**The Mind of the Savage** Raoul Allier,1929      **Language and Identity** John Edwards,2009-09-17 The language we use forms an important part of our sense of who we are of our identity This book outlines the relationship between our identity as members of groups ethnic national religious and gender and the language varieties important to each group What is a language What is a dialect Are there such things as language rights Must every national group have its own unique language How have languages large and small been used to spread religious ideas Why have particular religious and linguistic markers been so central singly or in combination to the ways in which we think about ourselves and others Using a rich variety of examples the book highlights the linkages among languages dialects and identities with special attention given to religious ethnic and national allegiances      **The Americas in Early Modern Political Theory** Stephanie B. Martens,2016-05-31 This book examines early modern social contract theories within European representations of the Americas in the 16th and 17th century Despite addressing the Americas only marginally social contract theories transformed American social imaginaries prevalent at the time into Aboriginality allowing for the emergence of the idea of civilization and the possibility for diverse discourses of Aboriginalism leading to excluding and discriminatory forms of subjectivity citizenship and politics What appears then is a form of Aboriginalism pitting the American Aboriginal other against the nascent idea of civilization The legacy of this political construction of difference is essential to contemporary politics in settler societies The author shows the intellectual processes behind this assignation and its role in modern political theory still bearing consequences today The way one conceives of citizenship and sovereignty underlies some of the difficulties settler societies have in accommodating Indigenous claims for recognition and self government      **Nature Across Cultures** Helaine Selin,2013-04-17 Nature Across Cultures Views of Nature and the Environment in Non Western Cultures consists of about 25 essays dealing with the environmental knowledge and beliefs of cultures outside of the United States and Europe In addition to articles surveying Islamic Chinese Native American Aboriginal Australian Indian Thai and Andean views of nature and the environment among others the book includes essays on Environmentalism and Images of the Other Traditional Ecological Knowledge Worldviews and Ecology Rethinking the Western non Western Divide and Landscape Nature and Culture The essays address the connections between nature and culture and relate the environmental practices to the cultures which produced them Each essay contains an extensive bibliography Because the geographic range is global the book fills a gap in both environmental history and in cultural studies It should find a place on the bookshelves of advanced undergraduate students graduate students and scholars as well as in libraries serving those groups      **Paleofantasy: What Evolution Really Tells Us about Sex, Diet, and How We Live** Marlene Zuk,2013-03-18 With evidence from recent genetic and anthropological research Zuk offers a dose of paleoreality Erin Wayman Science News We evolved to eat berries rather than bagels to live in mud huts rather than

condos to sprint barefoot rather than play football or did we Are our bodies and brains truly at odds with modern life Although it may seem as though we have barely had time to shed our hunter gatherer legacy biologist Marlene Zuk reveals that the story is not so simple Popular theories about how our ancestors lived and why we should emulate them are often based on speculation not scientific evidence Armed with a razor sharp wit and brilliant eye opening research Zuk takes us to the cutting edge of biology to show that evolution can work much faster than was previously realized meaning that we are not biologically the same as our caveman ancestors Contrary to what the glossy magazines would have us believe we do not enjoy potato chips because they crunch just like the insects our forebears snacked on And women don't go into shoe shopping frenzies because their prehistoric foremothers gathered resources for their clans As Zuk compellingly argues such beliefs incorrectly assume that we're stuck finished evolving and have been for tens of thousands of years She draws on fascinating evidence that examines everything from adults ability to drink milk to the texture of our ear wax to show that we've actually never stopped evolving Our nostalgic visions of an ideal evolutionary past in which we ate lived and reproduced as we were meant to fail to recognize that we were never perfectly suited to our environment Evolution is about change and every organism is full of trade offs From debunking the caveman diet to unraveling gender stereotypes Zuk delivers an engrossing analysis of widespread paleofantasies and the scientific evidence that undermines them all the while broadening our understanding of our origins and what they can really tell us about our present and our future

**Antiquity, Theatre, and the Painting of Henry Fuseli** Andrei Pop, 2015 In this volume Pop examines how art of the mid 1700s and early 1800s inspired by translations of Greek tragedy reveals a view of modern Europe attempting to recognize its own historical status as one culture among many He analyses this broad view of culture through the lens of Anglo Swiss artist Henry Fuseli s life and work

