Lion Craig Packer, 2023-03-28 An authoritative accessible and gorgeously illustrated exploration into the lives of these remarkable animals Lions are the only social cat They hunt together raise cubs together and defend territories together against neighbors and strangers Lions also rest atop their ecological pyramid with profound impacts on competitors and prey alike but their future is far from assured Craig Packer interweaves his discoveries from more than forty years of research including a substantial body of new findings to provide an unforgettable portrait of the African lion He shares insights into the intricacies of lion life from birth until death and describes efforts to conserve lions in an increasingly crowded continent With a wealth of breathtaking photographs by Daniel Rosengren The Lion sheds light on a host of intriguing scientific questions such as why males have manes why lions are social how sociality limits and stabilizes lion populations how close inbreeding affects lion health why lions become man eaters how lions and people can best be protected from each other and how to ensure the lion s survival into the next century Engagingly written by the world s foremost expert on African lions Integrates a wealth of findings from two of the most comprehensive field studies on any animal Features hundreds of stunning photographs that capture a broad range of lion behaviors ecological interactions and conservation challenges Blends vivid field anecdotes and graphics to give the reader a sense of adventuring into the lion s world The Genetics Of Altruism Scott Boorman, Paul R. Levitt, 2012-12-02 The Genetics of Altruism covers the primary findings on social evolution social trait and altruism from a population genetics standpoint to establish a system of genetic boxes It presents an evolutionary question with two faces Why are there so many social species Why in all the diversity of the animal kingdom are the social species so few To address the evolutionary question this book focuses on recognition of the fact that on an evolutionary time scale genetics must underlie all changes in the capacity for social structure and other aspects of organic evolution It presents comparative analyses framed in mathematical terms mathematical concepts as a means of getting outside human perhaps more generally primate and carnivore frames of reference and alternative network combinatorics as a natural basis for comparing social structures that are phylogenetically remote It also discusses the comparative biology of social behavior on a purely descriptive basis through the social and evolutionary structures emergent The book concludes by discussing major evolutionary pathways various kinds of preadaptedness for sociality and the use of cascade principle to

suggest ways in which human evolution may have been a special case This book is a valuable resource for biologists social scientists researchers students and all those who want to broaden their knowledge in the field of social behavior and altruism

Animals of the Serengeti Adam Scott Kennedy,Vicki Louise Kennedy,2014-03-02 Containing 146 color photos this book looks at the mammals and reptiles most likely to be encountered in the world famous Serengeti National Park and Ngorongoro Crater It includes 89 species of mammal and reptile The Garden ,2003 *Kalahari Cheetahs* Gus Mills,Margaret Mills,2017-07-05 The cheetah the fastest terrestrial animal has widespread appeal amongst wildlife biologists and enthusiasts alike However like all all large carnivores it is increasingly threatened by habitat loss and its status is now classified as Vulnerable by the IUCN This is the first comprehensive study of cheetah biology in an arid environment a major component of its current distribution range The book brings together results from an intensive six year study of the cheetah by the authors in the Kgalagadi Transfrontier Park in South Africa and Botswana It documents a wealth of detailed and direct observations of cheetah population biology and behavioural ecology adopting an evolutionary approach and providing a conceptual framework for future research and applied management in the context of global environmental change *Kalahari Cheetahs* covers topics such as optimal foraging theory hunting strategies and predator prey relations mating systems and reproductive strategies and success inter specific competition demography social organisation and population limitation Comparisons with previous cheetah studies reveal the variability of ecological determinants on behaviour and the behavioural flexibility and ability of these carnivores to adapt to different environments This advanced textbook is suitable for graduate level students as well as professional researchers in felid behavioural ecology and conservation biology It will also be of relevance and use to conservationists wildlife managers and African wildlife enthusiasts **Humans and Lions** Keith Somerville,2019-07-10 This book places lion conservation and the relationship between people and lions both in historical context and in the context of the contemporary politics of conservation in Africa The killing of Cecil the Lion in July 2015 brought such issues to the public s attention Were lions threatened in the wild and what was the best form of conservation How best can lions be saved from extinction in the wild in Africa amid rural poverty precarious livelihoods for local communities and an expanding human population This book traces man s relationship with lions through history from hominids to the Romans through colonial occupation and independence to the present day It concludes with an examination of the current crisis of conservation and the conflict between Western animal welfare concepts and sustainable development thrown into sharp focus by the killing of Cecil the lion Through this historical account Keith Somerville provides a coherent evidence based assessment of current human lion relations providing context to the present situation This book will be of interest to students and scholars of environmental and African history wildlife conservation environmental management and political ecology as well as the general reader **Africa is Adventure** Attilio Gatti,1959 **Ecological Aspects of Social Evolution** Daniel I. Rubenstein,Richard W. Wrangham,2014-07-14 Seeking common principles of social evolution in different

taxonomic groups the contributors to this volume discuss eighteen groups of birds and mammals for which long term field studies have been carried out They examine how social organization is shaped by the interaction between proximate ecological pressures and culture the social traditions already in place and shaped by local and phylogenetic history Originally published in 1987 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905 **Africa Alone** Sandy McMath,1983 Neurobiology of

Chemical Communication Carla Mucignat-Caretta,2014-02-14 Intraspecific communication involves the activation of chemoreceptors and subsequent activation of different central areas that coordinate the responses of the entire organism ranging from behavioral modification to modulation of hormones release Animals emit intraspecific chemical signals often referred to as pheromones to advertise their presence to members of the same species and to regulate interactions aimed at establishing and regulating social and reproductive bonds In the last two decades scientists have developed a greater understanding of the neural processing of these chemical signals Neurobiology of Chemical Communication explores the role of the chemical senses in mediating intraspecific communication Providing an up to date outline of the most recent advances in the field it presents data from laboratory and wild species ranging from invertebrates to vertebrates from insects to humans The book examines the structure anatomy electrophysiology and molecular biology of pheromones It discusses how chemical signals work on different mammalian and non mammalian species and includes chapters on insects Drosophila honey bees amphibians mice tigers and cattle It also explores the controversial topic of human pheromones An essential reference for students and researchers in the field of pheromones this is also an ideal resource for those working on behavioral phenotyping of animal models and persons interested in the biology ecology of wild and domestic species

