Mainstream Education For Hearing Impaired Children And Youth

Ronald L. Taylor, Les Sternberg

Mainstream Education For Hearing Impaired Children And Youth:

Mainstream Education for Hearing Impaired Children and Youth Gary W. Nix, 1976 *Mainstreaming Preschoolers: Children with hearing impairment*, 1978 Education for All Handicapped Children Act, 1977 United States. Congress. Senate. Committee on Human Resources. Subcommittee on the Handicapped, 1977 **Exceptional Children** Ronald L. Taylor, Les Sternberg, 2012-12-06 *Exceptional Children Integrating Research and Teaching* provides a comprehensive introduction to the constantly changing area of special education. The book is research based and its title reflects our opinion regarding the important link between research and classroom practice. There is one feature of *Exceptional Children Integrating Research and Teaching* that warrants attention and perhaps justification: it was written specifically to address the graduate student or sophisticated undergraduate student market. As such, the book is written at a higher level and with a greater concept density than typical introductory special education texts. We feel that this type of book is very much needed and will be received favorably by the special education community. There are also several unique features of *Exceptional Children Integrating Research and Teaching* that we feel will be quite valuable. First, we have emphasized the area of teaching practices and not simply included basic facts about definitions, characteristics, and causes. Although some introductory texts include information about teaching considerations, that area is not discussed as in depth as it is in our text. We feel that it is important that readers not only understand the educational needs of exceptional children but also can identify the best educational practices to meet those needs. *The Challenge of Educating Together Deaf and Hearing Youth* Paul C. Higgins, 1990 **Deaf Students in Postsecondary Education** Susan B. Foster, Gerard G. Walter, 2018-09-03 First published in 1992. With an ever-increasing number of deaf students entering higher education throughout the world, major strides need to be made in provision and support for them. This book recognises that the integration of deaf students into mainstream higher education raises complex and challenging problems. It has proved extremely difficult for deaf students to enter fully into the social and extra-curricular fabric of campus life, an essential factor in ensuring student success. The authors provide an assessment of state-of-the-art practice in postsecondary settings and suggest theoretical and practical approaches to providing support. There is discussion of the attainments of deaf graduates with commentaries by deaf persons about their experiences in college. In addition, statistics support the theoretical contentions and clearly demonstrate the benefits of postsecondary education to deaf people. **Language, Cognition, and Deafness** Michael Rodda, Carl Grove, 2013-08-21 First published in 1987. This book is intended as an introduction to the field of communication and deafness with particular reference to cognition and the various forms of language used by hearing-impaired people. It is aimed at an audience comprising teachers and student teachers of the deaf, speech pathologists and students of speech pathology, social workers and students of social work, psychologists and students of psychology, and to some extent the parents of deaf children and deaf people themselves. It attempts to provide a concise summary of the topic and indeed as well

as being for the audience just described it will be useful to anyone with an interest in the psychological sociological and linguistic ramifications of hearing loss

Today's Hearing-impaired Child--into the Mainstream of Education Vira J. Froehlinger,1981 *Oxford Handbook of Deaf Studies, Language, and Education* Marc Marschark Professor at the National Technical Institute of the Deaf at Rochester Institute of Technology, Patricia Elizabeth Spencer Research Professor in the Department of Social Work Gallaudet University,2003-03-27

In Plato's *Cratylus* which dates to 360 B C Socrates alludes to the use of signs by deaf people In his *Natural History* completed in 79 A D Pliny the Elder alludes to Quintus Pedius the deaf son of a Roman consul who had to seek permission from Caesar Augustus to pursue his training as an artist During the Renaissance scores of deaf people achieved fame throughout Europe and by the middle of the 17th century the talents and communication systems of deaf people were being studied by a variety of noted scientists and philosophers However the role of deaf people in society has always been hotly debated could they be educated Should they be educated If so how How does Deaf culture exist within larger communities What do advances in the technology and the genetics of hearing loss portend for Deaf communities In this landmark volume a wide range of international experts present a comprehensive and accessible overview of the diverse field of deaf studies language and education Pairing practical information with detailed analyses of what works why and for whom and banishing the paternalism once intrinsic to the field the handbook consists of specially commissioned essays on topics such as language and language development hearing and speech perception education literacy cognition and the complex cultural social and psychological issues associated with individuals who are deaf or hard of hearing Through careful planning collaboration and editing the various topics are interwoven in a manner that allows the reader to understand the current status of research in the field and recognize the opportunities and challenges that lie ahead providing the most comprehensive reference resource on deaf issues Written to be accessible to students and practitioners as well as researchers The *Oxford Handbook of Deaf Studies Language and Education* is a uniquely ambitious work that will alter both theoretical and applied landscapes It surveys a field that has grown dramatically over the past 40 years since sign languages were first recognized by scientists to be true languages From work on the linguistics of sign language and parent child interactions to analyses of school placement and the mapping of brain function in deaf individuals research across a wide range of disciplines has greatly expanded not just our knowledge of deafness and the deaf but of the very origins of language social interaction and thinking Bringing together historical information research and strategies for teaching and service provision Marc Marschark and Patricia Elizabeth Spencer have given us what is certain to become the benchmark reference in the field
