by military and non military action The volume addresses the issues raised in a comprehensive manner It comprises country reports with analyses of the developments in a number of selected countries Based on these country reports the volume traces new developments in the definition of international terrorism deals with the issue of human rights protection under new anti terrorist legislation and examines the recent developments towards international military action against terrorism

Against Sortition? Geoffrey Grandjean,2024-05-07 Sortition is widely used in our political systems to constitute citizen panels It is now possible to study the limits of this method of selecting our political representatives This book presents the institutionalization of sortition while questioning its political consequences in terms of representation and deliberation Several examples are used such as the Citizens Climate Convention in France and the Conference on the Future of Europe In the end the book helps to identify the consequences of using sortition with regard to the principles of equality and inclusion Above all it offers readers the possibility of continuing to reflect on this method of random selection while promoting the implementation of greater equality between citizens

The Politics of Democratic Representation Benjamin Boudou,Marcus Carlsen Häggrot,2025-05-16 The book discusses boundaries of electoral inclusion and mechanisms of electoral representation in contemporary democracies While the ancient Athenians took the idea of rule by the people to require direct popular participation in public decision making and the appointment of officials by lottery mechanisms democracy is nowadays interpreted electorally We partake in government mostly by electing the legislative and sometimes executive officials who in turn make the substantive decisions Yet who we is and how electoral representation should function remains hotly contested Controversies abound about the proper configuration of the demos the body of persons who are enfranchised the ways it is to exercise electoral choice and agency This book takes up several carefully selected questions from these theoretical and political debates Looking at the disenfranchisement of children cognitively disabled persons and refugees and discussing the forms of representation that might be afforded to external voters future generations and non citizens the contributions develop innovative arguments applying the basic principles of electoral democracy to the complexities of specific real world cases Doing so the contributions offer timely yet unorthodox perspectives on the theory and practice of electoral democracy This book was originally published as a special issue of Critical Review of International Social and Political Philosophy

The Right to Life in Armed Conflict Ian Park,Ian David Park,2018 What place does the right to life have in armed conflicts And does it lock down military objectives In the first sustained coverage of the area Ian Park examines conflicts in Iraq Afghanistan Libya and Syria to explicate how far governments should be entitled to derogations from human rights whilst engaging in combat operations

Molecular Genetic Medicine Theodore Friedmann,2013-10-22 Molecular Genetic Medicine Volume I provides an overview of the progress in several of the most important areas of modern molecular genetics and medicine The aim is to present a technical and historical picture of the concept that it is through a thorough understanding of genetics of all kinds of human diseases even infectious diseases that

effective treatments will finally come The book opens with a discussion of the origins and development of the Human Genome Project This is followed by separate chapters on the development of immune deficient mice as models for human hematopoietic disease the application of genetic techniques for testing identity and relatedness of persons and advances in recombinant DNA technology and their applications in drug discovery The final chapter discusses the impact of molecular biology and molecular evolution on debates about the origin of humans and about the origins both of the characteristics that they share with other animals and of those that make humans unique

Young People's Human Rights and the Politics of Voting Age Sonja C. Grover,2010-10-05 Young People s Human Rights and The Politics of Voting Age explores the broader societal implications of voting age eligibility requirements and the legislative bar against youth voting in North America and in Commonwealth countries where youth is defined as persons 16 and over but under age 18 The issue is raised as to whether the denial of the youth vote undermines democratic principles and values and ultimately the human dignity of youth This is the first book to address the topic of the youth vote in depth as a fundamental human rights concern relating to the entitlement in a democracy to societal participation and inclusion in influencing policy and law which profoundly affects one s life Also examined are international perspectives on the issue of voting age eligibility The book would be extremely valuable for instructional purposes as one of the primary texts in undergraduate or graduate courses on children s human rights political psychology political science sociology of law or society and as a supplementary text for courses on human rights or constitutional law and would be of interest also to members of the general public concerned with children s human rights issues

Subjectivity, Citizenship and Belonging in Law Anne Griffiths,Sanna Mustasaari,Anna Mäki-Petäjä-Leinonen,2016-10-04 This collection of articles critically examines legal subjectivity and ideas of citizenship inherent in legal thought The chapters offer a novel perspective on current debates in this area by exploring the connections between public and political issues as they intersect with more intimate sets of relations and private identities Covering issues as diverse as autonomy vulnerability and care family and work immigration control the institution of speech and the electorate and the right to vote they provide a broader canvas upon which to comprehend more complex notions of citizenship personhood identity and belonging in law in their various ramifications

Spain After Franco Richard Gunther,Giacomo Sani,Goldie Shabad,2023-11-15 Punishment and Citizenship Milena Tripkovic,2019 Criminal disenfranchisement the practice of restricting electoral rights following criminal conviction is the only surviving electoral restriction of adult mentally competent citizens in contemporary democracies Despite the strong devotion to the principle of universal suffrage criminal offenders are still routinely deprived of active and passive franchise while the justifications for such limitations remain elusive and incoherent In Punishment and Citizenship Milena Tripkovic develops an empirical and normative account of criminal disenfranchisement Starting from historical precedents of such restrictions and examining the current policies of a number of European countries Tripkovic argues that while criminal disenfranchisement is considered a form of punishment it should instead be viewed as a citizenship sanction imposed when a citizen fails to perform their role as a member of a political community In order to determine the justifications of disenfranchisement Tripkovic explores various citizenship ideals and examines whether criminal offenders comply with the expectations that are posed before them After developing a theoretical framework of citizenship duties Tripkovic concludes that very few criminal offenders fail to satisfy fundamental citizenship conditions and exhaustive voting restrictions cannot ultimately be justified A comprehensive assessment of criminal disenfranchisement Punishment and Citizenship offers concrete policy suggestions to determine the limited circumstances under which electoral rights could justifiably be withheld from criminal offenders

