none of them correctly answer the question Where did the Polynesians come from This book is a thoughtful and devastating critique of such new learning and a careful and accessible survey of modern archaeological anthropological genetic and linguistics findings about the origins of Pacific Islanders Professor Howe also examines the two hundred year old history of Western ideas about Polynesian origins in the context of ever changing fads and intellectual fashions [The People of the Sea](#) Paul D'Arcy,2006-01-01 Countering the dominant paradigms of recent Pacific Islands historiography which tend to limit understanding of the sea s importance this volume emphasizes the flux in the maritime environment and how it instilled an expectation and openness toward outside influences and the rapidity with which cultural change could occur in relations between various Islander groups Students and scholars of Pacific history and environmental and cultural studies will welcome this re evaluation of the sea s influence in Oceanic history **BOOK JACKET The Hawaiian Honeycreepers** H. Levstik, Keith C. Barton, 2018-02-06 The authors research is well known and among the most important American works being done on how children learn history It is thus a great idea to gather this pivotal research in one place The volume offers a new perspective through the authors reflections on the research process It is profound without pomposity ideal for the intended audience the tone is just right There really isn't another book that does what this one does Stephen J Thornton University of South Florida *Researching History Education* combines a selection of Linda Levstik's and Keith Barton's previous work on

teaching and learning history with their reflections on the process of research. These studies address students' ideas about time, evidence, significance, and agency, as well as classroom contexts of history education and broader social influences on students and teachers' thinking. These pieces, widely cited in history and social studies education, and typically required reading for students in the area, were chosen to illustrate major themes in the authors' own work and trends in recent research on history education. In a series of new chapters written especially for this volume, the authors introduce and reflect on their empirical studies and address three issues suggested in the title of the volume: theory, method, and context. Although research on children's and adolescents' historical understanding has been the most active area of scholarship in social studies in recent years, as yet there is little in-depth attention to research methodologies or to the perspectives on children's history and historical thinking that these methodologies represent. This book fills that need. The authors hope it will help scholars draw from the existing body of literature in order to participate in more meaningful conversations about the teaching and learning of history.

Researching History Education provides a needed resource for novice and experienced researchers and will be especially useful in research methodology courses both in social studies and more generally because of its emphasis on techniques for interviewing children, the impact of theory on research, and the importance of cross-cultural comparisons.

Ocean Country Liz Cunningham, 2015-09-08. *Ocean Country* is an adventure story, a call to action, and a poetic meditation on the state of the seas. But most importantly, it is the story of finding true hope in the midst of one of the greatest crises to face humankind: the rapidly degrading state of our environment. After a near-drowning accident in which she was temporarily paralyzed, Liz Cunningham crisscrosses the globe in an effort to understand the threats to our dazzling but endangered oceans. This intimate account charts her thrilling journey through unexpected encounters with conservationists, fishermen, sea nomads, and scientists in the Mediterranean, Sulawesi, the Turks and Caicos Islands, and Papua New Guinea.

Historical Empathy and Perspective Taking in the Social Studies Ozro Luke Davis, Elizabeth Anne Yeager, Stuart J. Foster, 2001. Contributors to this volume offer insights from the discipline of history about the nature of empathy and the necessity of examining perspectives on the past. On the basis of recent classroom research, they suggest tested guides to more robust teaching. The contributors insist that with experienced history and social studies teachers, students can learn many historical details and with the use of empathy, develop deepened and textured interpretations of the history that they study.
