Requirements for increased product quality reduced throughput time and enhanced operating effectiveness within a rapidly changing customer demand environment continue to demand a high maintenance performance

In some cases maintenance is required to increase operational effectiveness and revenues and customer satisfaction while reducing capital operating and support costs

This may be the largest challenge facing production enterprises these days

For this maintenance strategy is required to be aligned with the production logistics and also to keep updated with the current best practices

Maintenance has become a multidisciplinary activity and one may come across situations in which maintenance is the responsibility of people whose training is not engineering

This handbook aims to assist at different levels of understanding whether the manager is an engineer a production manager an experienced maintenance practitioner or a beginner
