Main Economic Policy Areas Of The Eec:

Main Economic Policy Areas of the EEC — Towards 1992 P. Coffey, 2013-12-01 At the end of 1992 things will never again be the same inside the European Economic Community EEC because as that year draws to a close the aims of the Single Act of European Union SAEU which became law in July this year will have become effective thus creating a real Common Market This will mean that there will no longer be any obstacles to the free movement of goods between the Member States Equally and for the first time in the EEC s history internal capital movements will be absolutely free there will no longer be any exchange controls and it will be possible to freely establish financial services between EEC countries Likewise as currently being proposed by Lord Cockfield wide variations in the levels of value added tax VAT between Member States will not be allowed Also in the case f the Common Agricultural Policy CAP it will no longer be possible nor even necessary to have the monetary compensatory amounts MCA s All these changes but especially the increased freedom in capital movements will have profound consequences for the different regions of the Community and it will be desirable to have a much more dynamic Regional Policy before 1993 Last but by no means least a greater number of decisions inside the Community will be made by majority voting and the Parliament will be endowed with enhanced powers

Main Economic Policy Areas of the EEC P. Coffey, 2013-11-27 by Peter Coffey This is indeed a most opportune time for the publication of a serious critical and independent study about the Main Economic Policy Areas of the EEC The European Economic Community is the world s most import ant commercial and trading bloc and its economic policies consequently have the most far reaching implications for all countries in the world The rest of the world is acutely conscious of the Community s trading policies In turn these policies apart from those based on historical links ante cedent to the EEC s formation are strongly influenced by the internal economic policies of the Common Market especially by the Common Agricultural Policy CAP At the present time the Community finds itself both in ternally and externally at a crossroads This crossroads takes the form of a choice between protectionism or open ness Unfortunately present evidence suggests that currently and in the immediately foreseeable future the former option has been chosen by the EEC

Main Economic Policy Areas of the EEC — Toward 1992 P. Coffey, 2012-12-06 PETER COFFEY Since the appearance of the second edition of this work which was so quickly out of print so much has happened in Europe In the EEC itself 1989 was a watershed year concerning the Community s moves towards the creation of the Single European Market SEM by the end of 1992 Early in the year the appear ance of the De10rs Report on Economic and Monetary Union in the European Community was followed by an agreement at the European Summit in June to begin the first stage of this union in the Summer of 1990 As a counterpart to this and other agree ments seen by trade unions and similar groups as an agreement New composition of the ECU as on 21 st September 1989 Deutsche Mark DEM 30 10% French Franc FRF 19 00% Pound Sterling GBP 13 00% Italian Lira ITL 10 15% Dutch Guilder NLG 9 40% 7 90% Belgian Franc BFR 2 45% Danish Kronor DKK 1 10% Irish Pund IEP 0 80% Greek Drachma GRD 5 30% Spanish Peseta

The European Monetary System – Past, Present and Future P. Coffey,2012-12-06 The European Monetary System EMS is perhaps the only success story of the Common Market since the First Enlargement Its success particularly where the commercial use of the ECU is concerned has taken most experts by surprise So much so that when the author tried to recommend to his students a suitable and substantial work of study and or reference about the experience of the EMS and its possible future evolution no book could be found Thus the author set out to write the present work The author's aim is not to give a historical account of the EMS Rather the intention is to place the experience in a major historical context wherein the System is seen an important transitional phase on the road to the implementation of a full economic and monetary union EMU When examining the earlier plans for an EMU which saw the light of day between 1969 and 1970 already so long ago clear reasons emerge why the original six founder Member States of the EEC should have found it logical to embark upon the road to an EMU provided the political will to do so existed Thus they had become highly integrated and were conducting half their trade with each other Then there was the desire to integrate still further eventually leading perhaps to a political union

European Communities John Paxton,1992-01-01 The establishment of the European Economic Community in 1958 was one of the most remarkable developments in the history of the post World War II era It aimed for nothing less than a complete economic union so that goods people and capital would be able to pass over national boundaries of member countries as freely as they move within any one country As the Community's target date of 1992 for economic integration draws closer the need for information both current and historical becomes more urgent The aim of this annotated bibliography is to create a critical and descriptive list of books published mainly in English for

businessmen and analysts combining older publications with new The literature on the EC is vast and issues The Community itself nearly 3000 publications a year The range of material covered in this volume is distinguished by its great scope Historical sections provide listings on the postwar years of economic recovery the development of the EC and biographies of the leading personalities involved Policy oriented sections encompass such subjects as labor transportation environment energy and education The political ramifications of economic union financial and fiscal affairs relations between the EC and the Third World and foreign relations in general are dealt with in separate sections The volume concludes with a listing of major European Community publications The sheer bulk of published material on the EC much of it duplication has made keeping up with its developments difficult for small and medium in Europe and elsewhere This invaluable sourcebook will provide the business community and the political establishments with better access to EC information as they grapple with the implications of 1992

The European Monetary System P. Coffey, 2013-06-29 The European Monetary System EMS is perhaps the only success story of the Common Market since the First Enlargement Its success particularly where the commercial use of the ECU is concerned has taken most experts by surprise So Irish so that when the author tried to recommend to his students a suitable and substantial work of study and or reference about the experience of the EMS and its possible future evolution no book could be found Thus the author set out to write the present work The author's aim is not to give a historical account of the EMS Rather the intention is to place the experience in a major historical context wherein the System is seen an important transitional phase on the road to the implementation of a full economic and monetary union EMU When examining the earlier plans for an EMU which since the light of day between 1969 and 1970 already so long ago clear reasons emerge why the original six founder Member States of the EEC should have found it logical to embark upon the road to an EMU provided the political will to do so existed Thus they had been highly integrated and were conducting half their trade with each other Then there was the desire to integrate still further eventually leading perhaps to a political union

Europe — Toward 2001 P. Coffey, 2013-12-01 THE BACKGROUND Why a book on Europe Toward the Year 2001 There are two principal reasons why a European should embark upon such a hazardous enterprise First when the Treaty on European Union popularly known as the Maastricht Treaty and hereafter referred to as the Treaty in this introduction was signed in February 1992 it was agreed that the heads of government of the EU Member States would assemble in 1996 to examine its workings This meeting will be known as the Intergovernmental Conference IGC Second by the end of the century it is certain that arrangements will have been made for the admission of some countries of Central and Eastern Europe into the European Union EU Consequently even with or without the holding of the IGC it will be urgently necessary to reform some of the Community's policies notably the Common Agricultural Policy CAP and the structural policies which are linked for example to Europe Toward 2001 with the Regional and Social Funds before these countries become members Failure to do this could result in bankruptcy for the EU Of almost equal importance is the reform of the institutions and the actual

workings of the Community Already with 12 Member States it was difficult enough to manage things on a daily basis Now as more countries join the Union things could literally grind to a stop Thus changes in this area are indispensable

Chronology of Twentieth-Century History: Business and Commerce Frank N. Magill, 2014-04-23 First Published in 2004 Volume II provides the hard facts and the history behind the headlines significant 20th century events in the evolution of all aspects of business and commerce are described in chronologically arranged articles The text of each article is divided into two sections Summary of the Event describes the event itself and the circumstances leading up to it and Impact of the Event analyzes the influence of the event on the evolution of business practice or on a major industry in both the short and long terms Each article concludes with a fully annotated Bibliography
