Mainland Southeast Asia An Anthropological Perspective:

Mainland southeast asia Ronald Provencher,1977 **The Modern Anthropology of South-East Asia** Victor King,William D. Wilder,2020-09-10 This is a comprehensive introduction to the social and cultural anthropology of South East Asia It provides an overview of the major theoretical issues and themes which have emerged from the engagement of anthropologists with South East Asian communities a succinct historical survey and analysis of the peoples and cultures of the region Most importantly the volume reveals the vitally important role which the study of the area has occupied in the development of the concepts and methods of anthropology from the perspectives of Edmund Leach to Clifford Geertz Maurice Freedman to Claude Levi Strauss Lauriston Sharp to Melford Spiro **The Malay World of Southeast Asia** Patricia Lim Pui Huen,1986 Over 5 000 entries arranged in four parts Part I comprises reference and general works to provide a guide to information on Southeast Asia Part II provides the setting of space and time Part III features the people and Part IV the many facets of culture and society language ideas beliefs values institutions creative expression and social and cultural change Within each section the arrangement is geographical beginning with Southeast Asia as a whole followed by the various countries in alphabetical order **Understanding Witchcraft and Sorcery in Southeast Asia** C. W. Watson,R. F. Ellen,1993-01-01 Witchcraft holds a perennial fascination for scholars and the public at large In Southeast Asia malign magic and sorcery are part of the routine experience of villagers and urban dwellers alike and stories appearing in the press from time to time bear witness to a persisting public concern The essays presented in this volume describe what people believe and what actions result from those beliefs Not surprisingly given the range and variety of cultures considerable differences exist in the region Among some cultures in Thailand and Indonesia for example sorcerers are said to possess spirits that empower them to cause illness and misfortune Elsewhere in Malaysia and Sumatra the power of the dukun derives from the accumulation of arcane knowledge and mystical practice Contributors describe the witches and sorcerers they have met and suggest both how their societies look upon them and how we in turn should regard them Understanding Witchcraft and Sorcery in Southeast Asia will appeal to scholars and students of social anthropology and comparative religion Its substantial contribution to theoretical and comparative issues in a Southeast Asian context provides a fresh perspective on a stimulating topic Ibss: Anthropology: 1975 International Committee for Social Scien,1978-08-24 First published in 1978 Routledge is an imprint of Taylor Francis an informa company Anthropological Perspectives on Tooth Morphology G. Richard Scott,Joel D. Irish,2013-02-21 Researchers have long had an interest in dental morphology as a genetic proxy to reconstruct population history Much interest was fostered by the use of standard plaques and associated descriptions that comprise the Arizona State University Dental Anthropology System developed by Christy G Turner II and students This system has served as the foundation for hundreds of anthropological studies for over 30 years In recognition of that success this volume brings together some of the world s leading dental morphologists to expand upon the concepts and

methods presented in the popular *The Anthropology of Modern Human Teeth* Cambridge 1997 leading the reader from method to applied research After a preparatory section on the current knowledge of heritability and gene expression a series of case studies demonstrate the utility of dental morphological study in both fossil and more recent populations and individuals from local to global scales

Southeast Asia Donald G McCloud, 2018-02-07 Bridging the perceived gap between Southeast Asia's historical and contemporary situations Donald McCloud focuses on continuities in the region's internal dynamics as well as its relationship to the greater global environment The author challenges widely held views that diversity and fragmentation are the hallmarks of the region identifying instead the commonalities that have bound the countries of Southeast Asia together through at least two millennia and have provided the basis for a unique regional dynamic It has only been since World War II that Southeast Asians long influenced by the global environment have defined and developed their own institutions social structures and communities Turning away from inadequate and unadaptable Western institutions they have begun to create structures more in tune with their own historical experiences Particularly in the political sphere many of these new structures seemed to be straightforward military dictatorships However time has shown them to be more complex and many unique organizational practices have developed that may presage more open political systems if not democracies by strict Western definitions With the expansion of regional cooperation through ASEAN and strong economic growth confidence among Southeast Asian states has grown as well The growing references to an Asian way of life have given verbal expression to a surge in neotraditional values and behavior that have always been part of the fabric of Asian life but that in the past were frowned upon as nonwestern This text traces the evolution of Southeast Asia and focuses for the first time on the neotraditional bases for contemporary independent development of the region