Lions in the Balance Craig Packer,2015-09-15 From the author of the memoir Into Africa a fast paced unsentimental sequel about the Serengeti lions and the politics of protecting them Discover If you are a morani warrior you have your spear at the ready you could be the hero but you will have to wait until the morning light before you can go out and prove yourself If it is a lion you want to be the first to spear it and if the lion turns on you make sure it mauls you on your chest or stomach on your face shins or throat Any place where you can show your scars with pride show the incontrovertible evidence of courage A scar on your back would be a permanent reminder of cowardice an ineradicable trace of shame Monsters take many forms from man eating lions to the people who hunt them from armed robbers to that midnight knock at the door of a cheap hotel room in Dar es Salaam And celebrated biologist Craig Packer has faced them all Head on With Lions in the Balance Packer takes us back into the complex tooth and claw world of the African lion offering revealing insights into both

the lives of one of the most iconic and dangerous animals on earth and the very real risks of protecting them A sequel to his prize winning Into Africa which gave many readers their first experience of fieldwork in Africa of cooperative lions on dusty savannas and political kidnappings on the shores of Lake Tanganyika this new diary based chronicle of cutting edge research and heartbreaking corruption will both alarm and entertain Packer's story offers a look into the future of the lion one in which the politics of conservation will require survival strategies far more creative and powerful than those practiced anywhere in the world today Packer is sure to infuriate millionaires politicians aid agencies and conservationists alike as he minces no words about the problems he encounters But with a narrative stretching from far flung parts of Africa to the corridors of power in Washington DC and marked by Packer's signature humor and incredible candor Lions in the Balance is a tale of courage against impossible odds a masterly blend of science adventure and storytelling and an urgent call to action that will captivate a new generation of readers Praise for Lions in the Balance Lions in the Balance mixes episodes of spy novel intrigue with detailed descriptions of scientific studies and PowerPoint presentations New York Times One of the top books of the year This candid volume is sure to divide opinion but it is far more than a chronicle of Packer's campaigns There are also dozens of surprising facts about the book's heroes the lions and measured commentary on a host of complex issues The book will make you think Geographical

Mammals of Africa: Volume V Jonathan Kingdon, 2014-11-20 Mammals of Africa MoA is a series of six volumes which describes in detail every currently recognized species of African land mammal This is the first time that such extensive coverage has ever been attempted and the volumes incorporate the very latest information and detailed discussion of the morphology distribution biology and evolution including reference to fossil and molecular data of Africa's mammals With more than 1 160 species and 16 18 orders Africa has the greatest diversity and abundance of mammals in the world The reasons for this and the mechanisms behind their evolution are given special attention in the series Each volume follows the same format with detailed profiles of every species and higher taxa The series includes hundreds of colour illustrations and pencil drawings by Jonathan Kingdon highlighting the morphology and behaviour of the species concerned as well as line drawings of skulls and jaws by Jonathan Kingdon and Meredith Happold Every species also includes a detailed distribution map Edited by Jonathan Kingdon David Happold Tom Butynski Mike Hoffmann Meredith Happold and Jan Kalina and written by more than 350 authors all experts in their fields Mammals of Africa is as comprehensive a compendium of current knowledge as is possible Extensive references alert readers to more detailed information Volume V edited by Jonathan Kingdon and Michael Hoffmann comprises 83 species of carnivores and includes jackals wolves dogs foxes weasels polecats striped weasels Zorilla otters Ratel fur seals monk seals Palm Civet cats genets linsangs African Civet hyaenas Aardwolf and mongooses The volume is completed with profiles of four pangolins four zebras and two rhinoceroses

Pride of Lions Brian C. R. Bertram, 1978 **The Call of Carnivores** Prof. Hans Kruuk, 2019-03-11 Carnivores include some of the most impressive dangerous and mysterious animals in the world Hans

Kruuk has spent his life studying them against magnificent backdrops from the Serengeti savannahs and Kalahari deserts to the Scottish Highlands from the Galapagos Islands to the Far East In each location he has used meticulous observation of animal behaviour to understand the ecology and natural history of wild carnivore populations and ultimately to promote their conservation This book describes the methods challenges and rewards of the science of behavioural ecology However it essentially concerns the personal rather than the scientific side of that work and above all the field experiences involved With photographs and line drawings it brings to life African safaris the hyena in his bath flights with vultures dives with otters attacks by a badger in Scotland and by feral dogs in Galapagos gull eating hedgehogs in Britain and the role of animals in African witchcraft The author communicates his lifelong fascination with wildlife through these unique experiences and the insights they afforded him Professor Kruuk is a leading authority on animal behaviour and the author of classic studies of hyaenas otters and badgers as well as a biography of his Oxford mentor Niko Tinbergen *The Marsh Lions* Brian Jackman, Jonathan Scott, 2012 For five years Brian Jackman and Jonathan Scott followed the Marsh pride recording the daily drama of life and death in Kenya's finest big game country In time they came to regard many of the lions as old and familiar companions the irascible Notch and her half sister Shadow the misfit Mkubwa and the majestic Scar These lions are real individuals whose lives intimately observed and illustrated offer a unique insight into the world of the African plain Back cover *G.K. Hall Interdisciplinary Bibliographic Guide to Black Studies* Schomburg Center for Research in Black Culture, 2003
