*Resonances - A Volume In Honor Of The 70th Birthday Of Nicolaas Bloembergen* M D Levenson, Peter S Pershan, Eric Mazur, Yuen Ron Shen, 1990-10-29 The authors are former students and research fellows of Prof Nicolaas Bloembergen winner of the Nobel Prize who has pioneered three distinct fields of science NMR masers and nonlinear optics Each author has contributed a paper of current interest inspired by some aspect of Prof Bloembergen's 50 year career This volume contains a historical record of one of the great scientists of the 20th century including a complete bibliography of his papers four of his most significant publications and evidence of his impact on generations of scientists **U.S. Government**

**Research Reports**, 1962 *Nuclear Science Abstracts*, 1976 *Advances in Chemical Physics, Volume 81* Ilya Prigogine, Stuart A. Rice, 2009-09-09 The *Advances in Chemical Physics* series provides the chemical physics and physical chemistry fields with a forum for critical authoritative evaluations of advances in every area of the discipline Filled with cutting edge research reported in a cohesive manner not found elsewhere in the literature each volume of the *Advances in Chemical Physics* series serves as the perfect supplement to any advanced graduate class devoted to the study of chemical physics **Dielectrics in Time-Dependent Fields** Bozzano G Luisa, 2012-12-02 *Theory of Electric Polarization Volume II*

**Dielectrics in Time Dependent Fields** focuses on the processes reactions and principles involved in the application of dielectrics in time dependent fields as well as the Kerr effect statistical mechanics and polarization The publication first examines the phenomenological theory of linear dielectrics in time dependent fields empirical description of dielectric relaxation and the relationship between macroscopic and molecular dielectric relaxation behavior Concerns cover the relationship between macroscopic and microscopic correlation functions statistical mechanics of linear dissipative systems and the relationship between response functions and correlation functions superpositions of distribution functions and the use of complex dielectric constant in problems with time dependent field sources The book then ponders on the dipole correlation function polarization in the infrared and optical frequency range and the Kerr effect and related phenomena Discussions focus on the Kerr effect in condensed systems extensions of the Kerr effect extrapolation of the refractive index to infinite wavelength results obtained from computer simulations rotational diffusion and general aspects of molecular reorientation The manuscript tackles the dielectric properties of molecular solids and liquid crystals and experimental determination of permanent dipole and quadrupole moments The text is a valuable source of data for researchers interested in the application of dielectrics in time dependent fields *Nuclear Moments* H. Kopferman, E. E. Schneider, 2013-10-22 *Nuclear Moments* focuses on the processes methodologies reactions and transformations of molecules and atoms including magnetic resonance and nuclear moments The book first offers information on nuclear moments in free atoms and molecules including theoretical foundations of hyperfine structure isotope shift spectra of diatomic molecules and vector model of molecules The manuscript then takes a look at nuclear moments in liquids and crystals Discussions focus on nuclear

paramagnetic and magnetic resonance and nuclear quadrupole resonance The text discusses nuclear moments and nuclear models as well as simple conclusions from experimental data and graphical representations of nuclear models and moments An explanation of symbols used in the manuscript is also presented The book is a dependable reference for readers interested in the study of nuclear moments

*Establishing Quantum Physics in Berlin* Hubert Goenner, Giuseppe Castagnetti, 2021-01-27 This book explores Albert Einstein's move to Berlin and the establishment of the Kaiser Wilhelm Institute for Physics under his directorship Einstein's call to Berlin was supported by a group of prominent physicists including Fritz Haber Walter Nernst Max Planck Heinrich Rubens Emil Warburg and the young astronomer Erwin Freundlich in the expectation that Einstein and the institute would take the lead in advancing quantum physics in its early phase Examining both the abortive attempt and the successful opening of the institute in 1917 it also discusses in detail the institute's activities up to 1922 when Einstein relinquished the directorship as well as his reasons for stepping down The final chapter evaluates the institute's activities and its role in the advancement of physics In the end the institute only partially fulfilled the expectations of its promoters because of the waning interest in quantum physics on the part of its director and board and also because of Einstein's refusal to exert scientific leadership The book is part of a series of publications in the SpringerBriefs series on the early network of quantum physics The other books in the four volume collection address the beginnings of quantum physics research at G ttingen Copenhagen and Munich These works emerged from an expansive study on the quantum revolution as a major transformation of physical knowledge undertaken by the Max Planck Institute for the History of Science and the Fritz Haber Institute 2006 2012 For more on this project see the dedicated Feature Story The Networks of Early Quantum Theory at the Max Planck Institute for the History of Science <https://www.mpiwg-berlin.mpg.de/feature-story/networks-early-quantum-theory>
