Nonverbal Behavior in Interpersonal Relations

Virginia P. Richmond, James C. McCroskey, Mark Hickson, 2008 Nonverbal Behavior in Interpersonal Relations offers a complete and precise explanation of the principles of nonverbal communication and their application in everyday life. The authors draw from a wide variety of disciplines and upon their vast experience as instructors, consultants, and corporate trainers to offer a unique blend of social scientific and humanistic approaches to the study of nonverbal behavior. This well-researched book offers conclusions about the research in an easy-to-read and student-friendly style. Each chapter includes exercises, activities, self-tests, or questionnaires that help students explore and understand the actual and potential impact of nonverbal behaviors on communication. The text also helps students build the skills they will need to become competent nonverbal communicators in today's global community.

Human Behavior Understanding Albert Ali Salah, Theo

Gevers, Nicu Sebe, Alessandro Vinciarelli, 2010-08-19 It was a great pleasure to organize the First International Workshop on Human Behavior Understanding (HBU) which took place as a satellite workshop to the International Conference on Pattern Recognition (ICPR) on August 22, 2010, in Istanbul, Turkey. This workshop arose from the natural marriage of pattern recognition with the rapidly advancing area of human behavior analysis. Our aim was to gather researchers dealing with the problem of modeling human behavior under its multiple facets: expression of emotions, display of relational attitudes, performance of individual or joint actions, etc., with particular attention to pattern recognition approaches that involve multiple modalities and those that model actual dynamics of behavior. The contiguity with ICPR, one of the most important events in the pattern recognition and machine learning communities, is expected to foster cross-pollination with other areas, for example, temporal pattern mining or time series analysis, which share their important methodological aspects with human behavior understanding. Furthermore, the presence of this workshop at ICPR was meant to attract researchers, in particular PhD students and postdoctoral researchers, to work on the questions of human behavior understanding that is likely to play a major role in future technologies: ambient intelligence, human-robot interaction, artificial social intelligence, etc., as witnessed by a number of research efforts aimed at collecting and annotating large sets of multi-sensor data collected from observing people in natural and often technologically challenging conditions.

The SAGE Handbook of Nonverbal Communication

Valerie Manusov, Miles L. Patterson, 2006-08-10 This Handbook provides an up-to-date discussion of the central issues in nonverbal communication and examines the research that informs these issues. Editors Valerie Manusov and Miles Patterson bring together preeminent scholars from a range of disciplines to reveal the strength of nonverbal behavior as an integral part of communication.
