The background of the slide features a close-up, artistic photograph of two pens. The pens are positioned vertically, with their tips pointing upwards, and they appear to be growing out of a dark, textured surface that resembles soil or mulch. The lighting is warm and directional, coming from the upper right, which creates a strong highlight on the right side of the pens and casts soft shadows to the left. The overall color palette is dominated by warm, earthy tones of brown, orange, and red.

contemporary research on correctional policy This work combines a voyeuristic desire to observe evil and the consequences of the system of punishment with detached consideration of what those stories can tell us about who we are as a nation and how we treat those who have betrayed the social trust The authors simultaneously examine first person accounts of inmate experiences with the correctional system and what actually works in operation to promote the rehabilitative and restorative models of justice so many of our policymakers espouse Each chapter opens with a vignette a recollection of an event or series of events about an inmate s experience during the various phases of correctional processing These first hand accounts have been collected from men who served time in prison These men s stories are examined in their own right then extrapolated to a broader analysis of the underlying social and policy issues to which that vignette speaks All chapters follow the same structure a opening vignette about a former inmate b analysis which includes i identification of the underlying issue ii reflection and iii extrapolation to a larger policy issue and c recommendations from the field for enacting practice and crafting policy more responsive to the identified issue

Rethinking Excessive Habits and Addictive Behaviors Tony Bevacqua, 2015-07-02 Twelve step programs are the foundation of conventional thinking and treatment for people with addictive behaviors But are they truly the best Here Tony Bevacqua explains why these one size fits all approaches are not appropriate for everyone since each person is a unique human being This book takes a humanistic perspective that offers guidance for sufferers their families and friends practitioners and anyone interested in understanding the nature of addictive behaviors What do we know about addictive behavior and mental health Bevacqua maintains our common perceptions are loaded with outdated emotionally charged and deficit based vocabulary Words like addiction addict alcoholic denial recovery clean and others have become absorbed into our vocabulary but conjure up the worst case descriptions of undesirable behavior These labels are generalized to all behaviors and to all people regardless of the details of their specific circumstances By rethinking and changing the language new learning can take place and new approaches to treatment can emerge While biology may play a role in addiction the author argues that the disease model strips sufferers of their ability to see their issues as within their control to address Understanding the role of learning and behavior allows people to redefine addiction in terms of their own personal circumstances allowing that the brain is an organ of social adaptation and is constantly able to wire and rewire itself through enriched environments and new learning Bevacqua proposes a language that also supports an individual with kindness compassion and empathy and suggests ways in which this new perspective and approach can help individuals improve the quality of their thinking which will improve the quality of their behavior

Rethinking Cognitive Enhancement Ruud ter Meulen,Ahmed Mohamed,Wayne Hall,2017-02-23 There has been much recent excitement amongst neuroscientists and ethicists about the possibility of using drugs as well as other technologies to enhance cognition in healthy individuals This excitement has arisen from recent advances in neuroscientific technologies such as drugs that increase alertness and wakefulness in healthy individuals or technologies that can stimulate activity in different parts of the brain either via the scalp or via electrodes raising the possibility of producing cognitive and affective improvements in otherwise healthy individuals Despite this growing interest there are conflicting views on the ethics of cognitive enhancement Some argue that enhancement is not only an ethical pursuit but one that we have a moral obligation to pursue Others are more skeptical about the ethical implications and long term effects of cognitive enhancement Some neuroscientists argue that use of stimulants as putative enhancers will lead to misuse abuse and addiction in some users and might have undesirable long term consequences This book critically explores and analyses the scientific and ethical debates surrounding cognitive enhancers Including contributions from neuroscientists neuropsychopharmacologists ethicists philosophers public health professionals and policy researchers the book offers a multidisciplinary critical consideration of the ethics of the use of cognitive enhancers **Rethinking Christian Forgiveness** James K. American moral philosophy and psychology to establish a phenomenology of forgiving before turning to contemporary Christian literature The multilayered dialogue that ensues challenges the assumptions of contemporary approaches secular and Christian and invites the reader to rethink the meaning of Christian forgiveness **Rethinking Suicide** Craig J.
