Furniture Design Jim Postell, 2012-10-09 The comprehensive guide to furniture design expanded and updated Furniture designers draw on a range of knowledge and disciplines to create their work From history to theory to technology Furniture Design offers a comprehensive survey of the essential craft and practice related aspects of furniture design Generously illustrated with photographs and drawings including a new color section this Second Edition features updated coverage of material specifications green design digital design and fabrication technologies It also features twenty five case studies of furniture design that represent a broad selection of works designers and techniques including recent designs produced within the last decade The book explores Furniture function and social use Form spatial organization and typological orders Structural integrity and composition Accessibility universal design human factors and ergonomics The design process from schematics through fabrication Materials processes and methods of fabrication Professional practice and marketing The history of furniture design from prehistory to the digital age Complete with a glossary of terms and a comprehensive bibliography Furniture Design Second Edition is a one stop resource that furniture designers will turn to regularly for the advice guidance and information needed to perform their craft The Politics of Furniture Freddie Floré, Cammie McAtee, 2017-02-10 In many different parts of the world modern furniture elements have served as material expressions of power in the post war era They were often meant to express an international and in some respects apolitical modern language but when placed in a sensitive setting or a meaningful architectural context they were highly capable of negotiating or manipulating ideological messages The agency of modern furniture was often less overt than that of political slogans or

statements but as the chapters in this book reveal it had the potential of becoming a persuasive and malleable ally in very diverse politically charged arenas including embassies governmental ministries showrooms exhibitions design schools libraries museums and even prisons This collection of chapters examines the consolidating as well as the disrupting force of modern furniture in the global context between 1945 and the mid 1970s The volume shows that key to understanding this phenomenon is the study of the national as well as transnational systems through which it was launched promoted and received While some chapters squarely focus on individual furniture elements as vehicles communicating political and social meaning others consider the role of furniture within potent sites that demand careful negotiation whether between governments cultures or buyer and seller In doing so the book explicitly engages different scholarly fields design history history of interior architecture architectural history cultural history diplomatic and political history postcolonial studies tourism studies material culture studies furniture history and heritage and preservation studies Taken together the narratives and case studies compiled in this volume offer a better understanding of the political agency of post war modern furniture in its original historical context At the same time they will enrich current debates on reuse relocation or reproduction of some of these elements

Design Anthropology Alison J. Clarke, 2017-11-16 Design Anthropology brings together leading international design theorists consultants and anthropologists to explore the changing object culture of the 21st century Decades ago product designers used basic market research to fine tune their designs for consumer success Today the design process has been radically transformed with the user center stage in the design process From design ethnography to culture probing innovative designers are employing anthropological methods to elicit the meanings rather than the mere form and function of objects This important volume provides a fascinating exploration of the issues facing the shapers of our increasingly complex material world The text features case studies and investigations covering a diverse range of academic disciplines From IKEA and anti design to erotic twenty first century needlework and online interior decoration the book positions itself at the intersections of design anthropology material culture architecture and sociology

Conceptual Joining Lukas Allner, Christoph Kaltenbrunner, Daniela Kröhnert, Philipp Reinsberg, Institute of Architecture at the University of Applied Arts Vienna, Institute of Art Sciences and Art Education at the University of Applied Arts Vienna, 2021-11-22 This book explores experimental approaches to the design and construction of wooden structures in architecture while presenting the results of an artistic research project Through the use of digital tools the anatomy of wood becomes a design determining principle for spatial structures The architects and artists also explore the potential of traditional craftsmanship and derive from this a material oriented practice Structures are not designed here for a specific use but rather open up various usage possibilities due to their unique spatial and geometric properties The documentation provides insight into an open ended research process Guest contributions reflect on the underlying concepts and thus the future relevance of wood as a building material