The Duty to Vote Julia Maskivker,2019-10-01 What do we owe those in our communities What do we owe strangers In a sense those who vie for political office locally and nationally do so at least in part from duty and obligation to their fellow citizens to many they do not know and may never meet In a democratic society those who wish to participate in politics have the unbridled freedom to do exactly that whether as leaders or those who campaign for politicians or as people who simply struggle to have their voice heard in everything from town hall meetings to protests But by the same logic we also have the freedom not to participate the freedom not to care to be heard at all Not so says Julia Maskivker such logic collapses when applied to the act of voting Not only should we vote if we can we must vote Even when confronted with two unappealing candidates or with ballot propositions whose effects we will barely feel or with the fact that our single vote might never tip an election we must vote We have a duty of conscience to vote with care when doing so comes at so small a cost Maskivker a political theorist and philosopher argues that those fortunate to live in democratic societies with freely elected leaders all share simply a moral obligation to vote The book s argument adds a fresh and uncompromising perspective to voting ethics literature which is dominated by views that reject the morality and rationality of voting Maskivker s line of reasoning contends that the duty to vote is a duty of common pursuit which helps society to achieve good

governance She compares voting to Samaritan justice showing that the same duty of assistance that would compel us to help a stranger in need also obligates us to vote to save our fellow citizens from injustice at the hands of bad or even evil leaders The book further explores issues of voter incompetence and how citizens ignorance can be partly overcome through political reform Although uninformed voting may lead to bad governance voting judiciously can be an effective path to justice In a time of polarization and political turmoil The Duty to Vote offers a stirring reminder that voting is fundamentally a collective endeavor to protect our communities and that we all must vote in order to preserve the free societies within which we live

The Privatized State Chiara Cordelli, 2020-11-24 Why government outsourcing of public powers is making us less free Many governmental functions today from the management of prisons and welfare offices to warfare and financial regulation are outsourced to private entities Education and health care are funded in part through private philanthropy rather than taxation Can a privatized government rule legitimately The Privatized State argues that it cannot In this boldly provocative book Chiara Cordelli argues that privatization constitutes a regression to a precivil condition what philosophers centuries ago called a state of nature Developing a compelling case for the democratic state and its administrative apparatus she shows how privatization reproduces the very same defects that Enlightenment thinkers attributed to the precivil condition and which only properly constituted political institutions can overcome defects such as provisional justice undue dependence and unfreedom Cordelli advocates for constitutional limits on privatization and a more democratic system of public administration and lays out the central responsibilities of private actors in contexts where governance is already extensively privatized Charting a way forward she presents a new conceptual account of political representation and novel philosophical theories of democratic authority and legitimate lawmaking The Privatized State shows how privatization undermines the very reason political institutions exist in the first place and advocates for a new way of administering public affairs that is more democratic and just

Information Exchange and EU Law Enforcement Anna Fiodorova, 2018-05-16 Presenting an integrated approach to information exchange among law enforcement institutions within the EU this book addresses the dilemma surrounding the need to balance the security of individuals and the need to protect their privacy and data Providing the reader with a comprehensive analysis of information exchange tools exploring their history political background the most recent legal modifications and the advantages and disadvantages of their use it includes a comparison between different information exchange tools Written by an author who has worked as a police officer Home Affairs counsellor and academic this is an important read for scholars working with EU Law Criminal Procedure Law and International Law as well as for practitioners

who directly deal with international police cooperation or who perform criminal investigation both within and outside the EU

Stabilising Fragile Democracies Paul Lewis, Geoffrey Pridham, 2002-11 The first book to provide a systematic comparison of the democratic transitions in both Eastern and Southern Europe covering Italy Spain Greece Portugal Hungary Romania Poland and Bulgaria

The Ethics of Exile Ashwini Vasanthakumar, 2021-11-04 Exiles have long been transformative actors in their homelands they foment revolution sustain dissent and work to create renewed political institutions and identities back home Ongoing waves of migration ensure that they will continue to play these vital roles Rather than focus on what exiles mean for the countries they enter a perspective that often treats them as passive victims The Ethics of Exile recognises their political and moral agency and explores their rich and vital relationship to the communities they have left It offers a rare view of the other side of the migration story Engaging with a series of case studies this book identifies the responsibilities and rights exiles have and the important roles they play in homeland politics It argues that exile politics performs two functions it can correct defective political institutions back home and it can counter asymmetries of voice and power abroad In short exiles can act both as a linchpin and a buffer between political communities in crisis and the international actors who seek to variously aid and exploit them When we think about the duties we owe to those forced to leave their homes we should consider how to enable rather than thwart these roles
