None Of The Above Behind The Myth Of Scholastic Aptitude:

None of the Above David Owen, 1985 *There's No Such Thing As Free Speech* Stanley Fish, 1994-12-15 In an era when much of what passes for debate is merely moral posturing traditional family values versus the cultural elite free speech versus censorship or reflexive name calling the terms liberal and politically correct are used with as much dismissive scorn by the right as reactionary and fascist are by the left Stanley Fish would seem an unlikely lightning rod for controversy A renowned scholar of Milton head of the English Department of Duke University Fish has emerged as a brilliantly original critic of the culture at large praised and pilloried as a vigorous debunker of the pieties of both the left and right His mission is not to win the cultural wars that preoccupy the nation's attention but rather to redefine the terms of battle In *There's No Such Thing as Free Speech* Fish takes aim at the ideological gridlock paralyzing academic and political exchange in the nineties In his witty accessible dissections of the swirling controversies over multiculturalism affirmative action canon revision hate speech and legal reform he neatly eviscerates both the conservatives claim to possession of timeless transcendent values the timeless transcendence of which they themselves have conveniently identified and the intellectual left's icons of equality tolerance and non discrimination He argues that while conservative ideologues and liberal stalwarts might disagree vehemently on what is essential to a culture or to a curriculum both mistakenly believe that what is essential can be identified apart from the accidental circumstances of time and history to which the essential is ritually opposed In the book's first section which includes the five essays written for Fish's celebrated debates with Dinesh D Souza the author and former Reagan White House policy analyst Fish turns his attention to the neoconservative backlash In his introduction Fish writes Terms that come to us wearing the label apolitical common values fairness merit color blind free speech reason are in fact the ideologically charged constructions of a decidedly political agenda I make the point not in order to level an accusation but to remove the sting of accusation from the world politics and redefine it as a synonym for what everyone inevitably does Fish maintains that the debate over political correctness is an artificial one because it is simply not possible for any party or individual to occupy a position above or beyond politics Regarding the controversy over the revision of the college curriculum Fish argues that the point is not to try to insist that inclusion of ethnic and gender studies is not a political decision but to point out that any alternative curriculum say a diet of exclusively Western or European texts would be no less politically invested In Part Two Fish follows the implications of his arguments to a surprising rejection of the optimistic claims of the intellectual left that awareness of the historical roots of our beliefs and biases can allow us as individuals or as a society to escape or transcend them Specifically he turns to the movement for reform of legal studies and insists that a dream of a legal culture in which no one's values are slighted or declared peripheral can no more be realized than the dream of a concept of fairness that answers to everyone's notions of equality and justice or a yardstick of merit that is true to everyone's notions of worth and substance Similarly he argues that attempts to politicize the study of literature are ultimately misguided

because recharacterizations of literary works have absolutely no impact on the mainstream of political life He concludes his critique of the academy with *The Unbearable Ugliness of Volvos* an extraordinary look at some of the more puzzling if not out and out masochistic characteristics of a life in academia Penetrating fearless and brilliantly argued *There s No Such Thing as Free Speech* captures the essential Fish It is must reading for anyone who cares about the outcome of America s cultural wars

The Case Against the SAT James Crouse,Dale Trusheim,1988-03-31 The College Entrance Examination Board and the Educational Testing Service claim that the SAT helps colleges select students helps college bound students select appropriate institutions and furthers equality of opportunity But does it really Drawing on three national surveys and on hundreds of studies conducted by colleges the authors refute the justifications the College Board and the ETS give for requiring high school students to take the SAT They show that the test neither helps colleges and universities improve their admissions decisions nor helps applicants choose schools at which they will be successful They outline the adverse effect the SAT has on students from nonwhite and low income backgrounds They also question the ability of the College Board and the ETS to monitor themselves adequately The authors do not however recommend abolishing either college admissions testing or the College Board and the ETS Rather they propose dropping the SAT and relying on such already available measures as students high school coursework and grades and they raise the possibility that new achievement tests that measure the mastery of high school courses could be developed to replace the SAT

Gender/body/knowledge Alison M. Jaggar,Susan Bordo,1989 The essays in this interdisciplinary collection share the conviction that modern western paradigms of knowledge and reality are gender biased Some contributors challenge and revise western conceptions of the body as the domain of the biological and natural the enemy of reason typically associated with women

Reclaiming Education for Democracy Paul Shaker,Elizabeth E. Heilman,2010-04-26 *Reclaiming Education for Democracy* subjects the prophets and doctrines of educational neoliberalism to scrutiny in order to provide a rationale and vision for public education beyond the limits of *No Child Left Behind* The authors combine a history of recent education policy with an in depth analysis of the origins of such policy and its impact on professional educators The public face of these policies is separated from motives rooted in politics profit and ideology The book also searches for new insights in understanding the neoliberal and managerialist assault on education by examining the psychology of advocates who demonstrate a special animus toward universal public education The manipulation of public education by *No Child Left Behind* is a case study in the general approach to public institutions taken by the politicians and theorists in these camps K 12 education has been subjected to deceptive descriptive analyses marginalization of its professional leadership manipulation of its goals the imposition of illegitimate quality markers a grab on its resources by corporate profiteers and a demoralization of its rank and file This book helps us think beyond this new commonsense of education Recipient 2009 AERA Division K Award for Exemplary Research in Teaching and Teacher Education

