to see service during World War Two A very advanced bomber for its time it included features such as pressurized cabins an electronic fire control system and remote controlled machine gun turrets Though it was designed as a high altitude daytime bomber in practice it actually flew more low altitude nighttime incendiary bombing missions It was the primary aircraft in the American firebombing campaign against Japan in the final months of World War Two Unlike many other World War Two era bombers the B 29 remained in service long after the war ended with a few even being employed as flying television transmitters The type was finally retired in the early 1960s with 3 960 aircraft in all built Without doubt there is a clear strong requirement to put the record straight using primary source documentation to record the undoubted achievements alongside and in context with the shortcomings to the type s design and operation that have otherwise received scant attention The book covers all variants and is profusely illustrated **Journal** ,1949 **OT/ITS Research Report** Institute for Telecommunication Sciences,1971 **Report of NRL Progress** Naval Research Laboratory (U.S.),1962 **The Journal of the British Institution of Radio Engineers** ,1949 *NRL Report* ,1979 *Pioneering Progress* William B. scientific geniuses who helped build the atomic bomb and defeat the Nazis changing the course of history. Legendary financier philanthropist and society figure Alfred Lee Loomis gathered the most visionary scientific minds of the twentieth century: Albert Einstein, Werner Heisenberg, Niels Bohr, Enrico Fermi, and others at his state-of-the-art laboratory in Tuxedo Park, New York, in the late 1930s. He established a top secret defense laboratory at MIT and personally bankrolled pioneering research into new high-powered radar detection systems that helped defeat the German Air Force and U-boats. With Ernest Lawrence, the Nobel Prize-winning physicist, he pushed Franklin Delano Roosevelt to fund research in nuclear fission which led to the development of the atomic bomb. Jennet Conant, the granddaughter of James Bryant Conant, one of the leading scientific advisers of World War II, enjoyed unprecedented access to Loomis' papers as well as to people intimately involved in his life and work. She pierces through Loomis' obsessive secrecy and illuminates his role in assuring the Allied victory.

*"Hydro" to "Navoceano"* Charles Carpenter Bates, George L. Hanssen, 2005. This candid narrative describes the complex interplay leading to today's state of the art in hydrography and oceanography within the U.S. Navy.

**Electronics In The Evolution Of Flight** Albert D. Helfrick, 2004. *Electronics in the Evolution of Flight* traces the paired history of modern aviation and electronics through their births in the minds of early thinkers and dreamers such as the Wright Brothers and Alexander Graham Bell to their eventual marriage under the name avionics. Author Albert Helfrick provides a thorough account of the roles played by the famous and the obscure from Edwin Howard Armstrong to Nikola Tesla and David Sarnoff in the successful creation of aviation technology. Helfrick does not limit his discussion to the flying machines themselves but instead focuses much of his work on the advancement of electronic systems that have kept them in the air and turned aviation into the industry it is today. He gives a clear explanation of technical definitions and acronyms including Radio Detection and Ranging (RADAR), the Instrument Landing System (ILS), the difference between short waves and microwaves as well as the role of amateur short wave radio operators in proving the usefulness of amazingly short radio waves in communication. With an easy familiarity he reviews topics as varied as the Morse code, the Radio Club of America, and the evolution of microprocessors. Helfrick covers the history of all of the engineering and electronic developments involved in getting an airplane off the ground and keeping it in the air; he does so in a style that will satisfy the curiosity of every reader from engineer to layman.
