The book consists of 25 chapters, one for each letter of the alphabet. X-Y is one chapter. Each chapter is centered around a practical case and discusses relevant theoretical notions, explaining their philosophical backgrounds and practical consequences. Thus, the book combines a variety of topics with a unity of style and structure. The alphabetic presentation emphasizes that there are no formal principles behind the items. The book aims to stimulate a creative inquiry in the reader rather than presenting them with ready-made lines of arguments. It mirrors care practice as ethical issues and concepts are related to specific situations and arise in unpredictable ways. This book will be of interest to students and professionals in healthcare who want to understand the ethical issues they experience. It provides conceptual clarification together with an understanding of diverse perspectives. **The Typewriter Century** Martyn Lyons, 2021-02-01 This book captures the intensity of the relationship between writers and their typewriters from the 1880s when the machine was first commercialized to the 1980s when word processing superseded it. Drawing on examples from the United States, Britain, Europe, and Australia, *The Typewriter Century* focuses on celebrity writers including Henry James, Jack Kerouac, Agatha Christie, Georges Simenon, and Erle Stanley Gardner, who wrote prolifically and mechanically, developing routines in which typing, handwriting, and dictation were each allotted important functions. The typewriter de-personalized the text; the office typewriter bureaucratized it. At the same time, some authors found a new and disturbing distance between themselves and their compositions, while others believed the typewriter facilitated spontaneous and automatic typing. *The Typewriter Century* provides a cultural history of the typewriter, outlining

the ways in which it can be considered an agent of change as well as demonstrating how it influenced all writers canonical and otherwise
