Piacentini, 2018-05-08 This title was first published in 2003 Most of the essays collected in this volume are the revised versions of the reports presented at a conference held at the University of Tokyo in October 2001 organised as part of the initiatives of the Italian Year in Japan and supported by the Foundation Italy in Japan 2001 the Italian Chamber of Commerce in Tokyo the Italian Ministries of Foreign Affairs and of Higher Education and the University of Tokyo The essays which aim at a fact based presentation provide a thorough survey of the relevant problems and aspects of present day Italian economy and society Those peculiar features of the Italian economy such as its dualistic industrial structure and territorial divide are analysed at length with an eye to open policy options The economic analyses are complemented by presentations of some of the central topics on the Italian social framework such as the role of family and the Third Sector *Performance*

Measurement in Non-Profit Organizations Patrizia Gazzola, Stefano Amelio, 2022-09-26 Performance Measurement in Non Profit Organizations The Road to Integrated Reporting addresses the issue of performance measurement in nonprofit companies with the aim of defining a system of useful measures to understand manage and improve the performance of such companies by employing systems theory to examine their conditions of existence and manifestations of life From the proposed company model follows that the system of performance measures should make it possible to keep under control both the productive transformation with the physical technical efficiency indicators and the economic transformation with the economic efficiency indicators and the financial transformation with the financial efficiency indicators and finally the managerial transformation with the effectiveness indicators taking into account the degree of satisfaction of the expectations of the main categories of company stakeholders Readers will understand that economic analysis alone is not sufficient to assess the performance of such organizations but it is necessary to unite it with the analysis of sustainability dimensions It would therefore be appropriate to draw up an integrated report that combines the economic and financial dimensions with the pillars of sustainability as in the case of companies in the second sector There is a gap in the literature in this area that this book aims to fill making it a valuable resource to researchers academics and advanced students interested in performance evaluation of NPOs **Defining the Nonprofit Sector** Lester M. Salamon, Helmut K. Anheier, 1997

The growth of the non profit voluntary or third sector has been widely recognized throughout the world This text seeks to provide a definition and a common classification of the non profit sector while recognizing the great diversity of voluntarism

internationally **Philanthropy and the Nonprofit Sector in a Changing America** Charles Clotfelter, Thomas Ehrlich, 2001-10 This collection brings together the views of a stellar assemblage of scholars practitioners and a host of other talented and distinguished citizens of the independent sector A must read Philanthropy Monthly In an attempt to analyze future directions of the increasingly influential nonprofit sector the American Assembly and the Indiana Center on Philanthropy sponsored a conference that brought in leading scholars and practitioners Participants were asked to consider what forces will determine the shape and activities of philanthropy and the nonprofit sector in the next decade This volume is a product of this inquiry Contributors focused on a variety of pressures including the devolution of federal programs the blurring of lines between non profit and for profit organizations the changing distributions of income a revived interest in community and civil society the evolution of religion and other regulatory reform and a retreat of government from various policy areas **Nonprofits in Crisis** Nuno S. Themudo, 2013-09-26 Why do some countries have a vibrant nonprofit sector while others do not Nonprofits in Crisis explores the theory of risk as a major mechanism through which economic development influences the nonprofit sector Nuno S Themudo elaborates this idea by focusing on Mexican nonprofit organizations which operate and strive to survive in a risky environment The study of these nonprofits generates broader lessons about philanthropy and the nonprofit sector that complement wider cross national statistical analysis *The Nonprofit Sector in Germany* Helmut K. Anheier, Wolfgang Seibel, 2001 This text offers an overview of the size scope structure historical development and current policy environment of the German nonprofit sector *The 'Camps System' in Italy* Riccardo Armillei, 2018-05-16 This book deals with the social exclusion of Romanies Gypsies in Italy Based on interviews with Romani individuals institutional and Civil Society Organisations CSOs representatives participant observation and a broad range of secondary sources the volume focuses on the conditions of those living in Rome s urban slums and on the recent implementation of the so called Emergenza Nomadi Nomad Emergency The enactment of this extraordinary measure concealed the existence of a long established institutional tradition of racism and control directed at Romanies It was not the result of a sudden unexpected situation which required an immediate action as the declaration of an emergency might imply but rather of a precise government strategy By providing an investigation into the interactions between Romanies local institutions and CSOs this book will deliver a new perspective on the Romani issue by arguing that the camp is not only a tool for institutional control and segregation but also for resistance as well as a huge business in which everyone plays their part

The State and Civil Society Nicole Bolleyer, 2018-10-25 State regulation of civil society is expanding yet widely contested often portrayed as illegitimate intrusion Despite ongoing debates about the nature of state voluntary relations in various disciplines we know surprisingly little about why long lived democracies adopt more or less constraining legal approaches in this sphere in which state intervention is generally considered contentious Drawing on insights from political science sociology comparative law as well as public administration research this book addresses this important question conceptually

theoretically and empirically It addresses the conceptual and methodological challenges related to developing systematic comparative insights into the nature of complex legal environments affecting voluntary membership organizations when simultaneously covering a wide range of democracies and the regulation applicable to different types of voluntary organizations Proposing the analytical tools to tackle those challenges it studies in depth the intertwining and overlapping legal environments of political parties interest groups and public benefit organizations across 19 long lived democracies After presenting an innovative interdisciplinary theoretical framework theorizing democratic states legal disposition towards or their disinclination against regulating voluntary membership organizations in a constraining or permissive fashion this framework is empirically tested Applying Qualitative Comparative Analysis QCA the comparative analysis identifies three main paths accounting for the relative constraints in the legal environments democracies have created for organized civil society defined by different configurations of political systems democratic history their legal family and voluntary sector traditions Providing the foundation for a mixed methods design three ideal typical representatives of each path Sweden the UK and France are selected for the in depth study of these legal environments long term evolution to capture reform dynamics and their drivers that have shaped group and party regulation over many decades
