Maintenance Minimization For Competitive Advantage A Lifecycle Approach For Product Manufacturers And Endusers:

Maintenance Minimization for Competitive Advantage Hans Reiche, 1994 The simplest way to provide customers with products and equipment that are always up and running and that require only modest maintenance is to incorporate low maintenance and high reliability into product design The author views product maintenance from a life cycle perspective from initial product concept through death and disposal In this text he presents guidelines for assessing and reducing the amount of maintenance a product will require Maintenance Minimization for Competitive Advantage brings a new and practical perspective to maintaining optimal function in industrial equipment and consumer products The author presents maintenance as a factor to be considered from the initial design on a product and explains how to design products so that they require minimal maintenance during use

Advances in Life Cycle Engineering for Sustainable Manufacturing Businesses Shozo Takata, Yasushi Umeda, 2007-07-26 Life cycle engineering deals with technologies for shifting the industry from mass production and mass consumption paradigm to closed loop manufacturing paradigm in which required functions are provided for customers with the minimum amount of production This subject is discussed from the various aspects such as life cycle design design for environment reduce reuse recycle life cycle assessment and sustainable business models Advances in Life Cycle Engineering for Sustainable Manufacturing Businesses gathers together papers from the 14th International CIRP Life Cycle Engineering Conference This conference is the longest running annual meeting in the field in which papers are presented regarding developments of leading edge technologies proposals of new concepts and prominent industry case studies

Pharmaceutical Drug Product Development and Process Optimization Sarwar Beg, Majed Al Robaian, Mahfoozur Rahman, Syed Sarim Imam, Nabil Alruwaili, Sunil Kumar Panda, 2020-05-01 Pharmaceutical manufacturers are constantly facing quality crises of drug products leading to an escalating number of product recalls and rejects Due to the involvement of multiple factors the goal of achieving consistent product quality is always a great challenge for pharmaceutical scientists This volume addresses this challenge by using the Quality by Design QbD concept which was instituted to focus on the systematic development of drug products with predefined objectives to provide enhanced product and process understanding This volume presents and discusses the vital precepts underlying the efficient effective and cost effective development of pharmaceutical drug products It focuses on the adoption of systematic quality principles of pharmaceutical development which is imperative in achieving continuous improvement in end product quality and also leads to reducing cost time and effort while meeting regulatory requirements The volume covers the important new advances in the development of solid oral dosage forms modified release oral dosage forms parenteral dosage forms semisolid dosage forms transdermal drug delivery systems inhalational dosage forms ocular drug delivery systems nanopharmaceutical products and nanoparticles for oral delivery

Functional Thinking for Value Creation Jürgen Hesselbach, Christoph Herrmann, 2011-03-18 After the IPS2 conferences in Cranfield and Linköping in 2009 and 2010 the 3rd CIRP International Conference on Industrial Product Service Systems IPS2 2011 takes place in Braunschweig Germany IPS2 itself is defined as an integrated industrial product and service offering that delivers value in use The customers expect comprehensive solutions which are adapted to their individual needs IPS2 offers the possibility to stand out from competition and for long term customer loyalty Particularly in times of economic crisis it becomes apparent which producing companies understand to satisfy the needs and requirements of their customers Especially in this relatively new domain IPS2 it will be important to keep track of the whole context and to seek cooperation with other research fields and disciplines The 3rd CIRP International Conference on Industrial Product Service Systems IPS2 2011 serves as a platform for such collaborations and the discussion of new scientific ideas **Maintenance Strategies**

and Reliability Optimization A. Artiba, Fouad Riane, 2005 **Planning Stability in Material Requirements Planning Systems** Gerald Heisig, 2012-12-06 In logistics systems the issue of planning stability has attracted increased attention and interest in recent years This is mainly due to an increasing integration of planning systems both within and across companies in supply chain management The propagation of adjustments in planning systems first acquired wide attention when MRP systems were employed as standard planning tools for material coordination Within a rolling horizon framework the MRP application produced considerable planning instability which originates from uncertainties in the planner's exogenous environment as well as from endogenous sources This book presents an analytical investigation that gives deep insight into the influence of different kind of inventory control rules on the stability of material planning systems under stochastic demand in a rolling horizon environment **Advances in Modelling and Optimization of Manufacturing and Industrial Systems**

