Traditional Indian math was action based and has few activity based methods Therefore I have also included few Vedic methods in this course Because such methods also link children to Vedic math this may help to transition easily to mental math If your son or daughter is hyper active then he might enjoy activities more than anything else Similarly if your kid is Shy then she might want to experience more Therefore for both such kids activity based learning is essential This book is totally activity based and may suit to such kids very well Every arithmetic operation is done using some activity like drawing or acting Some of the activities are also paper based Caution has been taken to ensure that you may cover all the activities with things easily available at home so you need not buy anything specific for these activities I also added mental math methods in the program to introduce the children to mental math This book also covers tips and tricks for International Math Olympiad or IMO It is best suited for kids in class 2 The book mainly consists of simple and easy methods of addition subtraction multiplication and basic division This book also covers multiplication tables Addition and subtraction is covered up to 4 digits Multiplication tables are covered till 10 and multiplication of 2 digit numbers is covered as well Division by numbers up to 10 is covered I am confident that this is fun and joyful journey to all the students and their parents I wish you all the best for more love towards mathematics
