clarity

Naval Diplomacy in 21st Century Kevin Rowlands, 2018-08-31 This book offers a detailed investigation of naval diplomacy past and present and challenges the widely accepted Anglo American school of sea power thought Despite the acknowledgement of the importance of the threat or use of force in the pursuit of policy since the dawn of strategic thought the utility of seapower in operations other than war is poorly understood and articulated Theorists have invariably viewed seapower in peacetime through the lens of hard power effects such as coercion and deterrence Commentaries on engagement interoperability and the forging of friendships are largely conspicuous by their absence This book considers how all these strands of international politics can be better understood for use in the 21st century The book explains and defines naval diplomacy with existing theoretical frameworks being critically analysed It reviews over 500 incidents from the post Cold War era drawing on this empirical evidence to determine that naval diplomacy remains a potent means of 21st century statecraft It finds that existing understanding of naval diplomacy is insufficient and offers an alternative model drawing on basic communication and stakeholder theories The implications of the book relate directly to national security naval deployments could be more effectively targeted foreign activity at sea could be better understood and if necessary countered finally the ability of non state actors to support national interests from the sea could potentially be better harnessed This book will be of much

interest to students of naval power maritime security strategic studies and International Relations **Chinese Cities in the 21st Century** Youqin Huang, 2020-04-03 This book is an interdisciplinary examination of China's new urban development model and the challenges Chinese cities face in the 21st century. Trajectory of the 21st Century Lawrence J. Terlizzese, 2009-01-10 Trajectory of the Twenty first Century explores what many prophets of the twentieth century such as Oswald Spengler Paul Tillich Aldous Huxley Jacques Ellul and others have predicted would transpire in the current century Their vision included an out of control technological system and a return to religious sentiment that will ultimately undermine the system to which it is reacting This book aims to accurately present their positions and draw certain logical conclusions from them that pertain to the course of history in our time The book's theme argues that modernity is a secularized version of millennial Christianity which reaches its fullest development in the twenty first century and will regress into what Russian philosopher Nicholas Berdyaev called the new Middle Ages or a new religious period This will mean the twilight of modern technological society as its values of rationalism give way to a post-rationalist society Ironically decline will come through further technological advance Omnicide threatens through religious world war driven by transcendent values and modern weaponry Jihadist thinking and posthumanist technology both establish the omnicidal mentality New technologies such as genetic engineering and artificial intelligence created under millennial inspiration to reach for immortality could potentially bring an end to the human species either through a slow steady obsolescence or through environmental catastrophe The titanic forces of technological progress and regress are on a direct collision course in the twenty first century
