Nobleman And His Housedog:

The Magic Circle of Rudolf II Peter Marshall, 2009-05-26 Rudolf II Habsburg heir Holy Roman Emperor king of Hungary Germany and the Romans is one of history's great characters and yet he remains largely an unknown figure His reign 1576-1612 roughly mirrored that of Queen Elizabeth I of England and while her famous court is widely recognized as a sixteenth-century Who's Who Rudolf's collection of mathematicians alchemists artists philosophers and astronomers among them the greatest and most subversive minds of the time was no less prestigious and perhaps even more influential Driven to understand the deepest secrets of nature and the riddle of existence Rudolf invited to his court an endless stream of genius Danish astronomer Tycho Brahe German mathematician Johannes Kepler English magus John Dee Francis Bacon and mannerist painter Giuseppe Archimboldo among many others Prague became the artistic and scientific center of the known world an island of intellectual tolerance between Catholicism Protestantism and Islam Combining the wonders and architectural beauty of sixteenth-century Prague with the larger-than-life characters of Rudolf's court Peter Marshall provides an exciting new perspective on the pivotal moment of transition between medieval and modern when the foundation was laid for the Scientific Revolution and the Enlightenment

The Theatre of the World Peter H. Marshall, 2011-03-22 A captivating portrait of the crucible of magic science and religion at the court of the doomed dreamer Rudolf II in Renaissance Prague At the end of the sixteenth century the greatest philosophers alchemists astronomers and mathematicians of the day flocked to Prague to work under the patronage of the Holy Roman Emperor Rudolf II The Theatre of the World is the enchanting story of Rudolf II an emperor more interested in the great talents and minds of his times than in the exercise of his power Rarely leaving Prague Castle he gathered around him a galaxy of famous figures the Italian painter Giuseppe Arcimboldo the Danish astronomer Tycho Brahe the German mathematician Johannes Kepler and the English magus John Dee Entranced like Hamlet by the new Renaissance learning Rudolf found it nearly impossible to make decisions He faced the threats of religious discord and the Ottoman Empire along with deepening melancholy and an ambitious younger brother As a result he lost his empire and nearly his sanity but he enabled Prague to enjoy a golden age of peace and creativity before Europe was engulfed in the Thirty Years War The Theatre of the World is a beguiling and dramatic human story filled with angels and devils high art and low cunning talismans and stars It offers a captivating perspective on a pivotal moment in the history of Western Civilization From the Hardcover edition

The Astronomer and the Witch Ulinka Rublack, 2015-10-23 Johannes Kepler 1571-1630 was one of the most admired astronomers who ever lived and a key figure in the scientific revolution A defender of Copernicus's sun-centred universe he famously discovered that planets move in ellipses and defined the three laws of planetary motion Perhaps less well known is that in 1615 when Kepler was at the height of his career his widowed mother Katharina was accused of witchcraft The proceedings led to a criminal trial that lasted six years with Kepler conducting his mother's defence In The Astronomer and the Witch Ulinka Rublack pieces

together the tale of this extraordinary episode in Kepler's life one which takes us to the heart of his changing world First and foremost an intense family drama the story brings to life the world of a small Lutheran community in the centre of Europe at a time of deep religious and political turmoil a century after the Reformation and on the threshold of the Thirty Years War Kepler's defence of his mother also offers us a fascinating glimpse into the great astronomer's world view on the cusp between Reformation and scientific revolution While advancing rational explanations for the phenomena which his mother's accusers attributed to witchcraft Kepler nevertheless did not call into question the existence of magic and witches On the contrary he clearly believed in them And as the story unfolds it appears that there were moments when even Katharina's children wondered whether their mother really did have nothing to hide *Prague Pictures* John Banville, 2010-12-15

