Pragmatics and Semantics Carol A. Kates,2020-02-15 What is the nature of communicative competence Carol Kates addresses this crucial linguistic question examining and finally rejecting the rationalistic theory proposed by Noam Chomsky and elaborated by Jerrold J Katz among others She sets forth three reasons why the rationalistic model should be rejected 1 it has not been supported by empirical tests 2 it cannot accommodate the pragmatic relation between speaker and sign and 3 the theory of universal grammar carries with it unacceptable metaphysical implications unless it is interpreted in light of empiricism Kates proposes an empiricist model in place of the rationalistic theory a model that in her view is more consistent with recent findings in linguistics and psycholinguistics In attempting to clarify the nature of utterance meaning Kates develops theoretical perspectives on phenomenological empiricism and produces an account of reference and intentionality directly relevant to empirically based theories of speaking and understanding Among the major topics addressed in the book are transformational generative and universal grammar cognitive theories of language acquisition pragmatic structure predication and topic comment structure and empiricism and the philosophical problem of universals An innovative and probing work Pragmatics and Semantics will be welcomed by philosophers linguists and psycholinguists

and semantics plays a crucial role in the formulation and resolution of these learnability problems General conceptual issues raised by the Subset and Uniqueness Principles are also discussed The Handbook of Second Language Acquisition
