Younger,2019-11-10 There are millions of people who experience issues related to brain health depression attention issues anxiety forgetfulness fatigue and even chronic pain yet can t figure out what s causing their problems and can t find any relief They may have seen a myriad of doctors many of whom do not take their complaints seriously or worse turn to the easy often inappropriate fix of antidepressants or anti anxiety medications Traditional medications supplements or other therapies haven t worked No matter what their age from children to teens or seniors people and their loved ones are frustrated scared and confused by their continued poor health Countless others display severe psychiatric symptoms that seem to come out of nowhere ranging

from tics obsessive compulsive behaviors and anxiety to depression bipolar like mood swings and even borderline personality disorder and suicidal ideas Sometimes the people affected are the only ones that notices a change to the way they think or feel and they suffer in silence Or they reach out to try to get help and are all too frequently misdiagnosed David Younger a world renowned physician provides relief to these patients and their families His diagnostic techniques and treatment protocols will help readers identify the true cause of their symptoms and put them on a clear path to healing so they no longer feel unbalanced out of control forgetful and exhausted The Autoimmune Brain connects common brain health symptoms to the changes in the immune system and particularly bacterial viral and parasitic infections Younger explains his groundbreaking research and adds a new component how traumatic stress whether physical or emotional and genetics affects this same triad as inextricable factors in initiating disease and brain health symptoms In fact a change in personality behavior coping style and one s emotional state may be the first clue that there is a health problem brewing somewhere else in the body Readers will find new answers to troubling conditions including Alzheimer s disease Anxiety Arthritis Autism Autonomic disturbances Bacterial and viral infections Bipolar Disorder Cancer Celiac disease and gluten intolerances Chronic Fatigue Syndrome now referred to as Systemic Exertion Intolerance Disease Chronic Pain Dementia Depression Endocrine Disorders Immune modulatory therapy using IVIg Lyme disease and co infections Mast cell activation syndrome Medical cannabis Obsessive Compulsive Disorder Orthostatic hypotension Peripheral Neuropathy Porphyrria Post Traumatic Stress Disorder and Postural orthostatic tachycardia