Prague is the magic capital of Europe Since the days of Emperor Rudolf II devotee of the stars and cultivator of the spagyric art who in the late 1500s summoned alchemists and magicians from all over the world to his castle on Hradcany hill it has been a place of mystery and intrigue Wars revolutions floods the imposition of Soviet communism or even the depredations of the tourist boom after the Velvet Revolution of 1989 could not destroy the unique atmosphere of this beautiful proud and melancholy city on the Vltava John Banville traces Prague's often tragic history and portrays the people who made it the emperors and princes geniuses and charlatans heroes and scoundrels and paints a portrait of the Prague of today revelling in its newfound freedoms eager to join the European Community and at the same time suspicious of what many Praguers see as yet another totalitarian takeover He writes of his first visit to the city in the depths of the Cold War when he engaged in a spot of art smuggling and of subsequent trips there of the people he met the friends he made the places he came to know

Enchantment Of Urania, The: 25 Centuries Of Exploration Of The Sky Massimo Capaccioli, 2024-03-19 Today we know much about the sky how stars are born how they live and die and how the universe as a whole evolves We have learned of the existence of another type of matter indifferent to light and yet decisive for the formation of galaxies and we have a hint of a dark energy that since the last 4.5 billion years has taken over the control of the cosmos We postulated and then discovered and even photographed black holes and listened to the faint rustle of the space time ripple produced when these monsters devour each other We reached these astonishing results recognized by a bunch of Nobel Prizes and filling every day the media with wonders for the eyes and the mind by the marriage of physics and astronomy that unified the Earth with the sky and then by the leap forward of science and technology in the Twentieth Century This rich heritage has ancient roots It was built by accumulating discoveries with errors observations with fantasies myths and superstitions with flashes of genius over a span of millennia since Homo sapiens turning his eyes to the immutable and perfect sky began to ask questions The book is a narration of the answers to these questions that had evolved over time a progressive path inserted in the general history with some second thoughts and many obstacles This is a saga of men and machines where greatness sometimes mixes with misery and passion often borders on sacrifice and even martyrdom Why should we know it Because our current knowledge is

the result of these efforts and of the preconceptions that accompanied them The challenge has been to present this complex and intricate subject without resorting to any formulas so that it can be accessible to a wide audience of curious people including high school and university students and in general all those who normally keep themselves informed of scientific things A rich bibliography has also been added in the appendix for those wishing to learn more on one or more topics

Edison's Ghosts Katie Spalding, 2023-05-16

Publishers Weekly Best Summer Reads Overturn everything you knew about history's greatest minds in this raucous and hilarious book where it turns out there's a finer line between genius and idiot than we've previously known As Albert Einstein almost certainly never said everyone is a genius but if you judge a fish by its ability to climb a tree it will live its whole life believing that it is stupid So begins Katie Spalding's spunky takedown of the Western canon and how genius may not be as irrefutably great as we commonly understand While most of us may never become Einstein it may surprise you to learn that there's probably a bunch of stuff you can do that Einstein couldn't And as Spalding shows the famous prodigies she explores here were quite odd by any definition For example Thomas Edison inventor of the lightbulb believed that he could communicate with the undead and built the world's very first hotline to heaven the Spirit Phone Marie and Pierre Curie famous for discovering radioactivity slept next to a lump of radioactive material for years and strapped it to their arms to watch it burn them in real time Lord Byron acclaimed British poet literally took a bear with him to university Isaac Newton discovered the laws of gravity and motion but he also looked up at the sun without eye protection The result Three days of blindness Tesla whose scientific work led to the invention of the AC unit fell in love with a pigeon Edison's Ghosts is filled

served as our timekeepers our navigators our muses they were once even our gods How radically different would we be Trotta also asks if our ancestors had looked up to the night sky and seen nothing He pairs the history of our starstruck species with a dramatic alternate version a world without stars where our understanding of science art and ourselves would have been radically altered Revealing the hidden connections between astronomy and civilization Starborn summons us to the marvelous sight that awaits us on a dark clear night to lose ourselves in the immeasurable vastness above
