Nongovernmental Organizations And The Ideas Of Human Rights:

Role of nongovernmental organizations in the development of democracy : hearing , **Nongovernmental Organizations in International Society** V. Heins, 2008-04-14 Based on a wealth of original information and research this book offers both a critical introduction to NGOs and a discussion of recent theoretical approaches which have either dismissed or wildly exaggerated their political significance **The Role of Non-governmental Organizations in the Development of Democracy** United States. Congress. Senate. Committee on Foreign Relations, 2007

Nongovernmental Organizations and the Ideas of Human Rights Lowell W. Livezey, **Nongovernmental Organizations and Democracy Promotion "giving Voice to the People"**, 2006 **The Idea of Development in Africa** Corrie Decker, Elisabeth McMahon, 2020-10-29 The Idea of Development in Africa challenges prevailing international development discourses about the continent by tracing the history of ideas practices and problems of development used in Africa In doing so it offers an innovative approach to examining the history and culture of development through the lens of the development episteme which has been foundational to the idea of Africa in western discourses since the early 1800s The study weaves together an historical narrative of how the idea of development emerged with an account of the policies and practices of development in colonial and postcolonial Africa The book highlights four enduring themes in African development including their present day ramifications domesticity education health and industrialization Offering a balance between historical overview and analysis of past and present case studies Elisabeth McMahon and Corrie Decker demonstrate that Africans have always co opted challenged and reformed the idea of development even as the western centric development episteme presumes a one way flow of ideas and funding from the West to Africa The Challenges of Nongovernmental Organisations in Anglophone Cameroon Lotsmart N. Fonjong, 2007 It is widely recognised that non governmental organisations NGOs have undertaken an increasingly important role in both human development and environmental conservation efforts in the less developed nations during the past three decades Much of the literature on NGOs focuses on or is sponsored by large Western based international NGOs which themselves undertake or direct many of the development and conservation efforts This book cuts through sensitive subjects including government corruption and manipulation the misuse of NGOs and the limitations of small under funded local development organisations to identify the crucial role of local NGOs in the challenging context of rural development in Sub Saharan African His observations and insights are highly useful and provide important contextual understanding for future human development and environment conservation projects in rural African settings **Religious NGOs in International Relations** Karsten Lehmann, 2016-01-29 Over the last 30 years non governmental organizations NGOs have become increasingly present in international discourses and active in international decision making Among the estimated several million NGOs in existence today an increasingly visible number of organizations are defining themselves in religious terms referring to themselves as

religious spiritual or faith based NGOs This book documents the initial encounters between the particularly international segment of those organizations and the UN while at the same time covering the Protestant and Catholic spectrum that dominated the early years of their activities in the UN context This book focuses on the construction of the human rights discourse inside two religiously affiliated organizations The Commissions of the Churches on International Affairs CCIA and Pax Romana IMCS ICMICA These organizations have been formally accredited as NGOs by the UN label themselves as religious and look back upon a long and intense cooperation with the UN Lehmann presents material from the archives of those two organizations that has so far rarely been used for academic analysis In doing so as well as documenting the encounters between those organizations and the UN and looking at the Protestant and Catholic spectrum the book provides new insights into the very construction of the notions of the religious and the secular inside those organizations This work will be of great interest to all students of religion and international relations and will also be of interest to those studying related subjects such as global institutions comparative politics and international politics Hearings, Reports and Prints of the House Committee on International Relations United States.