A History of Psychology Thomas Hardy Leahey,2017-10-02 A History of Psychology places social economic and political forces of change alongside psychology s internal theoretical and empirical arguments illuminating how the external world has shaped psychology s development and in turn how the late twentieth century s psychology has shaped society Featuring extended treatment of important movements such as the Enlightenment and the Scientific Revolution the textbook approaches the material from an integrative rather than wholly linear perspective The text carefully examines how issues in psychology reflect and affect concepts that lie outside the field of psychology s technical concerns as a science and profession This new edition features expanded attention on psychoanalysis after its founding as well as new developments in cognitive science artificial intelligence and behavioral economics Throughout the book strengthens its exploration of psychological ideas and the cultures in which they developed and reinforces the connections between psychology modernism and postmodernism The textbook covers scientific applied and professional psychology and is appropriate for higher level undergraduate and graduate students

Leveling the Playing Field Robert K. Fullinwider,Judith Lichtenberg,2004-03-19 Leveling the Playing Field examines the admissions policies of contemporary American colleges and universities in light of the assumption that enhancing the educational opportunities of lower income and minority students would make American society more just It asks how current admissions policies affect the prospects of such students and it evaluates alternative approaches The book treats a variety of topics relevant to answering these questions What does it mean to reward people according to merit Is the American system of higher education a meritocracy and should it be How do the missions of contemporary institutions of higher education bear on admissions What are the implications of the Supreme Court s landmark affirmative action decisions of 2003 What is the proper role and significance of standardized tests like the SAT How does lower education prepare students or fail to for higher education In answering these questions the book examines legacy preference early admissions policies financial aid the test prep industry college counseling and athletics evaluating their effects on the distribution of higher education in the United States not only for lower income and minority students but for college bound students in general

Entrepreneurial President Patricia A. Pelfrey,2012-03-06 Richard C Atkinson was named president of the University of California in August 1995 barely four weeks after the UC Regents voted to end affirmative action How he dealt with the admissions wars the political legal and academic

consequences of that historic and controversial decision as well as the issue of governance is discussed in this book Another focus is the entrepreneurial university the expansion of the University's research enterprise into new forms of scientific research with industry during Atkinson's presidency The final crisis of his administration was the prolonged controversy over the University's management of the Los Alamos and Livermore nuclear weapons research laboratories that began with the arrest of Los Alamos scientist Wen Ho Lee on charges of espionage in 1999 Entrepreneurial President explains what was at stake during each of these episodes how Atkinson addressed the issues and why the outcomes matter to the University and to the people of California Pelfrey's book provides an analysis of the challenges perils and limits of presidential leadership in the nation's leading public university while bringing a historical perspective to bear on the current serious threats to its future as a university

Situated Cognition David Kirshner, James A. Whitson, 2021-12-16 This book is a result of a symposium at a recent annual meeting of the American Educational Research Association that explored foundational issues relative to situated cognition theory Its chapters contribute to discourse about repositioning situated cognition theory within the broader supporting disciplines and to resolving the problematics addressed within the book There is a cumulative vision to the book its theme is that the notion of the individual in situated cognition theory needs to be fundamentally reformulated No theoretical reconfiguration of the social world or of social practices can overcome an individual cast in the dualist tradition This reformulation probes the physiological psychoanalytic and semiotic constitution of persons Chapters authors cover a wide range of topics including transfer of training arguing that traditional cognitive psychology has found precious little evidence of people's ability to apply knowledge gained in one context to the problems encountered in another ecosocial systems a new object of inquiry for situated cognition theory in which the primary units of analysis are not things or people but processes and practices how linkages between discursive practices are manifested as semiotic chaining of signifiers for individuals engaged in everyday activities at home or at school how the ability to function in ways that are consistent with logic emerges not through reflective abstraction on actions but through an enhanced sense of agency as more responsible roles are adopted in daily life practices the mutual constitution of social and individual knowledge familiar terms and concepts normally available through linguistic labels are cultural models to be distinguished from the variegated and hidden mid level meanings that reflect their situated uses in social activity the material neurological substrate through which cultural models and mid level meanings emerge and how learning environments can be structured to take advantage of the perceptual underpinnings of cognition

What's Happening in Teacher Testing Lawrence M. Rudner, 1987

The Aptitude Myth Cornelius N. Grove, 2013-06-19

The Aptitude Myth addresses the decline in American children's mastery of critical school subjects It contends that a contributing cause for this decline derives from many Americans ways of thinking about children's learning They believe that school performance is determined very largely by innate aptitude The *Aptitude Myth* traces the deep historical origins the spread and elaboration and the eventual triumph of the belief in the determining power of mental abilities given at birth and therefore fixed Covered is 600 B C E until 1926 when the S A T was first administered The belief in aptitude assumed by many Americans to be the modern view of learning ability is revealed as an archaic way of thinking that originated in the imaginations of our ancient forebears and gradually gained credibility over 2 500 years In recent times the belief became elaborated to include the fanciful notion that more than modest academic study injures a child's health Having inherited this mindset Americans don't know how to insure that children gain mastery A new mindset is needed The final chapter offers a transformative mindset

Rethinking School Reform Linda Christensen, Stan Karp, 2003 *Rethinking School Reform* puts classrooms and teaching at the center of the debate over how to improve public schools Drawing on some of the best writing from the quarterly journal *Rethinking Schools* this new collection offers a primer on a broad range of pressing issues including school vouchers and funding multiculturalism standards and testing teacher unions bilingual education and federal education policy Informed by the experience and passion of teachers who walk daily into real classrooms *Rethinking School Reform* examines how various reform efforts promote or prevent the kind of teaching that can bring equity and excellence to all our children and it provides compelling practical descriptions of what such teaching looks like
