and Lullist writings of the 1580s and 90s and show his influence on early seventeenth century English understandings of memory and intellection Next come three studies on the atomistic or corpuscularian natural philosophy of the Northumberland and Cavendish circles arguing that there was a distinct English corpuscularian tradition prior to the Gassendian influence in the 1640s and 50s Finally two essays on the seventeenth century Intelligencer Samuel Hartlib and his correspondents shows how religion alchemy and natural philosophy interacted during the Puritan Revolution
