*Non-Connected Convexities and Applications* G. Cristescu, L. Lupşa, 2013-12-01 Lectori salutem The kind reader opens the book that its authors would have liked to read it themselves but it was not written yet Then their only choice was to write this book to fill a gap in the mathematical literature The idea of convexity has appeared in the human mind since the antiquity and its fertility has led to a huge diversity of notions and of applications A student intending a thoroughgoing study of convexity has the sensation of swimming into an ocean It is due to two reasons the first one is the great number of properties and applications of the classical convexity and second one is the great number of generalisations for various purposes As a consequence a tendency of writing huge books guiding the reader in convexity appeared during the last twenty years for example the books of P M Gruber and J M Willis 1993 and R J Webster 1994 Another last years tendency is to order from some point of view as many convexity notions as possible for example the book of I Singer 1997 These approaches to the domain of convexity follow the previous point of view of axiomatizing it A Ghika 1955 W Prenowitz 1961 D Voiculescu 1967 V W Bryant and R J Webster 1969 Following this last tendency our book proposes to the reader two classifications of convexity properties for sets both of them starting from the internal mechanism of defining them **Mathematical Reviews** ,2006
