A Critique of Psychoanalytic Reason Léon Chertok, Isabelle Stengers, 1992 This original and provocative work begins by examining the shift of scientific paradigms that took place in the late eighteenth century a shift illustrated by the report of a French Royal Commission appointed in 1784 to investigate Mesmerism The reactions to Mesmerism among the Commission members in particular the chemist Lavoisier and the botanist Jussieu crystallized conflicts about the notion of reason and its role as a scientific ideal about how science ought to be done The Commission's denunciation of Mesmerism as the work of the imagination then serves as the starting point for the authors reconsideration of the history of psychoanalysis notably its suppression and repression of phenomena associated with hypnosis imagination suggestion and empathy in its search to establish itself as a science in accord with the new ideal of scientific reason Examining the new and often troubled relationship in psychoanalysis between therapeutic effectiveness and advances in theory the authors highlight the challenge to Freudian ideals in the 1920s by Otto Rank and Sandor Ferenczi The discrediting of Ferenczi engineered to a large extent by Ernest Jones and Freud himself was an attempt to purify psychoanalysis of the effects of suggestion The authors discuss Freud's own therapeutic nihilism occasioned by his recognition that suggestion by means of the transference relationship played an uncontrollable role in psychoanalytic therapy In assessing Freud's legacy the authors examine evolving notions of psychoanalysis especially the role played by the effects of suggestion in recent theoretical representations of the development of the subject Asserting that hypnosis and the challenge it poses to our understanding of human motivation reason and the mind-body relationship constitutes the fourth narcissistic wound to the human ego after those introduced by Copernicus Darwin and Freud the authors analyze Lacan's rejection of hypnosis and explain current resistance to hypnosis

L'âge des foules Serge Moscovici, 2005-10-18 Ce XXe siècle qui promettait l'émancipation des peuples apparaît bien plutôt comme celui de la puissance des masses donnant raison au fondateur de la psychologie des foules Gustave Le Bon qui dès 1895 prophétisait l'âge des foules Parmi toutes les sciences de l'homme qu'a produites notre modernité deux seulement l'ont elles-mêmes façonné l'économie politique et la psychologie des foules Mais celle-ci contrairement la première reste ignorée

voire secrète Serge Moscovici expose ici de façon très accessible le système d'idées dont la cohérence constitue la psychologie des foules partir des travaux de ses trois grands artisans Gustave Le Bon Gabriel de Tarde Sigmund Freud Et il présente leurs réponses des questions telles que celles-ci : qu'est-ce qui fait agir les masses ? quels hommes sont leurs meneurs et d'où tirent-ils leur puissance ? pourquoi sont-ils l'objet d'un culte ? de la personnalité comment les individus sont-ils entraînés par les processus de masses et pourquoi leurs possibilités de résistance sont-elles si faibles ? On trouvera également décrites ici les méthodes que la psychologie des foules propose pour le gouvernement des masses méthodes qui sont de fait appliquées un peu partout dans le monde avec un impressionnant succès Serge Moscovici directeur d'études à l'école des hautes études en sciences sociales est l'auteur de nombreux travaux en histoire des sciences en psychologie sociale et en psychologie politique

Corpus Jean-Luc Nancy, 2009-08-25 How have we thought the body ? How can we think it anew ? The body of mortal creatures the body politic the body of letters and of laws the mystical body of Christ all these and others are incorporated in the word Corpus the title and topic of Jean-Luc Nancy's masterwork Corpus is a work of literary force at once phenomenological sociological theological and philosophical in its multiple orientations and approaches In thirty-six brief sections Nancy offers us at once an encyclopedia and a polemical program reviewing classical takes on the corpus from Plato Aristotle and Saint Paul to Descartes Hegel Husserl and Freud while demonstrating that the mutations technological biological and political of our own culture have given rise to the need for a new understanding of the body He not only tells the story of this cultural change but also explores the promise and responsibilities that such a new understanding entails The long-awaited English translation is a bold bravura rendering To the title essay are added five closely related recent pieces including a commentary by Antonia Birnbaum dedicated in large part to the legacy of the mind-body problem formulated by Descartes and the challenge it poses to rethinking the ancient problems of the corpus The last and most poignant of these essays is 'The Intruder' Nancy's philosophical meditation on his heart transplant The book also serves as the opening move in Nancy's larger project called 'The deconstruction of Christianity'
