

Sample Preliminary Report Outlines

This presents three different sample outlines for the Preliminary Research Report, using different research topics presented in an earlier English 102 class (April 2011). I have edited the outlines somewhat, mostly by re-arranging ideas into the appropriate section (for example, moving some questions out of III and moving them into III or vice versa).

After the examples I present a brief review of style/voice—in other words, how to write up your information in each section, by demonstrating how you might begin each section.

In these examples section I and II present questions that the Preliminary Report would *answer*. For example, the first paper would explain who was affected by Katrina, what Katrina was, and so on. Section III presents questions that the Preliminary Report would *not* answer but would *describe*. For example, the first paper would point out that experts are still debating whether the Army Corps of Engineers was negligent. You don't have to answer these questions in your report, just mention what a few such questions are.

In these examples section IV looks at possible answers to the research question. In your actual paper you'll present one answer—the one you think is best—and a very *brief* (1-2 sentences) explanation of why you think that answer is best.

Topic: Hurricane Katrina

Subtopic: Government response and public reaction

Research Question: Why was the public unhappy with the government's response to Katrina?

- I. Introduce the overall topic, explain basic info about that topic
 - a. Who: People of the south surrounding N.O.
 - b. What: Big hurricane that devastated the land.
 - c. Where: Southeastern United States (i.e. Louisiana, South Florida, Mississippi).
 - d. When: End of August 2005.
 - e. Why: High Pressure, Low Pressure, Warm temperature, and combos. Natural Disaster, global warming, linked to climate change.
- II. Introduce the subtopic that you intend to focus on, explain basic info about that topic
 - a. Before Katrina and aftermath and the Government's relief efforts.
 - i. What did the government do to prevent or fix the situation?
 - b. General opinion about the government.
 - c. How did the public feel/how did the government live up to their expectations.
- III. Questions within the subtopic that are still unanswered or being debated—in-depth, analytical questions, not simple questions of fact
 - a. Why hasn't New Orleans been rebuilt after all this time?
 - b. Was the disorganization of the government intentional?
 - c. Did the media blow it out of proportion in order to blame someone?

Banbhore; a Preliminary Report on the Recent Archaeological Excavations at Banbhore F. A. Khan, 1963 Mahasthan Nazimuddin Ahmad, 1971 **The Social Construction of Ancient Cities** Monica L. Smith, 2013-04-09 What made ancient cities successful What are the similarities between modern cities and ancient ones The Social Construction of Ancient Cities offers a fresh perspective on ancient cities and the social networks and relations that built and sustained them marking a dramatic change in the way archaeologists approach them Examining ancient cities from a bottom up perspective the authors in this volume explore the ways in which cities were actually created by ordinary inhabitants They track the development of urban space from the point of view of individuals and households providing new insights into cities roles as social centers as well as focal points of political and economic activities Analyzing various urban communities from residences and neighborhoods to marketplaces and ceremonial plazas the authors examine urban centers in Africa Mesoamerica South America Mesopotamia the Indian subcontinent and China Collectively they demonstrate how complex networks of social relations and structures gave rise to the formation of ancient cities contributed to their cohesion and sustained their growth much as they do in modern urban centers The authors analyses draw from ancient texts as well as archaeological surveys and excavations of urban architecture and other material remains including portable objects for daily use and comestibles They show clearly how early urban dwellers consciously developed dense interdependent social networks to satisfy their needs for food housing and employment forged their own urban identities and generally managed to thrive in the crowded bustling and competitive environment that characterized ancient cities Not least of all they suggest how urban leaders and urban dwellers negotiated a consensus that enabled them to achieve both mundane and extraordinary goals in the process establishing their unique ritual legal and social status **Archaeology as History in Early South Asia** Himanshu Prabha Ray, Carla M.
