

"Let me tell you
of the place your
mother came from,
of Atlantis, the city
of King Poseidon, after
whom she was also
named. And, much like
your mother, her city
was a thing of beauty,
but also a place that
bore sacrifice in its
deeds and was
shaped by them."

"I tell you this story
now, for the world is so big,
underneath the stars, and
on land, but cold to the
stranger or the mad."

"No Atlantis, once
there were magic."

"The city was made by it, shaped by it.
Great warriors and warlocks and
witches and warriors devised into its
magical depths, and fashioned reality
from mere thought."

Magic, Science, and Empire in Postcolonial Literature

Kathleen Renk, 2012-03-29 This book examines the ways in which contemporary British and British postcolonial writers in the after empire era draw connections between magic defined here as Renaissance Hermetic philosophy and science Writers such as Tom Stoppard Zadie Smith and Margaret Atwood critique both imperial science or science used in service to empire and what Renk calls imperical science a distortion of rational science which denies that reality is holistic and claims that nature can and should be conquered In warning of the dangers of imperical science these writers restore the connection between magic and science as they examine major shifts in scientific thinking across the centuries They reflect on the Copernican Revolution and the historic split between magic and science scrutinize Darwinism consider the relationship between Victorian science and pseudo science analyze twentieth century Uncertainty theories reject bio genetic engineering call for a new approach to science that reconnects science and art and ultimately endeavor to bring an end to the imperial age Overall these writers forge a new discourse that merges science with the arts and emphasizes a holistic philosophy a view shared by both Hermetic philosophy and recent scientific theories such as chaos or complexity theory Along with recent books that focus on the relationship between contemporary literature and science this work focuses on contemporary British literature s critique of science and the ways in which postcolonial literature addresses the relationship between magic science and empire

Science, Technology and Magic in The Witcher Kristine Larsen, 2023-02-02 As Andrzej Sapkowski was fleshing out his character Geralt of Rivia for a writing contest he did not set out to write a science textbook or even a work of science fiction However the world that Sapkowski created in his series *The Witcher* resulted in a valuable reflection of real world developments in science and technology As the *Witcher* books have been published across decades the sorcery in the series acts as an extension of the modern science it grows alongside This book explores the

fascinating entanglement of science and magic that lies at the heart of Sapkowski's novel series and its widely popular video game and television adaptations This is the first English language book length treatment of magic and science in the Witcher universe These are examined through the lenses of politics religion history and mythology Sapkowski's richly detailed universe investigates the sociology of science and ponders some of the most pressing modern technological issues such as genetic engineering climate change weapons of mass destruction sexism speciesism and environmentalism Chapters explore the unsettling realization that the greatest monsters are frequently human and their heinous acts often involve the unwitting hand of science

Religion, Magic, and Science in Early Modern Europe and America Allison P. Coudert, 2011-10-17 This fascinating study looks at how the seemingly incompatible forces of science magic and religion came together in the 15th 16th and 17th centuries to form the foundations of modern culture As Religion Magic and Science in Early Modern Europe and America makes clear the early modern period was one of stark contrasts witch burnings and the brilliant mathematical physics of Isaac Newton John Locke's plea for tolerance and the palpable lack of it the richness of intellectual and artistic life and the poverty of material
