A Theory of Nonviolent Action Stellan Vinthagen, 2015-11-15 In this ground-breaking and much-needed book, Stellan Vinthagen provides the first major systematic attempt to develop a theory of nonviolent action since Gene Sharp's seminal *The Politics of Nonviolent Action* in 1973. Employing a rich collection of historical and contemporary social movements from various parts of the world as examples—from the civil rights movement in America to anti-Apartheid protestors in South Africa to Gandhi and his followers in India—and addressing core theoretical issues concerning nonviolent action in an innovative, penetrating way, Vinthagen argues for a repertoire of nonviolence that combines resistance and construction. Contrary to earlier research, this repertoire, consisting of dialogue facilitation, normative regulation, power breaking, and utopian enactment, is shown to be both multidimensional and contradictory, creating difficult contradictions within nonviolence while simultaneously providing its creative and transformative force. An important contribution in the field, *A Theory of Nonviolent Action* is essential for anyone involved with nonviolent action who wants to think about what they are doing.

Virtue and Irony in American Democracy Daniel A. Morris, 2015-07-01 What virtues are necessary for democracy to succeed This book turns to John Dewey and Reinhold Niebuhr two of America s most influential theorists of democracy to answer this question Dewey and Niebuhr both implied although for very different reasons that humility and mutuality are important virtues for the success of people rule Not only do these virtues allow people to participate well in their own governance they also equip us to meet challenges to democracy generated by free market economic policy and practices Ironically though Dewey and Niebuhr quarreled with each other for twenty years and missed the opportunity to achieve political consensus In their discourse with each other they failed to become one out of many a task

that is distilled in the democratic rallying cry *e pluribus unum*. This failure itself reflects a deficiency in democratic virtue. Thus exploring the Dewey Niebuhr debate with attention to their discursive failures reveals the importance of a third virtue: democratic tolerance. If democracy is to succeed we must cultivate a deeper hospitality toward difference than Dewey and Niebuhr were able to extend to each other. Peace Studies Matthew Evangelista, 2005. The academic field of Peace Studies emerged during the Cold War to address the nature and sources of interstate and internal conflict and methods to prevent it and deal with its consequences. *Nonviolent Perspectives* Andrew Fitz-Gibbon, 2025-02-04. This book is a compilation of essays addressing the central issue of humanity: interpersonal violence and more importantly nonviolence as its antidote. The essays trace the author's journey from early pacifist convictions influenced by personal experiences with violence to a nuanced understanding of nonviolence rooted in ethics, love, spirituality, and critical theory. Spanning over two decades, the writings explore various dimensions of nonviolence from philosophical arguments and historical analysis to practical applications in parenting, political resistance, and care ethics. The book brings together previously published works that have been instrumental in shaping the author's thinking, making them accessible for scholars, students, and anyone interested in nonviolence. With reflections on the works of Murdoch, MacIntyre, Gandhi, and others, it offers a comprehensive examination of nonviolence as both a personal practice and a social imperative. **Behavior Analysis Around the World** Claudia Dalbert, 2020-10-28. It is based on laboratory research and in conceptualizations from distinguished figures of the discipline such as Skinner, Pavlov, Mach, and even Watson and Thorndike. It has generated a science, the experimental analysis of behaviour, a philosophy, behaviourism, and numerous practical applications: applied behaviour analysis. For several decades it was even considered to be the dominant paradigm in psychology. This special issue contains scientific articles in the main areas of behaviour analysis, both as a laboratory science and as an applied discipline. It covers representative research and applications of behaviour analysis at the beginning of the 21st century. The authors come from countries including the United States, China, Mexico, Spain, Belgium, France, Switzerland, Colombia, Poland, Greece.
