Globalization and Technocapitalism Professor Luis Suarez-Villa,2013-01-28 Globalization and Technocapitalism considers the global reach of a new capitalist era exploring the nature of technocapitalism as grounded in new forms of accumulation commodification and corporate organization As technological creativity corporate research and talent flows become more important than ever this book explores the manner in which globalization acquires new contextual features that will become central to the macro social dynamics of the twenty first century It thus sheds light on the resultant growth in global inequalities and more intrusive forms of global domination

that are grounded in emerging sectors such as nanotechnology biotechnology and its diverse fields such as genomics synthetic bioengineering bioinformatics and biopharmacology and related advances in computing and telecommunications A rigorous examination of developments in contemporary capitalism as driven by the forces of globalization Globalization and Technocapitalism will be of interest to scholars working in the fields of social and political theory international political economy political philosophy science and technology studies and globalization

Corporate Power, Oligopolies, and the Crisis of the State Luis Suarez-Villa, 2014-12-09 The largest wealthiest corporations have gained unprecedented power and influence in contemporary life From cradle to grave the decisions made by these entities have an enormous impact on how we live and work what we eat our physical and psychological health what we know or believe whom we elect and how we deal with one another and with the natural world around us At the same time government seems ever more subservient to the power of these oligopolies providing numerous forms of corporate welfare tax breaks subsidies guarantees and bailouts while neglecting the most basic needs of the population In *Corporate Power Oligopolies and the Crisis of the State* Luis Suarez Villa employs a multidisciplinary perspective to provide unprecedented documentation of a growing crisis of governance marked by a massive transfer of risk from the private sector to the state skyrocketing debt great inequality and economic insecurity along with an alignment of the interests of politicians and a new minuscule but immensely wealthy and influential corporate elite Thanks to this dysfunctional environment Suarez Villa argues stagnation and a vanishing public trust have become the hallmarks of our time

Technocapitalism Luis Suarez-Villa, 2012-08-03 A new version of capitalism grounded in technology and science is spawning new forms of corporate power and organization that will have major implications for the twenty first century Technological creativity is thereby turned into a commodity in new corporate regimes that are primarily oriented toward research and intellectual appropriation This phenomenon is likely to have major social economic and political consequences as the new corporatism becomes ever more intrusive and rapacious through its control over technology and innovation In his provocative book *Technocapitalism* Luis Suarez Villa addresses this phenomenon from the perspective of radical political economy and social criticism Grounded in the premise that relations of power influence how human creativity and technology are exploited by the new corporatism the author argues that new forms of democratic participation and resistance are needed if the social pathologies created by this new version of capitalism are to be checked Considering the new sectors affected by technocapitalism such as biotechnology nanotechnology bioinformatics and genomics Suarez Villa deciphers the common threads of power and organization that drive their corporatization These new sectors and the corporate apparatus set up to extract profit and power through them are imposing standards creating business models molding social governance and influencing social relations at all levels The new reality they create is likely to affect most every aspect of human existence including work health life and nature itself

Insbesondere kleinere Stadtwerke sind durch die Liberalisierung der europäischen Strommärkte in ihrer Existenz bedroht. Um im Wettbewerb bestehen zu können, bieten sich Unternehmensnetzwerke als Lösung an. Ihre Etablierung scheitert jedoch häufig. Gründe hierfür sind die hochgradige Komplexität politischer Interessen, mangelndes Vertrauen in die Kooperationspartner sowie unternehmenskulturelle Probleme. Florian Meister analysiert detailliert sechs erfolgreiche und ein gescheitertes Netzwerk und zeigt, wie Netzwerke im Allgemeinen und in der Energiewirtschaft im Speziellen erfolgreich realisiert werden können. Neben betriebswirtschaftlichen Fragen untersucht er insbesondere soziologische und psychologische Aspekte. Themen sind u.a. Machtverteilung, Vertrauensaufbau, Regionalität und zu betragende Netzwerkinhalte. Der Autor entwickelt einen ganzheitlichen Change Management Ansatz zur Etablierung von Unternehmensnetzwerken und identifiziert branchenspezifische sowie branchenübergreifende Erfolgs- und Misserfolgskriterien für die praktische Umsetzung.
