Magnetohydrodynamics A Symposium:

Magnetohydrodynamics Sergei S. Molokov, R. Moreau, H. Keith Moffatt, 2007-08-26 Magnetohydrodynamics MHD studies the interaction between the flow of an electrically conducting fluid and magnetic fields It involves such diverse topics as the evolution and dynamics of astrophysical objects thermonuclear fusion metallurgy and semiconductor crystal growth etc Although the first ideas in magnetohydrodynamics appeared at the beginning of the last century the explosion in theoretical and experimental studies occurred in the 1950s 60s This state of the art book aims at revising the evolution of ideas in various branches of magnetohydrodynamics astrophysics earth and solar dynamos plasmas MHD turbulence and liquid metals and reviews current trends and challenges Engineering Aspects of Magnetohydrodynamics; 12th Symposium

,1972 *Magnetohydrodynamics with Hydrodynamics* Peter C. Kendall, Charles Plumpton, 2013-09-03

Magnetohydrodynamics with Hydrodynamics Volume 1 details various concepts in magnetohydrodynamics as it relates to hydrodynamics The title first covers the methods and techniques appropriate to an elementary discussion of magnetohydrodynamics and then proceeds to tackling the fundamental results of fluid dynamics Next the selection discusses the electromagnetic effects along with the motion of a fluid in a uniform magnetic field In the last chapter the text talks about steady states and equilibrium configuration The book will be of great interest to students researchers and practitioners of physics and engineering Advances in Magnetohydrodynamics I. A. McGrath, R. G. Siddall, M. W. Thring, 2014-05-12

Advances in Magnetohydrodynamics is a collection of papers that deals with the MHD process such as the fundamental properties of gases passing through magnetic fields estimates of performance of different MHD systems and pilot plant investigations One paper investigates the role that both electrons and positive ions play in the processes occurring in an MHD generator during the braking of the gas stream Another paper discusses the motion of a partially ionized gas through a magnetic field by considering the macroscopic equations of motion of the individual component gases consisting of neutrals ions and electrons A high electron temperature can occur under conditions of low pressure and high acceleration rapid expansion of flowing plasma such as can happen in forms of magnetoplasma dynamic electrical power generator One paper examines any occurrence and effects of electron temperature which is higher than the gas temperature on ionization electrical conductivity and on ion electron recombination process under these conditions The paper concludes that the elevated electron temperature effect is not significant in practical devices such as those found in the d c transverse magnetic field arrangement of an electrical power generator The collection can prove useful for mathematicians students or professors in advanced mathematics or physics Engineers or technicians interested in power generation and regulation will find the collection valuable Plasma Physics and Magnetohydrodynamics in Space Exploration NASA-University Conference on the