Rogers ethnographic accounts of the Great Lakes nations      Artistic Visions and the Promise of Beauty Kathleen M. Higgins, Shakti Maira, Sonia Sikka, 2017-03-06 This volume examines the motives behind rejections of beauty often found within contemporary art practice where much critically acclaimed art is deliberately ugly and alienating It reflects on the nature and value of beauty asking whether beauty still has a future in art and what role it can play in our lives generally The volume discusses the possible end of art what art is and the relation between art and beauty beyond their historically Western horizons to include perspectives from Asia The individual chapters address a number of interrelated issues including art beauty and the sacred beauty as a source of joy and consolation beauty as a bridge between the natural and the human beauty and the human form the role of curatorial practice in defining art order and creativity and the distinction between art and craft The volume offers a valuable addition to cross cultural dialogue and in particular to the sparse literature on art and beauty in comparative context It demonstrates the relevance of the rich tradition of Asian aesthetics and the vibrant practices of contemporary art in Asia to Western discussions about the future of art and the role of beauty      Resilience, Reciprocity and Ecological Economics Ronald Trosper, 2009-02-03 This book explores one indigenous society and how they managed to live sustainably with their ecosystems for over two thousand years showing how human systems connect environmental ethics and sustainable ecological practices through institutions      Handbook of British Romanticism Ralf Haekel, 2017-09-11 The Handbook of British Romanticism is a state of the art investigation of Romantic literature and theory a field that probably changed more quickly and more fundamentally than any other traditional era in literary studies Since the early 1980s Romantic studies has widened its scope significantly The canon has been expanded hitherto ignored genres have been investigated and new topics of research explored After these profound changes intensified by the general crisis of literary theory since the turn of the millennium traditional concepts such as subjectivity imagination and the creative genius have lost their status as paradigms defining Romanticism The handbook will feature discussions of key concepts such as history class gender science and the use of media as well as a thorough account of the most central literary genres around the turn of the 19th century The focus of the book however will lie on a discussion of key literary texts in the light of the most recent theoretical developments Thus the Handbook of British Romanticism will provide students with an introduction to Romantic literature in general and literary scholars with a discussion of innovative and groundbreaking theoretical developments      Reality TV Jon Kraszewski, 2017-02-24 From early first wave programs such as Candid Camera An American Family and The Real World to the shows on our television screens and portable devices today reality television consistently takes us to cities such as New York Los Angeles and Boston to imagine the place of urbanity in American culture and society Jon Kraszewski offers the first extended account of this phenomenon as he makes the politics of urban space the center of his history and theory of reality television Kraszewski situates reality television in a larger economic transformation that started in the 1980s when America went from an industrial economy when cities were home to all classes to its post

industrial economy as cities became key points in a web of global financing expelling all economic classes except the elite and the poor Reality television in the industrial era reworked social relationships based on class race and gender for liberatory purposes which resulted in an egalitarian ethos in the genre However reality television of the post industrial era attempts to convince viewers that cities still serve their interests even though most viewers find city life today economically untenable Each chapter uses a key theoretical concept from spatial theory such as power geometries diasporic nostalgia orientalism the imagination of social expulsions and the relationship between the country and the city to illuminate the way reality television engages this larger transformation of urban space in America     Pacific Romanticism Alexander H. Bolyanatz, 2004-10-30 Europeans romanticist imaginings of people from the South Pacific have been around since the Enlightenment and have been significantly informed by the accounts of voyages to Tahiti by people such as Louis Bougainville This book shows that the overtly promiscuous behavior that the French perceived as hospitality on the part of the Tahitians in 1768 was actually a defensive ploy and that our contemporary image of sex and sexuality in Pacific Island societies is influenced by a fantasy based on this French misperception This volume takes a very detailed look at traditional Tahitian culture and society and provides a realistic description of what happened on Tahiti when Europeans encountered the people who lived there Bolyanatz provides a very readable history of South Pacific exploration and Enlightenment thinking Anyone interested in the development of Enlightenment thought and the way it has developed since the 18th century will enjoy this book
