**Maritime Security and the Law of the Sea** Natalie Klein, 2012-10-04 Maritime Security and the Law of the Sea examines the rights and duties of states across a broad spectrum of maritime security threats. It provides comprehensive coverage of the different dimensions of maritime security in order to assess how responses to maritime security concerns are and should be shaping the law of the sea. The discussion sets out the rules regulating passage of military vessels and military activities at sea, law enforcement activities across the different maritime zones, information sharing and intelligence gathering as well as armed conflict and naval warfare. In doing so, this book not only addresses traditional security concerns for naval power but also examines responses to contemporary maritime security threats such as terrorism, weapons of mass destruction, piracy, drug trafficking, environmental damage and illegal fishing. While the protection of sovereignty and national interests remain fundamental to maritime security and the law of the sea, there is increasing acceptance of a common interest that exists among states when seeking to respond to a variety of modern maritime security threats. This book argues that security interests should be given greater scope in our understanding of the law of the sea in light of the changing dynamics of exclusive and inclusive claims to ocean use. More flexibility may be required in the interpretation and application of the UN Convention on the Law of the Sea if appropriate responses to ensure maritime security are to be allowed.

**Non-Traditional Security in Asia** Ralf Emmers, 2017-03-02 The security issues confronting Asia are both complex and diverse. Given the increasing trend towards an expanding security agenda beyond the military dimension of inter state relations, this volume provides an extensive study of emerging non traditional challenges to this region. New realities and new challenges have come to the fore including environmental degradation, illegal immigration, infectious diseases, transnational crime, poverty and underdevelopment. Drawing upon the concepts of securitization and de securitization, this book brings together regional perspectives from across Asia to examine how these challenges are perceived and managed. It is a valuable contribution to both security and Asian studies and will be ideally suited to those interested in security studies, international relations and development studies.

Raimo Väyrynen: A Pioneer in International Relations, Scholarship and Policy-Making Raimo Väyrynen, 2023-01-03 This book provides a broad overview of Professor Raimo Väyrynen's academic work, his role in international research organizations and his contributions to policy debates. It offers an interesting review of important political issues during the time span of half a century from disarmament in Europe to the changing relationship between state sovereignty and transnational forces. Väyrynen has dealt with the changing agenda of peace and international relations, security and the arms race and the world economy. This book provides comprehensive analyses of the regional and systemic structure of international relations with the emphasis on conflicts and warfare between nations. It argues that while states, even smaller ones, still matter, transnational issues are increasingly important. Taking a historical perspective, the articles suggest that large-scale violence and arms races have been recurrent and cyclical phenomena in international relations. These events reflect the deep-seated inequalities in the political and economic systems which moreover vary considerably between regions. The publication is important reading for any researcher as well as students, policy makers and the science-oriented public at large. Traces the changing agenda of international relations from disarmament and the world economy to the changing relationship between state sovereignty and transnational forces. Provides analyses of the regional and systemic structure in international relations with the emphasis on conflicts and warfare. Argues that large-scale violence and the arms race have been recurrent and cyclical phenomena in international relations. Reviews important political issues from peace and conflict in Europe to the changing power relationship in the world.

We have not made much progress in learning how to cooperate with one another more effectively or how to conduct our conflicts more peacefully. Instead, we have increased the lethality of our combat through revolutions in weapons technology and military training.