Ravi Pratap Singh, Mohit Tyagi, R. S. Walia, J. Paulo Davim, 2023-03-01 This book presents select proceedings of the 2nd International Conference on Industrial and Manufacturing Systems CIMS 2021 and discusses the applications of soft computing modelling and optimization practices in industrial and manufacturing systems Various topics covered in this book include advanced machining methods and performances industrial operations processing with hybrid manufacturing techniques fabrication and developments in micro machining and its applications practical issues in supply chain micro structure analysis additive manufacturing processes reliability and system analysis material science and metallurgical behaviour analysis product design and development etc The book will be a valuable reference for beginners researchers and professionals interested in the modelling optimization and soft computing related aspects of industrial and production engineering and its allied domains **Sales and Marketing Optimization: Developing Competitive Value Propositions in Distribution** ,2012 **Advances in Production Management Systems. Vittal Prabhu, Marco Taisch, Dimitris Kiritsis, 2013-09-05 The two volumes IFIP AICT 414 and 415

constitute the refereed proceedings of the International IFIP WG 5.7 Conference on Advances in Production Management Systems APMS 2013 held in University Park PA USA in September 2013. The 133 revised full papers were carefully reviewed and selected for inclusion in the two volumes. They are organized in 4 parts: sustainable production, sustainable supply chains, sustainable services and ICT, and emerging technologies.

Voluntary Initiatives and the New Politics of Corporate Greening Robert B. Gibson, 1999-01-01. The diverse range of authors highlight the inherent complexities and controversial nature of the use of corporate voluntary initiatives for environmental improvements. This is an excellent reference book.

Dianne Humphries. Pollution Probe: Outsourcing Management for Supply Chain Operations and Logistics Service Folinas, Dimitris, 2012-08-31. Logistics and Supply Chain Management has been a vital part of every economy and every business entity. Both sciences have become prestigious research fields focusing on best practices, concepts, and methods. Outsourcing Management for Supply Chain Operations and Logistics Services is concentrated on the key players of the outsourcing paradigm: the organizations that provide logistics services, the Third Party Logistics (3PL) s, as well as their clients, presenting and promoting the lessons learned by their cooperation. Specifically, this publication presents studies which are relevant to practitioners, researchers, students, and clients of the application of the Outsourcing practice on the Logistics and Supply Chain Management services, giving emphasis to 3PL s.

Product-Service Integration for Sustainable Solutions Horst Meier, 2013-03-14. An Industrial Product Service System is characterized by the integrated and mutually determined planning, development, provision, and use of product and service shares, including its immanent software components, in Business-to-Business applications and represents a knowledge-intensive socio-technical system. Meier Roy Seliger 2010. Since the first conference in 2009, the CIRP International Conference on Industrial Product Service Systems has become a well-established international forum for the review and discussion of advances, research results, and industrial improvements. Researchers from all over the world have met at previous IPS2 conferences in Cranfield 2009, Linköping 2010, Braunschweig 2011, and Tokyo 2012. In 2013, the 5th CIRP International Conference on Industrial Product Service Systems is held in Bochum. Important topics of IPS2 research presented at the conference are planning and development, sustainability, business models, operation, service engineering, knowledge management, ICT modeling and simulation, marketing, and economic aspects, as well as the role of the human in IPS2.

Computational Intelligence based Optimization of Manufacturing Process for Sustainable Materials Deepak Sinwar, Kamalakanta Muduli, Vijaypal Singh Dhaka, Vijander Singh, 2023-09-25. The text comprehensively discusses computational models including artificial neural networks, agent-based models, and decision field theory for reliability engineering. It will serve as an ideal reference text for graduate students and academic researchers in the fields of industrial engineering, manufacturing engineering, computer engineering, and materials science. Discusses the development of sustainable materials using metaheuristic approaches. Covers computational models such as agent-based models, ontology, and decision field theory for reliability engineering. Presents swarm intelligence methods such as ant colony

optimization particle swarm optimization and grey wolf optimization for solving the manufacturing process Include case studies for industrial optimizations Explores the use of computational optimization for reliability and maintainability theory The text covers swarm intelligence techniques including ant colony optimization particle swarm optimization cuckoo search and genetic algorithms for solving complex industrial problems of the manufacturing industry as well as predicting reliability maintainability and availability of several industrial components Books in Print ,1991 **The ASQ Certified Supplier Quality Professional Handbook** Mark Allen Durivage,Stephanie L.
