Nonlinear Diffusion Equations And Their Equilibrium States 3:

Nonlinear Diffusion Equations and Their Equilibrium States, 3 N.G Lloyd,M.G. Ni,L.A. Peletier,J. Serrin,1991-06-01 Nonlinear diffusion equations have held a prominent place in the theory of partial differential equations both for the challenging and deep math ematical questions posed by such equations and the important role they play in many areas of science and technology Examples of current inter est are biological and chemical pattern formation semiconductor design environmental problems such as solute transport in groundwater flow phase transitions and combustion theory Central to the theory is the equation Ut cp U f u Here denotes the n dimensional Laplacian cp and f are given functions and the solution is defined on some domain n x 0 T in space time FUn damental questions concern the existence uniqueness and regularity of so lutions the existence of interfaces or free boundaries the question as to whether or not the solution can be continued for all time the asymptotic behavior both in time and space and the development of singularities for instance when the solution ceases to exist after finite time either through extinction or through blow up   Nonlinear Diffusion Equations and Their Equilibrium States, 3 N. G. Lloyd,1992-01-01   Handbook of Differential Equations: Evolutionary Equations C.M. Dafermos,Eduard Feireisl,2004-08-24 This book contains several introductory texts concerning the main directions in the theory of evolutionary partial differential equations The main objective is to present clear rigorous and in depth surveys on the most important aspects of the present theory The table of contents includes W Arendt Semigroups and evolution equations Calculus regularity and kernel estimatesA Bressan The front tracking method for systems of conservation lawsE DiBenedetto J M Urbano V Vespri Current issues on singular and degenerate evolution equations L Hsiao S Jiang Nonlinear hyperbolic parabolic coupled systemsA Lunardi Nonlinear parabolic equations and systemsD Serre L1 stability of nonlinear waves in scalar conservation laws B Perthame Kinetic formulations of parabolic and hyperbolic PDE s from theory to numerics   Partial Differential Equations III Michael E. part of the contributions presented during the conference to celebrate the 70th birthday of Prof Emmanuele DiBenedetto which was held at Il Palazzone in Cortona from June 18th to 24th 2017 The papers are focused on current research topics regarding the qualitative properties of solutions connections with calculus of variations Harnack inequality and regularity theory Some papers are also related to various applications Many of the authors have shared with Prof DiBenedetto an intense scientific and personal collaboration while many others have taken inspiration from and further developed his field of research The topics of the conference are certainly of great interest for the international mathematical community
