Music Seriously Simon Frith,2017-07-05 As a sociologist Simon Frith takes the starting point that music is the result of the play of social forces whether as an idea an experience or an activity The essays in this important collection address these forces recognising that music is an effect of a continuous process of negotiation dispute and agreement between the individual actors who make up a music world The emphasis is always on discourse on the way in which people talk and write about music and the part this plays in the social construction of musical meaning and value The collection includes nineteen essays some of which have had a major impact on the field along with an autobiographical introduction **Western Music and Its Others** Georgina Born,David Hesmondhalgh,2000-10-15 Western Music and Its Others will be taken as an important book signalling a new turn within the field It takes the best features of traditional rigorous scholarship and brings these to

Non-Western Popular Music Tony Langlois, 2017-07-05 This collection provides readers with a diverse and contemporary overview of research in the field Drawing upon scholarly writing from a range of disciplines and approaches it provides case studies from a wide range of non-Western musical contexts In so doing the volume attends to the central themes that have emerged in this area of popular music studies cultural politics identity and the role of technology This collection does not seek to establish a new theoretical paradigm but being primarily aimed at researchers and students offers as comprehensive a view of the research that has

been carried out over the last few decades as possible given the global scope of the subject. Inevitably the experience of globalisation itself runs through many of the contributions not only because musicians find themselves part of an immense flow of international culture, technology and finance but also because Western scholarship can also be considered an aspect of such a flow. The articles selected for the volume take different disciplinary approaches: many are close ethnographic descriptions of musical practices whilst others take a more historical view of a musical scene or even a single musician. Some essays consider the effects of emerging technologies upon the production, dissemination and consumption of music whilst the political context is central to other authors. The collection as a whole serves as a resource for those who wish to be better acquainted with the diversity of research that has been carried out into non-western pop whilst also highlighting the broader themes that have so far shaped academic approaches to the subject.

The Contemporary Literature-Music

Relationship Hazel Smith, 2016-04-20 This book explores the relationship between words and music in contemporary texts examining in particular the way that new technologies are changing the literature-music relationship. It brings an eclectic and novel range of interdisciplinary theories to the area of musicology, literary studies, drawing from the fields of semiotics, disability studies, musicology, psychoanalysis, music psychology, emotion and affect theory, new media, cosmopolitanism, globalization, ethnicity and biraciality. Chapters range from critical analyses of the representation of music and the musical profession in contemporary novels to examination of the forms and cultural meanings of contemporary intermedia and multimedia works. The book argues that conjunctions between words and music create emergent structures and meanings that can facilitate culturally transgressive and boundary-interrogating effects. In particular it conceptualises ways in which word-music relationships can facilitate cross-cultural exchange as musicology, literary miscegenation using interracial sexual relationships as a metaphor. Smith also inspects the dynamics of improvisation and composition and the different ways they intersect with performance. Furthermore the book explores the huge changes that computer-based real-time algorithmic text and music generation are making to the literature-music nexus. This volume provides fascinating insight into the relationship between literature and music and will be of interest to those fields as well as New Media and Performance Studies.
