Louis H. Sullivan and a 19th-Century Poetics of Naturalized Architecture LaurenS. Weingarden,2017-07-05 For most of the twentieth century modernist viewers dismissed the architectural ornament of Louis H Sullivan 1856 1924 and the majority of his theoretical writings as emotional outbursts of an outmoded romanticism In this study Lauren Weingarden reveals Sullivan s eloquent articulation of nineteenth century romantic practices literary linguistic aesthetic spiritual and nationalistic and thus rescues Sullivan and his legacy from the narrow role imposed on him as a pioneer of twentieth century modernism Using three interpretive models discourse theory poststructural semiotic analysis and a pragmatic concept of sign functions she restores the integrity of Sullivan s artistic choices and his historical position as a culminating figure within nineteenth century romanticism By giving equal weight to Louis Sullivan s writings and designs Weingarden shows how he translated both Ruskin s tenets of Gothic naturalism and Whitman s poetry of the American landscape into elemental structural forms and organic ornamentation Viewed as a site where various romantic discourses converged Sullivan s oeuvre demands a cross disciplinary exploration of each discursive practice and its rules of accumulation exclusion reactivation The overarching theme of this study is the interrogation and restitution of those Foucauldian rules that enabled Sullivan to articulate architecture as a pictorial mode of landscape art which he considered co equal with the spiritual and didactic functions of landscape poetry **Louis Sullivan As He Lived the Shaping of American Architecture a Biography - Primary Source Edition** Willard Connely,2013-10 This is a reproduction of a book published before 1923 This book may have occasional imperfections such as missing or blurred pages poor pictures errant marks etc that were either part of the original artifact or were introduced by the scanning process We believe this work is culturally important and despite the imperfections have elected to bring it back into print as part of our continuing commitment to the preservation of printed works worldwide We appreciate your understanding of the imperfections in the preservation process and hope you enjoy this

The Shaping of Us Lily Bernheimer, 2019-06-29 The spaces we inhabit from homes and workspaces to city streets mediate community creativity and our very identity Using insights from environmental psychology design and architecture *The Shaping of Us* shows how the built and natural worlds subtly influence our behavior health and personality Exploring ideas such as ruin porn and ninja proof seating mysteries of how we interact with the physical spaces around us are revealed From caves and cathedrals to our current housing crisis and the dreaded open plan office Lily Bernheimer demonstrates that for our well being we must reconnect with the power to shape our spaces Have you ever wondered why we adorn our doorframes with moldings What does Wikipedia's open source technology have to teach us about the history and future of urban housing What does your desk say about your personality From savannahs and skyscrapers to co working spaces *The Shaping of Us* shows that the built environment supports our well being best when it echoes our natural habitats in some way In attempting to restore this natural quality to human environments we often look to other species for inspiration The real secret to building for well being Bernheimer argues is to reconnect humans with the power to shape our surroundings When people are involved in forming and nurturing their environments they feel a greater sense of agency community and pride or collective efficacy And when communities have high rates of collective efficacy they tend to have less litter vandalism and violent crime Playful and accessible *The Shaping of Us* is a delightful read for designers professionals and anyone wanting to understand how spaces make us tick and how to fix the broken bits of our world

Culture and Democracy Hugh Dalziel Duncan,1989-01-01 This work by the late and great sociologist Hugh Dalziel Duncan paints the great panorama of the Middle West where egalitarianism is the most cherished value and money is the most important vehicle of life How art finds a place in this society is shown in the specific struggle between the architects businessmen unionists and educators of Chicago Into such specifics Duncan reveals the place of supposedly abstract theories developed by John Dewey George Herbert Mead Thorstein Veblen and above all Louis H Sullivan whose school of architecture presents both a new form of physical design and a new order of society The rise seeming defeat and final triumph of Sullivan s principles of order in architecture are related to his social and aesthetic theories of form in society In democratic society all individuals must be capable of art just as all individuals share in art as experience Sullivan s description of the development within the individual of the idea of architecture is treated as an allegory of such development in the spirit of democratic values His life is offered as a parable of the problem facing American artists as they attempt to root art in democratic culture In Sullivan s words The critical study of architecture becomes not merely the direct study of art but in extenso a study of the social conditions producing it The study of a newly shaping type of civilization By this light the study of architecture becomes naturally and logically a branch of social science Duncan s exceptional volume written with grace and clarity registers the achievements of this Chicago School showing how culture and democracy reached a special moment of consensus with the money based economy of our time
